Rocket Dreams:

Rocket Dreams Marina Benjamin, 2003-05-25 In 1958 mankind's centuries long flirtation with space flight became a torrid love affair. For a decade tens of millions of people were enraptured first by the U S Soviet race to the moon and finally as America outstripped its rival by Project Apollo alone. It is now more than three decades since the last man walked on the moon more time than between the first moonwalk and the beginning of World War II. Apollo did not as had been promised by a generation of visionaries herald the beginning of the Space Age but its end. Or did it? Project Apollo like a cannonball reached its apogee and returned to earth but the trajectory of that return was complex. America's atmosphere its economic scientific and cultural atmosphere made for a very complicated reentry that produced many solutions to the trajectory problem. *Rocket Dreams* is about those solutions about the places where the space program landed. In *Rocket Dreams* an extraordinarily talented young writer named Marina Benjamin will take you on a journey to those landing sites. A visit with retired astronauts at a celebrity autograph show is a starting point down the divergent paths taken by the pioneers including Edgar Mitchell founder of the Church of Noetic Sciences. Roswell New Mexico is a landing site of a different order the magnetic north of UFO belief in the United States a belief that began its most dramatic growth precisely at the time that the path of the space program began its descent. In the vernacular the third law of motion states that what goes up must come down. Thus the tremendous motive force that energized the space program didn't just vanish it was conserved and transformed making bestsellers out of fantasy literature spawning Gaia and giving symbolism to the environmental movement. Everything from the pop cultural boom in ufology to the worldwide Search for Extra Terrestrial Intelligence SETI feeds on the energy given off by America's leap toward space. *Rocket Dreams* is an eloquent tour of this Apollo scarred landscape. It is also an introduction to some of the most fascinating characters imaginable. Some long dead like the crackpot visionary Alfred Lawson who saw in space flight a new stage of human evolution. Alti Man or Robert Goddard the father of rocketry whose workshop in Roswell stands only half a mile from shops selling posters of alien visitors. Others are very much alive like Stewart Brand creator of the Whole Earth Catalog and partner with Gerard O'Neill in the drive to build free floating space colonies and SETI astronomer Seth Shostak who has spent decades listening to the skies hoping for the first contact with another intelligent species. Perceptive original and wonderfully written informed by history science and an acute knowledge of popular culture. *Rocket Dreams* is a brilliant book by a remarkable talent. *Rocket Dreams* Christian Davenport, 2025-09-16 Musk versus Bezos China versus the United States The government versus the private sector Welcome to the rivalries and alliances defining the New Space Age. At stake Billions of dollars national prestige and a place in the history books. Moon landings and space walks once captivated the public's attention. But in recent decades the U S space enterprise has felt moribund. Now that's finally about to change. A fleet of powerful new rockets is poised to take humans into the cosmos more than ever before. A lunar land rush has sparked a geopolitical competition among nations. And the world's

two richest men have engaged in escalating brinkmanship as NASA and the U S government embraces Silicon Valley innovation to jump start the nation s ambitions Space has entered a golden age and this is just the beginning In this gripping work award winning Washington Post writer Christian Davenport chronicles the mad scramble to shape humanity s off planet future He takes readers behind the scenes at NASA and the Pentagon as China s aggressive moon mining plans raise alarms onto the sprawling Cape Canaveral factory where Blue Origin is working toward Amazon style lunar deliveries and onto SpaceX launch pads as Musk s engineers log 100 hour weeks leaving veteran astronauts marveling that they re now operating flying iPhones What will happen as human ambition outpaces governmental regulation Which country will win the race back to the moon Was Donald Trump s much derided creation of the Space Force a surprising act of foresight and will the U S finally make a real push to the moon and eventually toward Mars Masterfully paced rigorously reported and vividly told Rocket Dreams offers a riveting fly on the wall account of the grit fueled global battle to push humankind further into the cosmos revealing that the science fiction dreams of the last century may soon become our reality
