New Geography Of Time:

A Geography Of Time Robert N. Levine, 2008-08-01 In this engaging and spirited book eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted our perception of time When we travel to a different country or even a different city in the United States we assume that a certain amount of cultural adjustment will be required whether it's getting used to new food or negotiating a foreign language adapting to a different standard of living or another currency In fact what contributes most to our sense of disorientation is having to adapt to another culture's sense of time Levine who has devoted his career to studying time and the pace of life takes us on an enchanting tour of time through the ages and around the world As he recounts his unique experiences with humor and deep insight we travel with him to Brazil where to be three hours late is perfectly acceptable and to Japan where he finds a sense of the long term that is unheard of in the West We visit communities in the United States and find that population size affects the pace of life and even the pace of walking We travel back in time to ancient Greece to examine early clocks and sundials then move forward through the centuries to the beginnings of clock time during the Industrial Revolution We learn that there are places in the world today where people still live according to nature time the rhythm of the sun and the seasons and event time the structuring of time around happenings when you want to make a late appointment in Burundi you say I'll see you when the cows come in Levine raises some fascinating questions How do we use our time Are we being ruled by the clock What is this doing to our cities To our relationships To our own bodies and psyches Are there decisions we have made without conscious choice Alternative tempos we might prefer Perhaps Levine argues our goal should be to try to live in a multitemporal society one in which we learn to move back and forth among nature time event time and clock time In other words each of us must chart our own geography of time If we can do that we will have achieved temporal prosperity *Geography of Time, Place, Movement and Networks, Volume 4* Stanley D. people Built environments Kotkin argues must reflect the preferences of most people even if that means lower density development The Human City ponders the purpose of the city and investigates the factors that drive most urban development today Armed with his own astute research a deep seated knowledge of urban history and a sound grasp of economic political and social trends Kotkin pokes holes in what he calls the retro urbanist ideology and offers a refreshing case for dispersion centered on human values This book is not anti urban but it does advocate a greater range of options for people to live the way they want at all stages of their lives Praise for The Human City Kotkin presents the most cogent evidence based and clear headed exposition of the pro suburban argument In pithy readable sections each addressing a single issue he debunks one attack on the suburbs after another But he does more than that He weaves an impressive array of original observations about cities into his arguments enriching our understanding of what cities are about and what they can and must become Shlomo Angel Wall Street Journal The most eloquent expression of urbanism since Jane Jacobs s The Death and Life of Great American Cities Kotkin writes with a strong sense of place he recognizes that the geography and traditions of a city create the contours of its urbanity Ronnie Wachter Chicago Tribune
