**Aleksandr Rodchenko** Aglaya K. Glebova, 2022-01-01 Through the lens of Aleksandr Rodchenko's photography a new and provocative understanding emerges of the troubled relationship between technology modernism and state power in Stalin's Soviet Union Tracing the shifting meanings of photography in the early Soviet Union Aglaya K Glebova revises the relationship between art and politics during what is usually considered the end of the critical avant garde Aleksandr Rodchenko 1891 1956 was a highly versatile Russian artist and one of Constructivism's founders His photographic work between 1928 when Stalin rose to power and the late 1930s reveals a wide ranging search for a different pictorial language in the context of the extreme transformations carried out under the Five Year Plans In response to forced modernization Rodchenko's photography during this time questioned his own modernist commitments At the heart of this argument is Rodchenko's infamous 1933 photo essay on the White Sea Baltic Canal site of one of the first gulags Glebova's careful reading of Rodchenko's oeuvre yields a more diverse practice than has been generally acknowledged and brings to light new aspects of his work in adjacent media including the collaborative design work he undertook with Varvara Stepanova

**Aleksandr Rodchenko** Margarita Tupitsyn, Aleksandr Mikhaïlovich Rodchenko, 1998 City portraits were a favorite theme of avant garde photographers The booming industrial metropolises whose faces were to change radically within a few years called for a new vision and unaccustomed perspectives This is revealed in The New Moscow Aleksandr Rodchenko's view of the capital of the then still young Soviet Union whose dynamic awakening during the Socialist era inspired the avant garde artist to create this unusual project After being expelled from the October group in 1932 Rodchenko was commissioned to take pictures of Moscow Out of this series Varvara Stepanova his wife and colleague compiled a narrative sequence of eight nine gelatin silver prints adding to it some photographs from the October period The photos of street parades housing projects technical buildings new sport facilities and factories taken between the late twenties and early thirties were meant to appeal on two levels firstly for their new aesthetics the famous Rodchenko perspective and secondly for their film like sequencing The artist prepared the series for a 1933 edition which was never published Many of his high quality vintage prints were preserved however and are now published in a complete reconstruction of The New Moscow

**Photography and Failure** Kris Belden-Adams, 2020-08-06 Throughout photography's history failure has played an essential recurring part in the development and perceived value of this medium Exploring a range of failures individual and institutional technological and historiographical Photography and Failure asks what it means to fail and considers how this narrative of failure has shaped our understanding of photography From the trial and error beginnings of photochemistry to poor business decisions influenced by fickle public opinion and taste the founders and early practitioners of photography frequently faced bankruptcy and ignominy Alongside these individual failures this collection of essays examines the role of museums in rediscovering preserving and presenting photographs within institutions as well as technological limitations such as the problematic panoramic lens or the digital archival failures of Snapchat Moving beyond the physical photograph and these processes the book also investigates the limitations of photographs themselves as purveyors of truth time space documentary realism and social change whether these failures are used to effect or not Finally the book probes the historiographical failures affecting the discipline drawing on key debates such as the perceived over emphasis on European and American photography and the place of photography theory in contemporary art practice Blurring the boundaries between traditional binaries of art and non art photography

in this splendidly illustrated and exhaustive study of the complete range of his work Rodchenko's artistic production is considered against the complex background of the political social personal and artistic circumstances of the period from the beginning of his studies at the Art School of Kazan to his encounter with Mayakovsky and the Futurists from the famous Moscow Exhibitions where Rodchenko took part in the founding phase of abstract art to the arguments with Kandinsky over cultural supremacy with the Institute of Artistic Culture INCHUK and the definitive embracing of Constructivism Among the book's unusual contributions is the serious consideration given to Rodchenko's architectural projects and its generous treatment of unknown documents newspaper reports commentaries debates articles letters of the time These give a lively sense of what was actually happening in Moscow art circles during the crucial formative years of the avant garde movement The visual material is particularly stunning Five hundred illustrations many in full color are taken from Russian archives or from Rodchenko's private archive now owned by his nephew The author Selim Omarovich Khan Magomedov is a Soviet architectural historian and critic who has achieved an enviable record of championing the rehabilitation of modern Soviet architecture from the 1920s He almost single handedly launched the bold campaign in 1962 to revive the historical legacy of Soviet modernism Magomedov's studies of modern Soviet architecture institutions and personalities represent an impressive body of work in the face of formidable odds and official resistance and they are highly regarded in the West **Realism,**

**Rationalism, Surrealism** Fer, Francis Haskell, Briony Fer, David Batchelor, Paul Wood, 1993-01-01 This book begins by considering responses by French artists to the First World War showing how Purism Dada and early Surrealism are related to the ethos of post war reconstruction The authors then discuss the language of construction in places as dissimilar as France Germany and the Soviet Union the contrasting demands of the utility and decoration of objects and paintings and the relationship of surrealism to questions of sexuality and gender and to Freudian theory The book concludes by addressing the widespread debate over realism in art whether it represents an alternative to the elitism of the avant garde or whether avant garde art should play a role in the development of a modern realism The Big Archive Sven Spieker, 2017-03-03 The archive as a crucible of twentieth century modernism and key for understanding contemporary art The typewriter the card index and the filing cabinet these are technologies and modalities of the archive To the bureaucrat archives contain little more than garbage paperwork no longer needed to the historian on the other hand the archive's content stands as a quasi objective correlative of the living past Twentieth century art made use of the archive in a variety of ways from what Spieker calls Marcel Duchamp's anemic archive of readymades and El Lissitzky's Demonstration Rooms to the compilations of photographs made by such postwar artists as Susan Hiller and Gerhard Richter In The Big Archive Sven Spieker investigates the archive as both bureaucratic institution and index of evolving attitudes toward contingent time in science and art and finds it to be a crucible of twentieth century modernism Dadaists constructivists and Surrealists favored discontinuous nonlinear archives that resisted hermeneutic reading and ordered presentation Spieker argues that the use of archives by

such contemporary artists as Hiller Richter Hans Peter Feldmann Walid Raad and Boris Mikhailov responds to and continues this attack on the nineteenth century archive and its objectification of the historical process Spieker considers archivally driven art in relation to changing media technologies the typewriter the telephone the telegraph film And he connects the archive to a particularly modern visuality showing that the avant garde used the archive as something of a laboratory for experimental inquiries into the nature of vision and its relation to time The Big Archive offers us the first critical monograph on an overarching motif in twentieth century art
