Protecting The Homeland Insights From Army Wargame:

Protecting the Homeland. Insights from Army Wargames ,2002 The Army After Next AAN Project and more recently the Army Transformation Study Wargames and Analysis Project have identified issues relating to homeland security Over the course of five major wargames a counterterrorism workshop and a homeland security symposium U S Army Training and Doctrine Command TRADOC has brought together senior civilian and military personnel to wrestle with hard questions about emerging threats to the United States during the period 2015 to 2020 The initial insights about homeland security emerged unexpectedly Although the study of homeland security was not a primary area of interest for TRADOC all wargames and workshops were partially designed to examine specific research questions relating to this topic This report analyzes four wargames a counterterrorism workshop and a homeland security symposium all conducted between 1996 and 2000 in an effort to better understand and prepare for future warfare At the time the games were conducted there was a lack of clarity concerning both the future threats to the homeland and the evolving role of the Army in homeland security Indeed within the various agencies of the U S government there continues to be a lack of uniformity in definitions for such terms as homeland defense homeland security weapons of mass destruction crisis management consequence management combating terrorism counterterrorism and antiterrorism While some progress has been made on these fronts there remains a need to build a consensus within the U S government concerning all aspects of homeland security Part of this consensus must include the definition of key terms associated with this mission area Finally such a review must explicitly state the assumed limitations imposed by U S law and policy and how those differences might affect the decisionmaking process in the event of a declared war against an adversarial regime
