Restructuring of Capitalism in Our Time William K. Tabb, 2012 Actions taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth. Once the markets stabilized, the United States enacted regulatory reforms that ultimately left basic economic structures unchanged. At the same time, the political class pursued austerity measures to curb the growing national debt. Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance, William K. Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform. Tabb follows the rise of banking practices and financial motives in America over the past thirty years and the simultaneous growth of a shadow industry of hedge funds, private equity firms, and financial innovations such as derivatives. He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization, then shows how these developments, perspectives, and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform. He incisively analyzes the damage that increasing unsustainable debt and excessive risk taking has done to our financial system and expands his critique to a discussion of world systems and globalization. Revealing the willful blind spots of mainstream finance theory, Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage, proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive, sustainable model for growth.

Rethinking Marxism David F. Ruccio, 2021-09-08 In this issue, class revolution is discovered in a perhaps unlikely context: the paid domestic labor of African American women. Analyzing the changing economic relationship between African American women and white households from the end of slavery to the late 1970s, Cecilia Rio uses the concepts of Marxian class analysis and a wealth of empirical evidence to demonstrate that African American women were historical agents of fundamental class transformation. Also in this edition: articles on Humanities, Surplus, Communism to Capitalism, Categories of Class Analysis, Contingent Commodification, s of Labor Power, and more.
