Congress. Joint Economic Committee, 1977     The East European Economy in Context David Turnock, 2003-09-02 Since 1989 the former communist countries of Eastern Europe have witnessed a profound and dramatic upheaval The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured In The East European Economy in Context Communism and Transition David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe As well as containing an informative survey of the impact of communism The East European Economy in Context provides Political profiles of individual countries A clear study of the contrasts between northern and balkan groups Summaries of regional variations in the transition process An exploration of the new state structures and resources Discussion of political stability inter ethnic tensions and progress in economic change

**Industrial Policy in Eastern Europe** J.M. Van Brabant, 2012-12-06 This volume in essence continues my recent

contributions towards building up a better understanding of the wide range of obstacles besetting the transitions away from administrative planning in the former communist regimes in the eastern part of Europe. It is self-contained however. As such it specifically addresses issues revolving around how best to govern economies and indeed societies more generally that are undergoing fundamental structural transformation and whether industrial policy can facilitate progressing with the vexing transformations that will have to be enacted over a protracted period of time. Because of the bewildering variety of hindrances that the managers of the transition have been confronted with many of which were not even contemplated when the programs were first designed regaining a measure of good governance including notably good economic governance is critical in formulating a positive political economy of transition. Arguably most critical is steering the processes of destruction and creation not creative destruction in the Schumpeterian sense. In some cases this requires reallocating commissioned resources both capital and labor to new activities. Changing rules on the utilization of existing assets is evidently at the core of what the transition towards market-based economic systems should be all about. Very often however this requires establishing new economic activities from domestic and foreign savings.
