Class, Politics, and the Decline of Deference in England, 1968-2000 Florence Sutcliffe-Braithwaite, 2018-03-01 In late twentieth century England inequality was rocketing yet some have suggested that the politics of class was declining in significance while others argue that class identities lost little power Neither interpretation is satisfactory class remained important to ordinary people s narratives about social change and their own identities throughout the period 1968 2000 but in changing ways Using self narratives drawn from a wide range of sources the raw materials of sociological studies transcripts from oral history projects Mass Observation and autobiography the book examines class identities and narratives of social change between 1968 and 2000 showing that by the end of the period class was often seen as an historical identity related to background and heritage and that many felt strict class boundaries had blurred quite profoundly since 1945 Class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity individuality and ordinariness In fact Sutcliffe Braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference which transformed people s attitudes towards class and towards politics The study also examines the claim that Thatcher and New Labour wrote class out of politics arguing that this simple and highly political narrative misses important points Thatcher was driven by political ideology and necessity to try to dismiss the importance of class while the New Labour project was good at listening to voters particularly swing voters in marginal seats and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness But this did not add up to an abandonment of a majoritarian project as New Labour reoriented their political project to emphasize using the state to empower the individual

Social Exclusion Byrne,

David, 2005-06-01 This book explores developments in social theory social experience and social policy in relation to Social Exclusion It examines the origins of the term and implications of the difference between the ideas of exclusion underclass residuum and related concepts The discussion is informed by the application of Complexity Theory **Territory, Identity and Spatial Planning** Mark Tewdwr-Jones, Philip Allmendinger, 2006-09-27 This book provides a multi disciplinary study of territory identity and space in a devolved UK through the lens of spatial planning It draws together leading internationally renowned researchers from a variety of disciplines to address the implications of devolution upon spatial planning and the rescaling of UK politics Each contributor offers a different perspective on the core issues in planning today in the context of New Labour's regional project particularly the government's concern with business competitiveness and key themes are illustrated with important case studies throughout **The Social Democratic Dilemma** S. Thomson, 2000-05-26 This book examines the development of social democratic parties in Western Europe and suggests that instead of viewing a single model in the past it was more accurate to consider a Northern and Southern European version Each model varied in its characteristics yet each retained an adherence to the same core values But now a new version of social democracy is emerging that is characterised by an advocacy of the tenets of neo liberalism **Young People, Crime and Justice** Roger Hopkins Burke, 2016-03-24 In the minds of the general public young people and crime are intrinsically linked wide spread belief persists that such activities are a result of the permissive 1960s and the changing face of the traditional nuclear family Roger Hopkins Burke challenges these preconceptions and offers a detailed and comprehensive introduction to youth crime and the subsequent response from the criminal justice system This extended and fully updated new edition explores The development of young people and attempts to educate discipline control and construct them Criminological explanations and empirical evidence of why young people become involved in criminality The system established by the Youth Justice Board its theoretical foundations and the extent of its success Alternative approaches to youth justice around the globe and the apparent homogenisation throughout the neoliberal world The second edition also includes new chapters looking at youth justice in the wider context of social policy and comparative youth justice Young People Crime and Justice is the perfect undergraduate critical introduction to the youth justice system following a unique left realist perspective while providing a balanced account of the critical criminology agenda locating the practical working of the system in the critical socio economic context It is essential reading for students taking modules on youth crime youth justice and contemporary social and criminal justice policy Text features include key points chapter summaries and review questions *What's Left Now?* Andrew Hindmoor, 2018-01-26 Our sense of history shapes how we think about ourselves One of the distinguishing features of the left in Britain is that it holds to a remorselessly bleak and miserabilist view of our recent political history one in which Margaret Thatcher's election in 1979 marked the start of a still continuing fall from political grace made evident by the triumph of a free market get what you can neoliberal ideology dizzying levels of inequality social decay rampant

individualism state authoritarianism and political corruption The left does not like what has happened to us and it does not like what we have become Andrew Hindmoor argues that this history is wrong and self harming It is wrong because Britain has in many respects become a more politically attractive and progressive country over the last few decades It is self harming because this bleak history undermines faith in politics Post Brexit post Grenfell and post the 2010 2015 and 2017 general elections things may not right now look that great But looked at over the longer haul Britain is a long way from being a posterchild for neoliberalism Left wing ideas and arguments have shaped and continue to shape our politics *The Oxford Handbook of Modern British Political History, 1800-2000* David Brown, Robert Crawford, Gordon Pentland, 2018 The two centuries after 1800 witnessed a series of sweeping changes in the way in which Britain was governed the duties of the state and its role in the wider world Powerful processes from the development of democracy the changing nature of the social contract war and economic dislocation have challenged and at times threatened to overwhelm both governors and governed Such shifts have also presented challenges to the historians who have researched and written about Britain's past politics This Handbook shows the ways in which political historians have responded to these challenges providing a snapshot of a field which has long been at the forefront of conceptual and methodological innovation within historical studies It comprises thirty three thematic essays by leading and emerging scholars in the field Collectively these essays assess and rethink the nature of modern British political history itself and suggest avenues and questions for future research The Oxford Handbook of Modern British Political History thus provides a unique resource for those who wish to understand Britain's political past and a thought provoking long view for those interested in current political challenges

Crime Control and Community
Gordon Hughes, Adam Edwards, 2013-01-10 Community based crime control has become one of the principal policy responses to crime and disorder across western societies and is regarded now as one of the keys to successful crime prevention and reduction The aim of this book is to bring together findings from case studies of community based crime control in England as a means of examining the prospects for this approach its evolving relationship with criminal justice and social policies and to assess the lessons internationally that can be drawn from this in the theory research methods politics and practice of crime control At the same time the book advances an important new conceptual framework for understanding community based crime control focusing on an understanding of the diversity of control and preventative strategies the locally particular conditions in which they are conducted and the degree of choices open to local political actors involved in their conduct Understanding diversity in this way is central to drawing lessons about the transferability of crime control theory and practice from one social context to another avoiding the naive emulation of practices in different contexts
