struggle to build states based on democratic values towards fundamental values existing above and beyond the borders of nations and states under the watchful gaze of judges bound by the rule of law The Importance of Neglect in Policy-Making Michiel S. de Vries, 2010-01-13 De Vries argues that it is possible to explain when and in what direction policy change is likely to occur He argues that what is neglected at present is likely to become dominant in policies of the near future With the birth of a new policy generation a convergence towards meeting the dominant value of that generation will become evident **State and Administration in Japan and Germany** Michio Muramatsu, Frieder Naschold, 2013-02-06 No detailed description available for State and Administration in Japan and Germany **Proceedings of the International Conference on Sustainable Collaboration in Business, Technology, Information, and Innovation (SCBTII 2024)** Suhail Kusairi, Forget Mingiri Kapingura, Putri Fariska Sugestie, Nizam Ahmat, 2024-11-16 This is an open access book Global growth has lost momentum On average GDP growth has declined from more than 2% in advanced economies and nearly 6% in emerging and developing economies in the early 2000s to less than 1.5% and less than 2% post COVID period A succession of crises has compounded this sustained slowdown in growth It has been more than a decade since the beginning of the global financial crisis yet it continues to cast a shadow not least in the policy choices of many advanced economies The COVID 19 pandemic and the shock of lockdowns left behind an aftermath of a surge in public debt levels and a reversal of global development progress Geopolitical tensions and conflicts have further reshaped an increasingly multipolar international order with far reaching implications for technology growth and development Overshadowing these developments is the growing awareness that the world's rising temperature poses grave dangers to the long term prospects for humanity with the world currently on track for a temperature rise significantly above the targets set out in the Paris Agreement in 2015 The critical question for this pivotal moment is not whether the world still needs economic growth but how that growth is achieved and whether it is aligned with other important national and global priorities Against this backdrop universities are essential in educating and providing professional human resources and conducting high quality research that benefits humanity However universities must play a significant role and be innovative and creative in engaging and supporting the development opportunities and consolidation of the global community To embark on this role effectively universities must always foster communication and discussion among stakeholders under the Sustainability Development Goals SDGs Academia Government Business and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues Sustainable Collaboration in Business Information and Innovation SCBTII 2024 is an international conference that brings together academics professionals entrepreneurs researchers learners and other associated groups from all over the world that are interested in theories as well as practices in the field of the digital economy for global competitiveness This conference provides opportunities for presenters and participants to exchange new ideas and experiences create research relationships and find international

partners for future collaboration to respond to economic business social and technological development challenges successfully and effectively for better life and well being
