The Multinational Enterprise in Developing Countries Rick Molz, Catalin Ratiu, Ali Taleb, 2013-06-25 A key distinctive feature of Multinational Enterprises MNEs as organizations resides in the fact that they span across borders This exposes them to dissimilar and often unfamiliar social and economic conditions as they venture in foreign countries MNEs from industrialized economies that are active in developing countries and emerging markets face particularly challenging hurdles due to both economic and institutional discrepancies between their home and host countries This book focuses on the uneasy interaction between the traditional logics of developing countries and the economic logic of MNEs The traditional logics of most developing countries are built around community based legitimacy and an intuitive but concrete epistemology Conversely the economic logic of MNEs from developed economies is built around technical and economic legitimacy and an abstract intellectual epistemology Unpacking the uneasy interactions between these two logics will help achieve MNEs objectives of competitiveness in developing countries as well as globally The Montreal Local Global Research Group is a well recognized research group in formulating and researching local and global issues in strategic management from the perspective of integrating divergent dominant logics into the strategy conceptualization process and this will be the first

Peter Buckley,2014-01-02 Business History and International Business are cognate subjects There are few if any studies of international business that do not require a proper study of context International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision This often means putting it into its historical context The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods The best international business theory can illuminate the seemingly disparate strategies of firms in given historical circumstances and can provide an integrated overarching conceptual structure of the study of business history The research methods used in international business are also worthy of scrutiny by business historians The proposition of this book is that international business theory and method can complement business history This cross fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains This book was published as a special issue of Business History **The Conflicted Superpower** Andrew Kennedy,2018-05-22 For decades leadership in

nature of this resistance powerfully shapes just how open national policy is Kennedy concludes by asking whether U S policies are accelerating or slowing American decline and considering the prospects for U S policy making in years to come
