**Enuma Elish - the Seven Tablets of Creation** Leonard W. King, 1999-07 The Babylonian and Assyrian Legends Concerning the Creation of the World and of Mankind The Enuma Elish is one of the oldest stories known to mankind It is a story first written down by the ancient Sumerians thousands of years ago As a one time assistant in the Department of Egyptian and Assyrian Antiquities at the British Museum L W King provides us with a qualified translation of the tablets which were originally written in cuneiform script The Enuma Elish is receiving renewed interest from modern researchers delving into the origins of mankind the earth and the solar system Over the centuries a copy ended up in the library at Nineveh in the 7th century B C and was uncovered by archaeologists in the late 1800s Written in cuneiform text and preserved on seven clay tablets the entire story was called The Seven Tablets of Creation After being translated the story revealed how the planets became aligned how a cosmic catastrophe affected the earth how mankind came upon the scene and how the gods played a role in all of it The Seven Tablets of Creation have had many profound implications since they were first discovered and subsequently published They predate many parts of the Book of Genesis as well as other worldwide creation myths Volume One includes this epic poem s English translation It also includes information on parallels in Hebrew literature the date and origin of the Babylonian creation legends and more Volume Two includes other accounts of creation an Assyrian Tower of Babel story and supplementary texts showing the actual cuneiform tablets

**Stolen Fragments** Roberta Mazza, 2024-09-24 In 2012 Steve Green billionaire and president of the Hobby Lobby chain of craft stores announced a recent purchase of a Biblical artefact a fragment of papyrus just discovered carrying lines from Paul s letter to the Romans and dated to the second century CE Noted scholar Roberta Mazza was stunned When was this piece discovered and how could Green acquire such a rare item The answers which Mazza spent the next ten years uncovering came as a shock the fragment had come from a famous collection held at Oxford University and its rightful owners had no idea it had been sold The letter to the Romans was not the only extraordinary piece in the Green collection They soon announced newly recovered fragments from the Gospels and writings of Sappho Mazza s quest to confirm the provenance of these priceless fragments revealed shadowy global networks that make big business of ancient manuscripts from the Greens Museum of the Bible and world famous auction houses like Sotheby s and Christie s to antique shops in Jerusalem and Istanbul dealers on eBay and into the collections of

renowned museums and universities Mazza's investigation forces us to ask what happens when the supposed custodians of our ancient heritage act in ways that threaten to destroy it *Stolen Fragments* illuminates how these recent dealings are not isolated events but the inevitable result of longstanding colonial practices and the outcome of generations of scholars who have profited from extracting the cultural heritage of places they claim they wish to preserve Where is the boundary between protection and exploitation between scholarship and larceny **Language** Stephen Everson, 1994-07-07 This book is concerned to expound and analyse ancient theories of language

Hayward, 2010-03-12 High quality leads provide the foundation for the discovery of successful clinical development candidates and therefore the identification of leads is an essential part of drug discovery The process for the identification of leads generally starts with the screening of a compound collection either an HTS of a relatively large compound collection hundreds of thousands to one million plus compounds or a more focused screen of a smaller set of compounds that have been preselected for the target of interest Virtual screening methods such as structure based or pharmacophore based searches can complement or replace one of the above approaches Once hits are identified from one or more of these screening methods they need to be thoroughly characterized in order to confirm activity and identify areas in need of optimization Finally once fully characterized hits are identified preliminary optimization through synthetic modification is carried out to generate leads Parallel optimization of all properties including biological physicochemical and ADME is the most efficient approach to the identification of leads Hit characterization is described in the previous chapter The focus of this chapter is on hit optimization and the identification of leads After a general overview of these processes examples taken from the literature since 2001 will be used to illustrate specific points There are also a number of excellent reviews covering the lead identification process 1 6
