## **Roe Deer Conservation Of A Native Species:**

The Roe Deer Richard Prior, 1995 The natural history of the roe deer throughout the world including the little known Asiatic roe Conservation topics focus on the impact of man on deer and on problems raised by over population and damage to forestry farming and gardens with advice on mitigating it European Ungulates and Their Management in the 21st Century Marco Apollonio, Reidar Andersen, Rory Putman, 2010-02-04 The first book to summarise management objectives for ungulates across Europe **Deer Veterinary Medicine** Aiden P. Foster, 2025-05-15 A guide to the care and treatment of deer for veterinary professionals Deer Veterinary Medicine is an essential reference for veterinary professionals preparing for deer encounters Rooted in extensive field experience the contributions from a range of authors provide details of common conditions across multiple deer species and the knowledge required by the veterinary professionals who deal with them The book considers the different contexts where deer are encountered including wild populations and deer held in captivity as farm park and zoo collections The chapters topics range from handling and sedating deer through to nutrition and postmortem examination and pathology They cover key body systems including the gut nervous ocular and respiratory systems and the skin Deer Veterinary Medicine readers will also find Detailed consideration of the use of sedation in deer providing analgesia and methods of euthanasia Coverage of species including red roe fallow water deer Reeves muntjac reindeer and white tailed deer Coverage of veterinary interventions for reproductive purposes Detailed consideration of the management of parasitic diseases Detailed consideration of notifiable including TB and CWD and zoonotic diseases including E coli and cryptosporidiosis A detailed drug formulary including where available evidence from published studies Edited by the past president of the British Deer Veterinary Association BDVA this book is a fitting successor to Management and Diseases of Deer A Handbook for Veterinary Surgeons last published in 1994 by the Veterinary Deer Society now the BDVA Synthesizing key contributions by a range of experts from Europe and the US the new Deer Veterinary Medicine is ideal for veterinarians veterinary surgeons and veterinary students as well as readers interested in the management of captive and wild deer **A New Approach to Conservation** Gill Aitken, 2018-01-18 Conservationists assume a set of underlying values which guide their decision making and action The safeguarding or promotion of biodiversity it is believed is the means by which nature is best protected This book examines and challenges these general conservation assumptions While reinforcing the need to halt extinction and value biodiversity it shows that biodiversity needs to be more clearly understood perhaps being replaced by the notion of wildness It examines how biodiversity is a holistic term and how individual species need to be assessed and their own contribution to wildness has to be recognized The book proposes a new way of conservation one which makes more room for neglected rather than endangered or rare species It also asserts that wildness is not incompatible with certain kinds of human intervention **Wildlife Conservation in Africa** S.S. Ajayi, 2019-05-29 Wildlife Conservation in Africa A Scientific Approach presents comprehensive management strategies for the consumptive and non

consumptive utilization of wildlife across Sub Saharan Africa It describes African economies that are currently dependent on wildlife resources and prescribes strategies for conserving biodiversity in both forests and animals in ecosystems across the continent The book covers the history and current status of how Africa s culture traditions healthcare and food sources are woven intricately around the local wildlife and resources It is a necessary resource for researchers and practitioners in wildlife and ecological conservation but is also useful for administrators and managers of protected areas

**Common Ground** Rob Cowen,2016-11-02 All too often we think of nature as something distinct from ourselves something to go and see a place that s separate from the ordinary modern world in which we live and work But if we take the time to look we soon find that s not how nature works Even in our parceled out paved over urban environs nature is all around us it is in us It is us That s what Rob Cowen discovered after moving to a new home in northern England After ten years in London he was suddenly adrift searching for a sense of connection He found himself drawn to a square mile patch of waste ground at the edge of town Scrappy weed filled this heart shaped tangle of land was the very definition of overlooked a thoroughly in between place that capitalism no longer had any use for leaving nature to take its course Wandering its meadows woods hedges and fields Cowen found it was also a magical mysterious place haunted and haunting abandoned but wildly alive and he fell in fascinated love Common Ground is a true account of that place and Cowen s transformative journey through its layers and lives but it s much more too As the land s stories intertwine with events in his own life and he learns he is to become a father for the first time the divisions between human and nature begin to blur and shift The place turns out to be a mirror revealing what we are what we re not and how those two things are ultimately inseparable This is a book about discovering a new world a forgotten world on the fringes of our daily lives and the richness that comes from uncovering the stories and lives animal and human contained within It is an unforgettable piece of nature writing part of a brilliant tradition that stretches from Gilbert White to Robert Macfarlane and Helen Macdonald I am dreaming of the edge land again Cowen writes Read Common Ground and you too will be dreaming of the spaces in between and what including us thrives there

Ungulate Management in Europe Rory Putman,Marco

Apollonio,Reidar Andersen,2011-04-28 This book considers a number of problems posed by ungulates and their management in Europe Through a synthesis of the underlying biology and a comparison of the management techniques adopted in different countries the book explores which management approaches seem effective and in which circumstances Experts in a number of different areas of applied wildlife biology review various management problems and alternative solutions including

the impact of large ungulates on agriculture forestry and conservation habitats the impact of disease and predation on ungulate populations and the involvement of ungulates in road traffic accidents and possible measures for mitigation This book is directed at practising wildlife managers those involved in research to improve methods of wildlife management and policy makers in local regional and national administrations The Glasgow Naturalist, 2002 Includes the Transactions and proceedings of the Society 1909 55 called third series 1909 30 What Works in Conservation 2021 William J. Sutherland, Lynn V. Dicks, Silviu O. Petrovan, Rebecca K. Smith, 2021-08-02 Does the creation of artificial reefs benefit subtidal benthic invertebrates Is the use of organic farming instead of conventional farming beneficial to bat conservation Does installing wildlife warning reflectors along roads benefit mammal conservation Does the installation of exclusion and or escape devices on fishing nets benefit marine and freshwater mammal conservation What Works in Conservation has been created to provide practitioners with answers to these and many other questions about practical conservation This book provides an assessment of the effectiveness of 2526 conservation interventions based on summarized scientific evidence The 2021 edition contains substantial new material on bat conservation terrestrial mammal conservation and marine and freshwater mammals thus completing the evidence for all mammal species categories Other chapters cover practical global conservation of primates amphibians bats birds forests peatlands subtidal benthic invertebrates shrublands and heathlands as well as the conservation of European farmland biodiversity and some aspects of enhancing natural pest control enhancing soil fertility management of captive animals and control of freshwater invasive species It contains key results from the summarized evidence for each conservation intervention and an assessment of the effectiveness of each by international expert panels The accompanying website [www.conservationevidence.com](http://www.conservationevidence.com) describes each of the studies individually and provides full references This is the sixth author approved edition of What Works in Conservation which is revised on an annual basis *Environmental science : understanding, protecting, and managing the environment in the Baltic Sea region* Lars Rydén, Pawel Migula, Magnus Andersson, 2003 **Biological Invasions** David Pimentel PhD, 2011-05-23 The impact of invasive species is second only to that of human population growth and associated activities as a cause of the loss of biodiversity throughout the world In the United States invasions of nonnative plants animals or microbes cause major environmental damage The second edition of Biological Invasions Economic and Environmental Costs **Deer of Britain and Ireland** Peter Carne, 2000 An account of the history and distribution of deer in Britain and Ireland It describes the various species found in the wild and examines the environmental impact of their rising numbers management trends and problems arising from them The author is a contributor to Stalking Magazine **Invasive and Introduced Plants and Animals** Ian D. Rotherham, Robert A. Lambert, 2012-12-06 There have been many well publicized cases of invasive species of plants and animals often introduced unintentionally but sometimes on purpose causing widespread ecological havoc Examples of such alien invasions include pernicious weeds such as Japanese knotweed an introduced garden ornamental which can grow

through concrete the water hyacinth which has choked tropical waterways and many introduced animals which have out competed and displaced local fauna This book addresses the broader context of invasive and exotic species in terms of the perceived threats and environmental concerns which surround alien species and ecological invasions As a result of unprecedented scales of environmental change combined with rapid globalisation the mixing of cultures and diversity and fears over biosecurity and bioterrorism the known impacts of particular invasions have been catastrophic However as several chapters show reactions to some exotic species and the justifications for interventions in certain situations including biological control by introduced natural enemies rest uncomfortably with social reactions to ethnic cleansing and persecution perpetrated across the globe The role of democracy in deciding and determining environmental policy is another emerging issue In an increasingly multicultural society this raises huge questions of ethics and choice At the same time in order to redress major ecological losses the science of reintroduction of native species has also come to the fore and is widely accepted by many in nature conservation However with questions of where and when and with what species or even species analogues reintroductions are acceptable the topic is hotly debated Again it is shown that many decisions are based on values and perceptions rather than objective science Including a wide range of case studies from around the world his book raises critical issues to stimulate a much wider debate
