New Development Agenda:

Southern Perspectives on the Post-2015 International Development Agenda Debapriya Bhattacharya, Andrea Ordóñez Llanos, 2016-11-03 At the turn of the millennium the unanimous adoption of the Millennium Development Goals MDGs by the United Nations General Assembly marked a new chapter in international development However voices from the Global South were noticeably absent in shaping the agenda Fifteen years later the global context has changed so much that it would have been inconceivable not to have taken voices from the South into account when planning the new Sustainable Development Goals SDGs Since its inception in 2012 the Southern Voice on Post MDG International Development Goals Southern Voice a network of 48 think tanks from Africa Asia and Latin America has generated a substantial body of original research to feed into various aspects of the post 2015 development agenda such as the missing dimensions of the MDGs ways to mitigate existing challenges in delivering on aspired outcomes and new issues goals targets and indicators that are crucial for the next global development framework Southern Perspectives on the Post 2015 International Development Agenda consolidates this research and stitches together development realities and policy experiences from the Global South infusing unique local perspectives to the global debate on the post 2015 agenda The compendium addresses the overarching themes underpinning the new international development framework by focusing on issues such as sustainability and growth inclusion and social policies governance and capacities and financing of the new agenda Southern Voice seeks to challenge the knowledge asymmetry afflicting the global knowledge system by channelling evidence based policy analyses produced by centres of excellence located in the Global South This is a valuable resource for academics and researchers policymakers and practitioners and concerned students in search of alternative views on sustainable development *Delusions of Development* T. Carroll, 2010-09-22 Investigates the World Bank s promotion of market led development in the underdeveloped world and the impact that this promotion has upon citizenship This book looks at this subject using case studies drawn from Southeast Asia one of the world s most diverse regions **People, Planet, and Progress Beyond 2015**, 2016-12-15 Second in the series of TERI s annual flagship publication on global sustainable development People Planet and Progress Beyond 2015 examines six critical issues of the Planet climate change ozone layer depletion loss of biodiversity desertification unsustainable use of natural resources and environmental pollution and six crucial issues of the People food security and safety health and well being education and learning sustainable habitat energy for all and social justice and equity reviews the Progress made by various regions and countries of the world on each of these issues and analyses the challenges and opportunities ahead particularly in the contexts of post 2015 global development agendas ushered by the Paris Climate Agreement UN Sustainable Development Goals and Sendai Framework for Disaster Risk Reduction The analysis is supported by primary data from authentic sources on a wide range of indicators that make the volume an invaluable resource material on contemporary discourses on global development **Development and Semi-periphery**

Renato Boschi, Carlos Henrique Santana, 2013-11-01 Development and Semi periphery presents a collection of articles that focus on comparative analysis of development trajectories in the semi peripheral countries of South America and Central Eastern Europe. As opposed to the transitology studies that were prevalent in the 1990s and that treated the neoliberal context in these two regions separately, the articles in this book instead offer a new comparative analysis focusing on the consequences of neoliberal reforms and the new actors that deal with their results. The essays discuss the various forms of state that have unfolded in different peripheral countries, their role in the social engineering of economic models and social policies, and the impact of state capacities and ideas on institutional innovation. The volume also compares transformations in political culture, collective identities, and contentious politics in both areas. *Africa in the Post-2015 Development Agenda*

Leo Charles Zulu, Cristina D'Alessandro, 2018-04-19 This book offers a multifaceted examination of Africa's development into the post 2015 global agenda from a geographical perspective. As a diversified and highly applied discipline, geography has a lot to offer to global debates, nuanced analysis of problems, and the search for innovative solutions to advance the African development agenda beyond 2015. The end of the Millennium Development Goals (MDGs) era and the launch of the Sustainable Development Goals (SDGs) in September 2015 mark an important turning point for Africa and an opportune time to examine new challenges and opportunities that it faces. The regional disparities in MDG progress affirm an important geographic tenet: that the unique yet internally differentiated socio-cultural, economic, political, ecological, biophysical, and historical context give Africa distinctive challenges and opportunities that demand particular approaches to development. This edited book presents innovative contributions examining Africa's development performance in diverse sectors during the MDG era as a basis for understanding prospects for its development in the SDG era and beyond. It offers new and innovative study perspectives and methodological approaches on urban transformation, development financing, food security, climate change, gender equality, health, and regional integration among other topics, and useful insights for scholars, students, and development practitioners. This book was originally published as a special issue of *African Geographical Review*, the journal of the American Association of Geographers Africa Specialty Group, to mark the transition from MDGs to SDGs. *The Institutional Topology of International Regime Complexes*

Benjamin Daßler, 2023-09-12 The implicit topology of international institutional complexes varies greatly across policy areas. In some areas, the lion's share of everyday policy cooperation is shaped by a single institution, with alternative and more regional institutions operating in its shadow. In other policy fields, institutional structures appear to be different, seeing a range of non-hierarchical, decentralized alternative institutions. *The Institutional Topology of International Regime Complexes: Mapping Inter-Institutional Structures in Global Governance* provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies underlying regime complexes across five issue areas of Global Governance: Intellectual Property Protection, Tax Avoidance, Financial Stability, Development Aid, and Energy Governance. By providing an empirically grounded, network-based conceptualization

and mapping of institutional topologies as well as a theoretical explanation for their variation across policy space and time the book offers a comprehensive analysis of both the empirical manifestation of inter institutional structures across various policy fields of Global Governance and the issue specific factors that shape the varying institutional trajectories spurring de centralization Da ler combines quantitative network analyses with qualitative case studies to trace institutional decentralization processes across five highly relevant issue areas of Global Governance This volume shows how the nature of issue specific cooperation problems translates into disparate structures among multilateral institutions occupying the same regime complex In light of growing concerns about the future trajectories of Global Governance in times of heightened geopolitical tensions Da ler offers a fresh perspective to comparatively capture the profoundly varying institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation

Routledge Handbook on the Politics of Global Health Richard Parker,Jonathan García,2018-12-07 In the early

twenty first century key public health issues and challenges have taken centre stage on the global scene and health has been placed at the heart of our collective aspirations for human development and well being But significant debate exists not only about the causes but also about the possible solutions for nearly all of the most important global health challenges Competing visions of the values and perspectives that should underlie global health policies have emerged ranging from an emphasis on cost effectiveness and resource constraints on one extreme to new calls for health and human rights and renewed calls for health and social justice on the other The role of different intergovernmental agencies bilateral or unilateral donors public or private institutions and initiatives has increasingly been called into question whilst the spread of neoliberal policies and programmes and existing international trade regimes and intellectual property rights are deeply implicated in relation to global health responses This volume critically evaluates how the global health industry has evolved and how the interests of diverse political and economic stakeholders are shaping the context of a rapidly changing institutional landscape Bringing together leading authors from across the world the Handbook's eight sections explore Critical perspectives on global health Globalisation neoliberalism and health systems The changing shape of global health governance Development assistance and the politics of global health Scale up scale down and the sustainability of global health programmes Intellectual property rights trade relations and global health Humanitarian emergencies and global health politics Human rights social justice and global health The Routledge Handbook on the Politics of Global Health addresses both the emerging issues and conceptualisations of the political strategies policy making processes and global governance of global health along with expanding upon and highlighting the critical priorities in this rapidly evolving field It provides an authoritative overview for students practitioners researchers and policymakers working in or concerned with the politics of public health around the globe

Expanding Perspectives on Human Rights in Africa M. Raymond

Izarali, Oliver Masakure, Bonny Ibhawoh, 2019-03-14 This book draws attention to emerging issues around the rights of minorities marginalized groups and persons in Africa It explores the gaps between human rights provisions and conditions showing that although international human rights principles have been embraced in the continent various minority groups and marginalized persons are denied such rights through criminalization and persecution African countries have a good record of signing and ratifying international and regional rights instruments but the political will and capacity for enforcing these with respect to minorities remain weak International contributors to the book provide new perspectives on the rights of marginalized and minority groups in different parts of Africa and the extent to which they are deprived or denied entitlement to the universality and equality articulated in law The authors show that human rights while having come of age as a moral ideal has not been fully entrenched in practice towards groups such as children indigenous populations the mentally ill persons with disabilities and persons with albinism This volume is geared toward scholars students human rights groups policy makers social workers international organizations and policy makers in the fields of criminology security studies

Eastern States Manipur stood at 7th in the composite SDG Index that is 59 as against the All India score of 57 The Oxford Handbook of the International Law of Global Security Robin Geiß, Nils Melzer, 2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century On a global scale the central regulatory tool for such responses is public international law But what is the state role and relevance of public international law in today's complex and highly dynamic global security environment Which concepts of security are anchored in international law How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks The Oxford Handbook of the International Law of Global Security provides a ground breaking overview of the relationship between international law and global security It constitutes a comprehensive and systematic mapping of the various sub fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area *Trading Places* Mark Napier, Stephen Berrisford, Caroline Wanjiku Kihato, Rob McGaffin, Lauren Royston, 2013-10-16 Trading Places is about urban land markets in African cities It explores how local practice land governance and markets interact to shape the ways that people at society's margins access land to build their livelihoods The authors argue that the problem is not with markets per se but in the unequal ways in which market access is structured They make the case for more equal access to urban land markets not only for ethical reasons but because it makes economic sense for growing cities and towns If we are to have any chance of understanding and intervening in predominantly poor and very unequal African cities we need to see land and markets differently New migrants to the city and communities living in slums are as much a part of the real estate market as anyone else they're just not registered or officially recognised Trading Places highlights the land practices of those living on the city's margins and explores the nature and character of their participation in the urban land market It details how the urban poor access hold and trade land in the city and how local practices shape the city and reconfigures how we understand land markets in rapidly urbanising contexts Rather than developing new policies which aim to supply land and housing formally but with little effect on the scale of the need it advocates an alternative approach which recognises the local practices that already exist in land access and management In this way the agency of the poor is strengthened and households and communities are better able to integrate into urban economies *Dynamics of People Management—Operations and Obligations* Manodip Ray Chaudhuri, 2022-07-22 This book is a research reference book in the area of Human Capital Management and Behavioral Sciences It is a set of collected works of the author with 22 of his

published papers and book chapters This book is intended for researchers and scholars in the field of manpower management in a broad spectrum *Entrepreneurship in Africa* David S. Fick,2002-03-30 Who are the entrepreneurs who have achieved success wealth and recognition in their African homelands and how did they do it Entrepreneur Dave Fick interviewed several hundred women and men who were willing to assume risks often spectacular ones for personal economic gain but who did it legally ethically and who are now giving back to their nations and societies at least as much as they received They speak openly of their hardships and failures what they did right and what they did wrong and their accounts are remarkable We gain insight into the way business must be done under harsh political and economic circumstances but we also learn unusual techniques and strategies that others in more favorable milieus can use to accomplish similar feats With commentaries from notable scholars and other businesspeople and with Fick's own first hand onsite observations the book is a self educating colloquium a collection of personal meetings accounts letters emails and telephone calls between Fick his counterparts in Africa and others around the world It is also an attempt to encourage a dialogue that will accelerate the exchange and spread of knowledge and ideas and a way to help the people of Africa build a peaceful and better society for themselves and the world **The Handbook of Global Health Policy** Garrett W. Brown,Gavin Yamey,Sarah Wamala,2014-06-03 The Handbook of Global Health Policy provides a definitive source of the key areas in the field It examines the ethical and practical dimensions of new and current policy models and their effect on the future development of global health and policy Maps out key debates and policy structures involved in all areas of global health policy Isolates and examines new policy initiatives in global health policy Provides an examination of these initiatives that captures both the ethical critical as well as practical empirical dimensions involved with global health policy global health policy formation and its implications Confronts the theoretical and practical questions of who gets what and why and how when and where Captures the views of a wide array of scholars and practitioners including from low and middle income countries to ensure an inclusive view of current policy debates From Agriculture to Agricolology Professor Dani Wadada Nabudere,Mapungubwe Institute for Strategic Reflection (MISTRA),2013-07-01 In this meditation respected Ugandan academic Dani Wadada Nabudere traces the roots of the global economic crisis and warns of the threat that the decline of Western nations poses to the African continent the final frontier for those in search of new lands and resources to exploit As a deterrent to what he sees as the encroachment of super profiteers looking to Africa for the land to increase their profits in industrial agriculture Nabudere advocates for what he terms community sites of knowledge that is the use of indigenous tools and knowledge to revitalize the lives of Africa's people The book puts forth the belief that any dependence on imported knowledge and material instruments will only lead to the entrenchment of colonial stereotypes and that indigenous knowledge is imbued with the roots of complex ecosystems that require the inputs of a diversity of expertise and experiences and that are capable of producing the knowledge necessary for the residents of the African continent to reclaim the future
