Monthly Catalog of United States Government Publications, 2004, 1998 *Monthly Catalogue, United States Public Documents*, 1970 [Air University Library Index to Military Periodicals](#) **Standard Catalog for Public Libraries** H.W. Wilson Company, 1996 Includes an abridged edition of 1908 catalog issued under title English prose fiction list of about 800 title [Videoconferencing Demystified](#) Steven Shepard, 2002 This text aims to provide everything necessary to successfully deploy video conferencing in a meeting training or conference environment Key features include benefits versus liabilities of video conferences purchasing renting using key components and equipment and key technologies streaming media web conferencing IP multicasting and LAN capacity [The Earth as a Distant Planet](#) M. Vázquez, E. Pallé, P. Montañés Rodríguez, 2010-03-12 In *The Earth as a Distant Planet* the authors become external observers of our solar system from a distance and try to determine how one can understand how Earth the third in distance to the central star is essentially unique and capable of sustaining life The knowledge gained from this original perspective is then applied to the search for other planets outside the solar system or exoplanets Since the discovery in 1992 of the first exoplanet the number of planet detections has increased exponentially and ambitious missions are already being planned for the future The exploration of Earth and the rest of the rocky planets are Rosetta stones in classifying and understanding the multiplicity of planetary systems that exist in our galaxy In time statistics on the formation and evolution of exoplanets will be available and will provide vital information for solving some of the unanswered questions about the formation as well as evolution of our own world and solar system Special attention is paid to the biosignatures signs of life detectable in the Earth's reflected spectra and the search for life in the universe The authors are experts on the subject of extrasolar planets They provide an introductory but also very much up to date text making this book suitable for researchers and for advanced students in astronomy and astrophysics **A Student's Guide to Education Studies** Stephen Ward, 2013-01-04 *A Student's Guide to Education Studies* is a much needed resource for any undergraduate making their first explorations into the fascinating world of education The first publication of this book in 2002 helped to define the nature of the subject introducing topics into the field which had not been previously considered This new edition brings the subject up to date with the latest thinking and research on policy globalisation learning and knowledge offering an accessible and wide ranging introduction to a diverse range of topics and issues in education Now fully updated to reflect rapid and significant changes in the field this third edition considers topical issues including the political dimension of education the national debate about schooling and poverty the marketisation of education the end of Every Child Matters the Coalition Government's policies for academies and free schools Organised around three enduring themes Education Policy and Politics Global and Environmental Education and Learning Knowledge and the Curriculum each chapter contains summary points questions for discussion and annotated suggestions for further reading With a distinctive international and global focus *A Student's Guide to Education Studies* is an

Nuclear India in the Twenty-First Century D. SarDesai, R.

Thomas, 2002-05-02 This collection of essays unlike other books on this subject emphasizes strategic technological and economic factors It includes contributions from a combination of academics and governmental experts from both the United States and India Nuclear India in the Twenty First Century provides an important picture of India's nuclear intentions and capabilities and should facilitate policies that the US may consider in response to regional and global proliferation

Scientific American, 1914 *Vertical Empire, A: The History Of The Uk Rocket And Space Programme, 1950-1971*

Charles N Hill, 2001-04-02 A Vertical Empire describes the work in rocketry and space research carried out in the UK in the 1950s and 1960s At one time the programme was as sophisticated as those in the US and Russia The projects were cancelled one by one as Britain's attempts to keep up militarily with the two superpowers weakened as a consequence of Treasury pressure and the belief that there was no economic future in space technology Much of the material in this invaluable book has never been available before due partly to the 30 Year Rule concerning government documents and partly to the sensitive military nature of the work The projects covered include rocket propelled aircraft large military missiles such as the medium range ballistic missile Blue Streak the test rocket Black Knight and the re entry experiments it carried and the satellite launcher Black Arrow In addition proposed projects that could have been developed from these vehicles are covered in depth There is also considerable political analysis of why these projects were eventually discontinued
