Radical Center The Future Of American Politics:

The Radical Center Ted Halstead, Michael Lind, 2002-10-08 Record numbers of Americans describe themselves as independents and reject the conventional agendas of Left and Right In this widely acclaimed book Ted Halstead and Michael Lind explain why today's ideologies and institutions are so ill suited to the Information Age and offer a groundbreaking blueprint for updating all sectors of America society Taking on partisans and experts on both sides of the political divide they propose far reaching reforms for the way we provide health and retirement security collect taxes organize elections enforce civil rights and educate our children Twice before the United States has dramatically reconfigured itself shifting from an agrarian to an industrial society after the Civil War and successfully adapting to the massive technological and demographic changes of the early twentieth century during the New Deal era Uniting a sweeping historical vision with bold policy proposals The Radical Center shows us how to reinvent our nation once again so that all Americans can reap the benefits of the Information Age

America's Second Civil War Stanley A. Renshon, 2017-12-02 America has always taken a coherent national identity for granted In recent decades that assumption has been challenged Individual and group rights have expanded eliciting acerbic debate about the legitimacy and limits of claims National political leaders have preferred to finesse rather engage these controversies At the same time large numbers of new immigrants have dramatically made the United States more racially ethnically and culturally diverse As a result this country faces critical political and cultural questions What does it mean to be an American What if anything binds our country and citizens together Is a new American identity developing and if so what is it Can political leaders help us answer these questions For the second time in the history of the United States another civil war looms The new danger lies in conflicts among people of different racial cultural and ethnic heritages and between those who view themselves as culturally politically and economically disadvantaged versus those whom they see as privileged Unlike the first Civil War the antagonists cannot take refuge in their family or their religious social cultural or political organizations These are the precisely the places where the war is being fought At issue is whether it is possible or desirable to preserve the strengths of a common heritage Some quarters insist that our past has resulted in a culture only worth tearing down to build over rather than one worth keeping and building upon We are in conflict over the viability of American culture and identity itself This volume is organized into a series of intellectually grounded but provocative chapters on political leadership the 2000 presidential campaign Immigration affirmative action and other contemporary social and political issues Renshon uses the perspective of political psychology to help us to see old issues in new ways and new issues in different ways His critical questi

The Future of American Democracy Glen Browder, 2002 Former congressman Browder is worried that the current trends of American democracy might result in a Union of Socialist States of America or worse He suggests that we're suffering from a cumulative distemper in which we may be tiring of America's historic Great Experiment He offers vague prescriptions about embarking on a National Democratic

Inventing the "American Way" Wendy L. Wall, 2009-09-03 In the wake of World War II Americans developed an unusually deep and all encompassing national unity as postwar affluence and the Cold War combined to naturally produce a remarkable level of agreement about the nation's core values Or so the story has long been told Inventing the American Way challenges this vision of inevitable consensus Americans as Wendy Wall argues in this innovative book were united not so much by identical beliefs as by a shared conviction that a distinctive American Way existed and that the affirmation of such common ground was essential to the future of the nation Moreover the roots of consensus politics lie not in the Cold War era but in the turbulent decade that preceded U S entry into World War II The social and economic chaos of the Depression years alarmed a diverse array of groups as did the rise of two alien ideologies fascism and communism In this context Americans of divergent backgrounds and beliefs seized on the notion of a unifying American Way and sought to convince their fellow citizens of its merits Wall traces the competing efforts of business groups politicians leftist intellectuals interfaith proponents civil rights activists and many others over nearly three decades to shape public understandings of the American Way Along the way she explores the politics behind cultural productions ranging from The Adventures of Superman to the Freedom Train that circled the nation in the late 1940s She highlights the intense debate that erupted over the term democracy after World War II and identifies the origins of phrases such as free enterprise and the Judeo Christian tradition that remain central to American political life By uncovering the culture wars of the mid twentieth century this book sheds new light on a period that proved pivotal for American national identity and that remains the unspoken backdrop for debates over multiculturalism national unity and public values today [Encyclopedia of U.S. campaigns, elections, and electoral behavior](#)

Kenneth F. Warren, 2008-04-04 These approximately 450 articles explore all topics relevant to American political campaigns elections and electoral behaviour including some cross cultural comparisons to help place American trends in a global context [Autobiography of a Democratic Nation at Risk](#) JoVictoria Nicholson-Goodman, 2009 Reframing the curricular challenge educators face after a decade of school reform the books published in Peter Lang's Complicated Conversation series testify to the ethical demands of our time our place our profession In this resounding series of scholarly and pedagogical interventions into the nightmare that is the present we hear once again the sound of silence breaking supporting us to rearticulate our pedagogical convictions in this time of terrorism reframing curriculum as committed to the complicated conversation that is intercultural communication self understanding and global justice **Green in Gridlock** Paul Walden Hansen, 2013-09-01 Facing one of the most dangerous conservation crises in history acid rain lawmakers industry leaders and activists embraced an attitude of civil engagement that sought common ground and acceptance of compromise solutions on all sides As a result they achieved a spectacular outcome This approach was also at work when another planet threatening event ozone depletion was reversed In Green in Gridlock Paul Walden Hansen the former head of the Izaak Walton League

takes stock of what has been accomplished and what has been squandered in the many environmental contests in which he was involved during his forty year career as a conservationist In seeking to identify the strategies that worked and to pinpoint why progress on so many important issues never materialized Hansen realized that the most important predictor of success or failure was the willingness of opposing interests to find common ground and to compromise in order to attain mutually important goals Polling demonstrates that overwhelmingly Americans care about the environment but are less enthusiastic about environmentalists Accordingly Hansen issues a pointed critique for activism of the rather fight than win variety But he is also critical of conservative interests that oppose environmental legislation as a matter of principle while forgetting that a long string of cost effective environmental legislation from the Clean Air Act to the Wilderness Act was passed by overwhelming bipartisan margins and signed into law by Republican presidents in the 1970s Hansen makes a convincing case that thinking and acting ideologically rather than strategically is ultimately bad for the environment More than a simplistic call for civility or yet another admonition that we all work together this book offers practical lessons and a positive vision from a seasoned veteran on how to create support instead of opposition how to recognize natural allies and how to acknowledge common purpose in the name of progress To learn more about The Meadows Center for Water and the Environment sponsors of this book s series please click here **The Affirmative Action Puzzle** Melvin I.

Corbett, 2016-11-23 Drawing on a decade of research into the community that proposed the so called Ground Zero Mosque this book refutes the idea that current demands for Muslim moderation have primarily arisen in response to the events of 9 11 or to the violence often depicted in the media as unique to Muslims Instead it looks at a century of pressures on religious minorities to conform to dominant American frameworks for race gender and political economy These include the encouraging of community groups to provide social services to the dispossessed in compensation for the government s lack of welfare provisions in an aggressively capitalist environment Calls for Muslim moderation in particular are also colored by racist and orientalist stereotypes about the inherent pacifism of Sufis with respect to other groups The first investigation of the assumptions behind moderate Islam in our country Making Moderate Islam is also the first to look closely at the history lives and ambitions of the those involved in Manhattan s contested project for an Islamic community center
