Radio and radar astronomy are powerful tools when studying the wonders of the universe yet they tend to mystify amateur
astronomers This book provides a comprehensive introduction to newcomers containing everything you need to start
observing at radio wavelengths Written by a mechanical engineer who has actually built and operated the tools described the
book contains a plethora of tested advice and practical resources This revised edition of the original 2014 book Getting
Started in Radio Astronomy provides a complete overview of the latest technology and research including the newest models
and equipment on the market as well as an entirely new section on radio astronomy with software defined radios SDRs Four
brand new beginner projects are included including bouncing a radar signal off the Moon detecting the aurora and tuning
into the downlink radio used by astronauts aboard the ISS Requiring no previous knowledge no scary mathematics and no
expensive equipment the book will serve as a fun and digestible reference for any level of astronomers hoping to expand their
skills into the radio spectrum **Ham Radio** ,1989 CQ ,1973 *Project Reports of the National Institute of Law*
