Radar Technology Encyclopedia David Knox Barton, Sergey A. Leonov, 1999 Here s the quick easy way to pinpoint the exact information you need from the 511 page Radar Technology Encyclopedia The CD ROM edition includes every page of the print edition explaining more than 5000 terms and concepts related to radar antenna and microwave technology Edited by two leading radar experts from the US and Russia the Encyclopedia includes descriptions and illustrations of all types of radar systems including information on Russian systems that was previously unavailable outside of that country

Radar Technology Encyclopedia David K. Barton, 1997-01 *Modern Radar Systems* Hamish Meikle, 2001 This one of a kind book features 536 illustrations drawn in Maple V that offer a greater understanding of various waveforms and other two and three dimensional functions to help you more accurately analyze radar system performance The effects of pulse shaping on transmitter stability and spectra are discussed a topic which is becoming more and more important in the age of electromagnetic compatibility The book addresses the importance of low attenuation and reflection between the main radio frequency blocks including the use of oversized waveguides for long runs

Doppler Radar Physiological Sensing Olga Boric-Lubecke, Victor M. Lubecke, Amy D. Droitcour, Byung-Kwon Park, Aditya Singh, 2015-12-15 Presents a comprehensive description of the theory and practical implementation of Doppler radar based physiological monitoring This book includes an overview of current physiological monitoring techniques and explains the fundamental technology used in remote non contact monitoring methods Basic radio wave propagation and radar principles are introduced along with the fundamentals of physiological motion and measurement Specific design and implementation considerations for physiological monitoring radar systems are then discussed in detail The authors address current research and commercial development of Doppler radar based physiological monitoring for healthcare and other applications Explains pros and cons of different Doppler radar architectures including CW FMCW and pulsed Doppler radar Discusses nonlinear demodulation methods explaining dc offset dc information center tracking and demodulation enabled by dc cancellation Reviews advanced system architectures that address issues of dc offset spectrum folding motion interference and range resolution Covers Doppler radar physiological measurements demonstrated to date from basic cardiopulmonary rate extractions to more involved volume assessments Doppler Radar Physiological Sensing serves as a fundamental reference for radar biomedical and microwave engineers as well as healthcare professionals interested in remote physiological monitoring methods

Radar System Analysis and Modeling David K. Barton, 2004-10-01 A thorough update to the Artech House classic *Modern Radar Systems Analysis* this reference is a comprehensive and cohesive introduction to radar systems design and performance estimation It offers you the knowledge you need to specify evaluate or apply radar technology in civilian or military systems The book presents accurate detection range equations that let you realistically estimate radar performance in a variety of practical situations With its clear easy to understand language you quickly learn the tradeoffs between choice of wavelength and radar performance and

see the inherent advantages and limitations associated with each radar band You find modeling procedures to help you analyze enemy systems or evaluate radar integrated into new weapon systems The book covers ECM and ECCM for both surveillance and tracking to help you estimate the effects of active and passive ECM select hardware software for reconnaissance or jamming and plan the operation of EW systems As radar systems evolve this book provides the equations needed to calculate and evaluate the performance of the latest advances in radar technology **Environmental**

Perception Technology for Unmanned Systems Xin Bi,2020-09-30 This book focuses on the principles and technology of environmental perception in unmanned systems With the rapid development of a new generation of information technologies such as automatic control and information perception a new generation of robots and unmanned systems will also take on new importance This book first reviews the development of autonomous systems and subsequently introduces readers to the technical characteristics and main technologies of the sensor Lastly it addresses aspects including autonomous path planning intelligent perception and autonomous control technology under uncertain conditions For the first time the book systematically introduces the core technology of autonomous system information perception **Guide to Information**

Sources in Engineering Charles Lord,2000-08-15 The only source that focuses exclusively on engineering and technology this important guide maps the dynamic and changing field of information sources published for engineers in recent years Lord highlights basic perspectives access tools and English language resources directories encyclopedias yearbooks dictionaries databases indexes libraries buyer s guides Internet resources and more Substantial emphasis is placed on digital resources The author also discusses how engineers and scientists use information the culture and generation of scientific information different types of engineering information and the tools and resources you need to locate and access that material Other sections describe regulations standards and specifications government resources professional and trade associations and education and career resources Engineers scientists librarians and other information professionals working with engineering and technology information will welcome this research **Modern Radar System Analysis** David Knox

Barton,1988 This book presents the basic principles analyses design formulas and characteristics of various fin line configurations You ll find summaries of hundreds of rigorous formulas as well as approximate closed form expressions which can be readily programmed to generate design data for any structure Discover millimeter wave integrated circuits and components realized using the various fin line techniques presented in the text including directional couplers power dividers attenuators detectors modulators and oscillators An Artech House bestseller **Spacecraft Collision Avoidance Technology**

Zhang Rongzhi,Yang Kaizhong,2020-03-04 Spacecraft Collision Avoidance Technology presents the theory and practice of space collision avoidance The title gives models of time and space environment their impact on high precision orbit prediction considers optimal orbit determination methods and models in different warning stages and establishes basic models for warning and avoidance Chapters present an outline of spacecraft collision warning strategy elaborate on the

basics of orbital calculation for collision avoidance consider space object detection technology detail space environment and object orbit give a method for spacecraft collision warning orbit calculation and finally demonstrate a strategy for spacecraft collision warning and avoidance **Britannica Student Encyclopedia (A-Z Set)** Encyclopaedia Britannica, Inc,2012-01-01
Entertaining and informative the newly updated Britannica Student Encyclopedia helps children gain a better understanding of their world Updated for 2012 more than 2 250 captivating articles cover everything from Barack Obama to video games Children are sure to immerse themselves in 2 700 photos charts and tables that help explain concepts and subjects as well as 1 200 maps and flags from across the globe Britannica Student is curriculum correlated and a recent winner of the 2008 Teachers Choice Award and 2010 AEP Distinguished achievement award
