The Spiritual Rococo GauvinAlexander Bailey,2017-07-05 A groundbreaking approach to Rococo religious d r and spirituality in Europe and South America The Spiritual Rococo addresses three basic conundrums that impede our understanding of eighteenth century aesthetics and culture Why did the Rococo ostensibly the least spiritual style in the pre Modern canon transform into one of the world s most important modes for adorning sacred spaces And why is Rococo still treated as a decadent nemesis of the Enlightenment when the two had fundamental characteristics in common This book seeks to answer these questions by treating Rococo as a global phenomenon for the first time and by exploring its moral and spiritual dimensions through the lens of populist French religious literature of the day a body of work the author calls the Spiritual Rococo and which has never been applied directly to the arts The book traces Rococo s development from France through Central Europe Portugal Brazil and South America by following a chain of interlocking case studies whether artistic literary or ideological and it also considers the parallel diffusion of the literature of the Spiritual Rococo in these same regions placing particular emphasis on unpublished primary sources such as inventories One of the ultimate goals of this study is to move beyond the cliché of Rococo s frivolity and acknowledge its essential modernity Thoroughly

interdisciplinary The Spiritual Rococo not only integrates different art historical fields in novel ways but also interacts with church and social history literary and post colonial studies and anthropology opening up new horizons in these fields

Aesthetics & Alienation Gary Tedman,2012-06-29 A complete and original theory of aesthetics based on Marx and Althusser in the modernist Marxist anti humanist tradition Brecht Althusser Benjamin Adorno The main concepts that arise from this work are the aesthetic level of practice aesthetic state apparatuses aesthetic interpellation and pseudo dialectics all of which are used to understand the role of aesthetic experience and its place in everyday life In the space long thought as necessary to fill spanning the gap between Marx and Freud the author proposes that aesthetics can be located and defined in a concrete

way We are therefore looking at a domain involving and implicating feelings affections dispositions sensibilities and sensuality as well as their social role in art tradition ritual and taboo With the classic Marxist concepts of base and superstructure divided into levels economic ideological and political the aesthetic level of practice is the area that has traditionally been mostly either missing or mislocated and especially perhaps misrepresented for political reasons The importance of this level is that it fuels and supports the media or as Althusser described it the traffic or mediation between base and superstructure although for Althusser this was ideological traffic Here this is also defined as aesthetic From this vantage point we begin to be able to see aesthetic state apparatuses analyse how they function both in the past historically for example firstly in art history and today in the contemporary political context to grasp the role that art and feelings along with affective alienation plays in our culture as a complete and in fact cyclical reciprocating system Sceptres and Sciences in the Spains Ruth Hill,2000-10-01 Sceptres and Sciences argues convincingly that previous research on the Hispanic Late Baroque has underweighted the ideologies of ethnicity and empire embedded in Cartesianism and French neoclassicism **Learning to Look at Paintings** Mary Acton,1997 Mary Acton shows how you can learn to look at and understand an image by analysing how it works what its pictorial elements are and how they relate to each other She describes the ingredients of composition space form tone and colour which make up a picture and discusses the importance of subject matter and the original function and setting of a picture in appreciating its visual meanings
