Rogue States And Nuclear Outlaws Americas Search For A New Foreign Policy:

Rogue States and Nuclear Outlaws Michael T. Klare, 1995 In this incisive examination of our national security policy Michael Klare suggests that the Pentagon in effect established a new class of enemies when the Cold War came to an unpredictable and hostile states in Asia Africa and Latin America Klare argues that the containment of these rising Third World powers Iraq Iran Libya and North Korea especially became the centerpiece of American military policy and the justification for near Cold War levels of military spending Rogue States as Norm Entrepreneurs Carmen Wunderlich, 2019-10-11 This book investigates whether so called rogue states assumed antagonists of a Western liberal world order could also act as norm entrepreneurs by championing the genesis and evolution of global norms The author explores this issue by analyzing the arms control policies of the Islamic Republic of Iran A comparison with the prototypical norm entrepreneur Sweden and the Democratic People's Republic of North Korea a notorious norm breaker reveals interesting insights for norm research Apparently norm entrepreneurship manifests itself in different degrees and phases of the norm life cycle The finding that Iran indeed acts as a norm entrepreneur in some cases also sheds light on those factors that might account for the success or failure of norm advocacy Lastly the book offers a new perspective on rogue states by not only regarding them as irrational antagonists of the current world order but also as legitimate participants in a discourse on what the ruling order should look like This book will appeal to scholars interested in critical norm research in international relations This book offers cutting edge norm research highlighting how norm breakers can function as norm makers Maria Rost Rublee Associate Professor of International Relations Monash University Australia So called rogue states are typically understood as norm breakers but Carmen Wunderlich makes a persuasive conceptual case backed by empirical research that we need to consider the extent to which they are in fact norm entrepreneurs in their own right In an era characterized by much concern over the status of liberal norms this is a very timely study Richard Price Department of Political Science The University of British Columbia Canada At a time when the world order is under pressure this cutting edge analysis of how dissatisfied states challenge existing global norms illuminates a topic crucial to understanding contemporary international relations Nina Tannenwald Director Watson Institute for International and Public Affairs Brown University Rhode Island USA

Specters of World Literature Mattar Karim Mattar,2020-04-02 At the heart of this book is a spectral theory of

world literature that draws on Edward Said Aamir Mufti Jacques Derrida and world systems theory to assess how the field produces local literature as an e other that haunts its universalising assimilative imperative with the force of the uncanny It takes the Middle Eastern novel as both metonym and metaphor of a spectral world literature It explores the worlding of novels from the Middle East in recent years and focusing on the pivotal sites of Middle Eastern modernity Egypt Turkey Iran argues that lost to their global production circulation and reception is their constitution in the logic of spectrality With the intention of redressing this imbalance it critically restores their engagements with the others of Middle Eastern modernity and shows through a new reading of the Middle Eastern novel that world literature is always already haunted by its others the ghosts of modernity *Strategic Thinking, Deterrence and the US Ballistic Missile Defense Project* Reuben

Steff,2016-04-01 A systematic critical survey of American strategic thinking and the strategic culture in which it is formed In particular this book seeks to interrogate the theory and strategy of nuclear deterrence and its relationship to the concept of missile defence Drawing widely on the theoretical literature in international relations and strategic studies it identifies the key groups that have competed over America s nuclear policy post 1945 and examines how the concept of missile defence went through a process of gestation and intellectual contestation leading to its eventual legitimization in the late 1990s Steff sheds light on the individuals groups institutions and processes that led to the decision by the Bush administration to deploy a national missile defence shield Additionally Steff systematically examines the impact deployment had on the calculations of Russia and China In the process he explains that their reactions under the Bush administration have continued into the Obama era revealing that a new great power security dilemma has broken out This Steff shows has led to a decline in great power relations as a consequence Re-envisioning Peacekeeping François Debrix,1999 Time and again the United Nations has deployed peacekeeping missions in trouble spots around the globe Iraq Somalia Bosnia Rwanda Has peace ensured Have these missions in fact made any difference in the disorder and destruction they are purported to forestall Or are they as Francois Debrix contends an illusion more virtual peacekeeping than actual interventions in international affairs Re-envisioning Peacekeeping is a critical revisiting of UN interventions Addressing the question How do UN peacekeeping missions shape the contemporary vision of international affairs the book applies the notions of simulation and ideology to the practice and theory of international organization Debrix focuses on the media strategies that give UN missions the appearance of effectiveness and that promote liberal ideologies of governance Debrix shows how the UN missions in Iraq Somalia and Bosnia attempted to simulate a landscape of ordered international politics a New World Order by disseminating visual renditions of peaceful intervention and humanitarian assistance As a result of these sometimes elaborate efforts Debrix finds the UN peacekeeping missions of the past decade represent a study in visual simulation which has nothing to do with actual matters of international life in the 1990s **Thirty Years of China - U.S. Relations** Sujian Guo,Baogang

Guo,2010-08-04 The year 2009 marks the 30th anniversary of normalization of Sino U S relations Over the past 30 years the

bilateral relations have developed by twists and turns It is not until recent years that some stability and forward looking exchanges have returned to the central stage albeit tension grievances and mistrust continue to persist Washington has encouraged China to become a responsible stakeholder in the world affairs while China has urged the U S to work with China to build a harmonious world Both sides want to work together to solve their differences through dialogs and negotiations In the wake of the worldwide financial crisis of 2008 2009 China has contributed greatly in financing the crumbling U S financial market and lent a helping hand in stabilizing the world economy Nevertheless the foundation of the relationship remains very fragile and the long term prospect for a constructive cooperative relationship is still full of uncertainties For many Americans China s increasing global reach and growing political and economic influence constitute the greatest challenge to world dominance by the United States As a result some perceive China s rise as a threat to Americans core national interests The recent changes in the global geostrategic landscape and economic interdependence have suggested that some new ideas factors conditions and elements are shaping the relations between the two countries The task of Thirty Years of China U S Relations Analytical Approaches and Contemporary Issues is to explore these factors issues and challenges and their impact for the bilateral relations in the 21st century **Empire of Knowledge** Vinay Lal,2002-10-20

During the media frenzy over the Millennium celebrations there was hardly any mention of the fact that for the majority of the world there was no Millennium at all This linear understanding of time is a specifically Western and Christian concept This is just one of many examples that Vinay Lal uses to demonstrate that nearly every idea which we take for granted in the west is part of a politics of ideas Oppression is usually associated with class struggle and other forms of economic monopoly Lal looks beyond this deconstructing the cultural assumptions that have emerged alongside capitalism to offer a devastating critique of the politics of knowledge at the heart of all powerbroking Other topics examined are the concept of development which has provided a mandate for surreptitious colonisation and the idea of the nation state something we have lived with for no more than two centuries yet is accepted without question Linking this to the emergence of international governance through the United Nations the US and imperial economic bodies such as the IMF and WTO Lal explains how such universalism came to dominate the trajectory of Western thought The Uncertainty Doctrine Alexandra

Homolar,2023-09-14 The post Cold War era is often seen as a missed opportunity of epic proportions for the United States to turn swords into ploughshares with much of the blame placed on international developments The Uncertainty Doctrine challenges the conventional take on post Cold War history as imposed on the US by events largely outside its control It shows in rich empirical detail how America s peace dividend did not merely fall by the wayside but was actively undermined by the narrative contests over the security implications of the New World Order Committed to understanding the ontological significance of narrative in inter national security Alexandra Homolar demonstrates that political agents have the capacity to respond to a systemic shock through discursive adaptation and reorganization While narrative politics may not always matter

in US defense policy at moments perceived as bifurcation points it can be decisive in why some strategic responses prevail over possible alternatives

Perspectives on Structural Realism A. Hanami, 2003-11-28 Realism remains a predominant and most debated theoretical approach in International Relations research Whether considered a scientific and accurate reflection of world politics or as reactionary and a distortion of realities and possibilities both realism and its structural variant continue to be a source of fruitful research whether within the program or in its rejection The Realism approach itself is not uniform whether in relation to its implications or methodologies Here leading scholars provide important perspectives on the insights and directions of Realist research in some of its most interesting variants From rational choice to case studies from theory to practice the contributors explore both classic tenets of Realism as the balance of power and such apparent inconsistencies as foolish policies

Libya and the United States, Two Centuries of Strife Ronald Bruce St John, 2013-03-26 Diplomatic relations between the United States and Libya have rarely followed a smooth path Washington has repeatedly tried and failed to mediate lasting solutions to prevent recurrent crises and to secure its own national interests in a region of increasing importance to the United States Libya and the United States Two Centuries of Strife provides a unique and up to date analysis of U S Libyan relations assessing within the framework of conventional historical narrative the interaction of the governments and peoples of Libya and the United States over the past two centuries Drawing on a wide range of new and unfamiliar material Ronald Bruce St John an expert with over thirty years of experience in international relations charts the instances of ignorance misunderstanding treachery and suffering on both sides that have shaped and limited commercial and diplomatic intercourse St John argues that Cold War strategies resulted in a paradoxical and ambiguous U S policy toward Libya during the Idris regime of the 1960s strategies that contributed to the bankruptcy of that monarchy Following the Libyan revolution the U S wrongly believed Qaddafi would become an ally in support of U S policy to keep Soviet influence and communism out of the region his failure to do so marked the beginning of an era of political tension and mutual distrust Libya and the United States Two Centuries of Strife documents how long standing policy differences over the Palestinian issue and such terrorist acts as the destruction of the U S embassy in Tripoli and the Pan Am explosion over Lockerbie in 1988 resulted in a sharp deterioration of relations St John contends that the ensuing demonization of Libya and the U S policy of confrontation which has spanned successive administrations in Washington have ironically often not served American interests in the region but rather have facilitated Qaddafi s survival
