brilliantly reconstruct the web of ancient drama music religion painting and material culture in which it is enmeshed She shows for example that by stringing together images of horses stars and birds the poem evokes classical antiquity's beloved dance of the constellations Instrumental in shaping the structure of the lyric this dance symbolizes the cosmic order reflected in the order of the state which the chorus would have enacted in a ritual performance of the song With broad implications for archaeology art history and ancient science Ferrari's bold new analysis dramatically deepens our understanding of Greek poetry and the rich culture of archaic Sparta
