*Wernher Von Braun, Revised Edition* Ray Spangenburg,Diane Kit Moser,2009 Wernher von Braun Revised Edition examines the life and career of the famed rocket scientist who supervised the development of the powerful rockets used by Apollo astronauts to reach the moon Controversy surrounds von Braun s work in Germany duri      **Destined for the Stars** Catherine L. Newell,2019-06-05 Where did humanity get the idea that outer space is a frontier waiting to be explored Destined for the Stars unravels the popularization of the science of space exploration in America between 1944 and 1955 arguing that the success of the US space program was due not to technological or economic superiority but was sustained by a culture that had long believed it was called by God to settle new frontiers and prepare for the inevitable end of time and God s final judgment Religious forces Newell finds were in no small way responsible for the crescendo of support for and interest in space exploration in the early 1950s well before Project Mercury the United States first human spaceflight program began in 1959 In this remarkable history Newell explores the connection between the art of Chesley Bonestell the father of modern space art whose paintings drew inspiration from depictions of the American West and the popularity of that art in Cold War America Bonestell s working partnership with science writer and rocket expert Willy Ley and Ley and Bonestell s relationship with Wernher von Braun father of both the V 2 missile and the Saturn V rocket whose millennial conviction that God wanted humankind to leave Earth and explore other planets animated his life s work Together they inspired a technological and scientific faith that awoke a deep seated belief in a sense of divine destiny to reach the heavens The origins of their quest Newell concludes had less to do with the Cold War strife commonly associated with the space race and everything to do with the religious culture that contributed to the invention of space as the final frontier      *Public Health Service Publication* ,1958      *Astronautics* ,1957      **Air University Library Index to Military Periodicals** ,1968

**Air University Periodical Index** ,1958      **Air Corps News Letter** ,1959      [The Complete Book of Spaceflight](#) David Darling,2008-04-21 A commanding encyclopedia of the history and principles of spaceflight from earliest conceptions to faster than light galaxy hopping Here is the first truly comprehensive guide to space exploration and propulsion from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes Space buffs will delight in its in depth coverage of all key manned and unmanned missions and space vehicles past present and projected and its clear explanations of the technologies involved Over the course of more than 2 000 extensively cross referenced entries astronomer David Darling also provides fascinating insights into the cultural development of spaceflight In vivid accounts of the major characters and historical events involved he provides fascinating tales of early innovators the cross pollination that has long existed between science fiction and science fact and the sometimes obscure links between

underground couriers who brought them to England He helped Lise Meitner the Austrian Jewish scientist who first interpreted the German experiments on nuclear fission escape from Hitler's Reich He even visited concentration camps on errands of mercy None of this was done for money when he died Rosbaud left 500 or for fame the British Secret Service has kept his record closed but rather through compassion for humanity and a burning hatred of Nazism Among the plethora of intelligence related volumes to have appeared within the past decade Arnold Kramish's carefully researched and closely reasoned biography of Paul Rosbaud must be viewed as one of the most original and valuable Donal J Sexton The Journal of Military History Kramish has assiduously gathered details of Rosbaud's life and has delved into the murky world of Intelligence with considerable success He has discovered much about Rosbaud that I for one did not know even though I saw the most crucial of Rosbaud's reports that were successfully transmitted during the war and though I came to know him fairly well afterwards when he lived in London Kramish has performed a welcome service in ensuring a wider appreciation of those genuine and important contributions that Rosbaud so courageously made R V Jones Nature during World War II R V Jones was with the British Air Staff responsible for scientific intelligence Despite Kramish's careful research which included interviews with approximately 500 of those who knew Rosbaud it is an ironic tribute to this bookish spy's mastery of his trade that the Griffin remains a surprisingly shadowy figure one who continues to defy the effort to capture him Gregg Herken The Washington Post A fascinating tale of a pioneering breakthrough in technological espionage and also of sheer courage the events recounted still retain their underlying tension Rosbaud's story is a remarkable demonstration of human ingenuity and bravery and of the enduring values of the West under the most adverse conditions James Schlesinger former Secretary of Defense and former CIA Director One of the most interesting and important books on World War II published for years a story more thrilling than any thriller I have read for a long time Walter Laqueur author of World of Secrets The Uses and Limits of Intelligence This tour de force of a book reveals a hitherto secret chapter in the history of the resistance against Hitler telling for the first time how one strategically placed scientist in Germany with the help of a small number of Norwegian and German anti Nazis contributed substantially to British intelligence about Germany's fearful new weapons Arvid Brodersen leading figure in the Norwegian Resistance in World War II This book reads with the fascination of a good detective novel It will stimulate controversial discussion among all those who want to know something of the beginning of our nuclear age and among those few who helped bring it about General Gerd Schmckle panzer division officer on the Russian front during World War II later NATO deputy commander under General Alexander Haig The author has accomplished a mammoth task in knitting together material from 500 interviews and more than 100 archival sources and he has succeeded in creating an intricate and sometimes fascinating picture of intelligence activities inside Germany and the occupied countries during the war Peter Goodchild Los Angeles Times

*Dark Star* Matthew H. Hersch, 2023-12-26 A captivating history of NASA's Space Transportation System the space shuttle chronicling the inevitable failures of a doomed design In

Dark Star Matthew Hersch challenges the existing narrative of the most significant human space program of the last 50 years NASA's space shuttle He begins with the origins of the space shuttle a century long effort to develop a low cost reusable rocket powered airplane to militarize and commercialize space travel which Hersch explains was built the wrong way at the wrong time and for all the wrong reasons Describing the unique circumstances that led to the space shuttle's creation by President Richard Nixon's administration in 1972 and its subsequent flights from 1981 through 2011 Hersch illustrates how the space shuttle was doomed from the start While most historians have accepted the view that the space shuttle's fatal accidents including the 1986 Challenger explosion resulted from deficiencies in NASA's management culture that lulled engineers into a false confidence in the craft Dark Star reveals the widespread understanding that the shuttle was predestined for failure as a technology demonstrator The vehicle was intended only to give the United States the appearance of a viable human spaceflight program until funds became available to eliminate its obvious flaws Hersch's work seeks to answer the perilous questions of technological choice that confront every generation and it is a critical read for anyone interested in how we can create a better world through the things we build
