theoretical perspectives including institutionalist economics radical economics Post Keynesian economics feminist economics ecological economics Marxist economics social economics and socioeconomics Because the book's structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook *Reintroducing Macroeconomics* provides readers with a running commentary on the standard approach while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems Although designed primarily as a companion volume for students in introductory economics courses the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach It will be of particular interest to students in related disciplines such as American Studies anthropology black studies environmental studies gender studies history political science and sociology who may be required to take introductory economics classes and who are interested in gaining an alternative perspective By demonstrating the vitality and common ground underlying a broad spectrum of heterodox approaches *Reintroducing Macroeconomics* brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways The text includes end of chapter study questions as well as a detailed note to instructors

The Pursuit of Ecotopia E. N. Anderson, 2010-01-22

The world environmental and social justice crises brought on by our high throughput global economy can be ameliorated only if we adapt the pragmatic ethics of social cohesion in traditional societies to the modern world Traditional societies have much to teach the modern world about conservation and environmental management *The Pursuit of Ecotopia: Lessons from Indigenous and Traditional Societies for the Human Ecology of Our Modern World* argues that the root of our environmental crisis is that we have not devised modern ways to induce people with diverse interests to think and act cooperatively to secure shared interests We take a short term narrow view of resource management and ethical conduct instead of a long term global view of ecotopia a conception in which the destructive corollaries of consumerism are curbed by emotionally grounded policies and ethics of sustainability social justice and stewardship In this controversial and brilliantly written book author E. N. Anderson maintains that the world can escape impending ecological disaster only by embracing a political and ethical transformation that will imbue modern societies with the same shared sense of emotional rationality practiced by traditional cultures He draws lessons from ecologically successful traditional societies and also draws cautionary tales from traditional societies that have responded maladaptively to disruption and failed ecologically as a result
