scholars as well as for the general reader      A History of Broadcasting in the United States Douglas Gomery, 2008-04-07  
This book surveys four key broadcasting periods from 1921 to 1996 and includes coverage of the recent impact of cable TV and home video. It presents new data from collections at the Library of Congress and the Library of American Broadcasting. Eschewing traditional coverage of FCC decisions and the physical nature of broadcasting, it considers issues of race, class, and gender while situating the industry firmly within the context of politics, society, and culture from cover      **Popular Culture and Law** Richard K. Sherwin, 2017-07-05  
What are the consequences when law's stories and images migrate from the courtroom to the court of public opinion and from movie, television, and computer screens back to electronic monitors inside the courtroom itself? What happens when lawyers and public relations experts market notorious legal cases and controversial policy issues as if they were just another commodity? What is the appropriate relationship between law and digital culture in virtual worlds on the Internet? In addressing these cutting-edge issues, the essays in this volume shed new light on the current status and future fate of law, truth, and justice in our time      **Popular-music Culture in America** Prince Dorrough, 1992  
Studies the history of popular music in this country. The text begins with an introduction to the foundations of music in colonial America and progresses through important and influential movements in our history from ragtime to rap and numerous topics in between. It looks at important artists and groups in each genre      Echo and Reverb Peter Doyle, 2024-08-06  
Winner of the Association for Recorded Sound Collections (ARSC) Award for Excellence in Historical Recorded Sound Research 2006. *Echo and Reverb* is the first history of acoustically imagined space in popular music recording. The book documents how acoustic effects, reverberation, room ambience, and echo have been used in recordings since the 1920s to create virtual sonic architectures and landscapes. Author Peter Doyle traces the development of these acoustically created worlds from the ancient Greek myth of Echo and Narcissus to the dramatic acoustic architectures of the medieval cathedral, the grand concert halls of the 19th century, and those created by the humble parlor phonograph of the early 20th century, and finally the revolutionary age of rock n' roll. Citing recordings ranging from Gene Austin's *My Blue Heaven* to Elvis Presley's *Mystery Train*, Doyle illustrates how non-musical sound constructs, with all their rich and contradictory baggage, became a central feature of recorded music. The book traces various imagined worlds created with synthetic echo and reverb: the heroic landscapes of the cowboy west, the twilight shores of South Sea islands, the uncanny alleys of dark cityscapes, the weird mindspaces of horror movies, the private and collective spaces of teen experience, and the funky juke joints of the mind      **Music in the 20th Century** Hao Huang, 1999  
Contains over 160 articles that provide information about some of the most significant musical developments and performers of the twentieth century, covering genres, forms, technical advances, national styles, and individuals arranged alphabetically from Abba to Genesis.
