Engineering Field Notes, 1996 *Federal Policies to Foster Innovation and Improvement in Constructed Facilities* Federal Facilities Council, 1996 *In Our Own Backyard* National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Infrastructure, 1994-02-01 This volume takes a fresh look primarily from a technological perspective at the nation's infrastructure a collection of diverse modes that function as a system supporting a wide range of economic and social activities Within an infrastructure system operating and

maintenance procedures management practices and development policies i e the software must work together with the facilities hardware This study has a strongly local perspective drawing valuable information from workshops held in Phoenix Cincinnati and Boston These workshops illustrated common elements of local experience that offer infrastructure practitioners policymakers and the public at large both understanding and guidance in the form of specific strategies that can lead toward win win situations where parties with potentially opposing interests seek a way to resolve infrastructure issues so that all parties gain Local issues combined across many regions give infrastructure its strategic national significance The book recommends specific principles that should be applied in national policy to support effective local infrastructure development and management **Recent Library Additions** ,1992 Divided We Stand Eric Darton,2011-08-02 When the World Trade Towers in New York City were erected at the Hudson s edge they led the way to a real estate boom that was truly astonishing Divided We Stand reveals the coming together and eruption of four volatile elements super tall buildings financial speculation globalization and terrorism The Trade Center serves as a potent symbol of the disastrous consequences of undemocratic planning and development This book is a history of that skyscraping ambition and the impact it had on New York and international life It is a portrait of a building complex that lives at the convergence point of social and economic realities central not only to New York City but to all industrial cities and suburbs A meticulously researched historical account based on primary documents Divided We Stand is a contemporary indictment of the prevailing urban order in the spirit of Jane Jacobs s mid century classic The Death and Life of Great American Cities Effective Front-End Strategies to Reduce Waste on Construction Projects Peter G. Rundle,Alireza Bahadori,Ken Doust,2019-05-30 This volume outlines a progressively staged process focused on fostering a more effective more efficient and greener global construction industry The research based book commences with an evaluation of eight methodologies identified after a worldwide literature and compliance review It is followed by a more detailed report on four of these options with the ultimate objective of independent selection within the construction engineering community of a single most appropriate methodology as the approach for further more detailed investigation The eight methodologies were selected against six key performance indicators developed as assessment criteria and include knowledge management lean construction construction contract procurement practices optimal work duration on site construction site waste rationalization of construction safety regulations sustainable construction labor force and portfolio project development A primary outcome of the selected methodology being atriple bottom line benefit to key stakeholders commercially and also to the ecology along with the community at large Front end construction waste strategies to serve as best practices to minimize waste generated by construction projects was the methodology selected for detailed research The text also covers the primary sources of construction waste The book is ideal for civil and construction engineers as well as project developers managers and public sector waste management specialists The Role of the Public Sector in Building Social and Economic Resilience Alina Hyz,2024-11-15 This edited book provides

a comprehensive and integrated understanding of the public sector's role in building economic and social resilience. It focuses on how public finance and economic policy can best support countries' ability to absorb emerging shocks as well as adapt to evolving circumstances. The experiences of recent years including multiple fiscal crises and the global pandemic have shown that most economies are not prepared for rapidly changing conditions where uncertainty is a recurring theme. At the same time, social trust in public institutions has been eroding globally. Through a variety of perspectives such as the role of taxation, social safety nets, public sector employment, public budgeting and urban development, the book critically assesses existing weaknesses in the public sector and identifies solutions to foster resilience against future uncertainty. Against a political and economic context of increasing inequality and instability, the chapters demonstrate how public finance can help create the conditions for a stronger economy that supports economic stability and the labour market encourages infrastructure and innovation and promotes public health and environmental protection. This book is a fascinating read for academics in public finance, accounting, welfare economics and labour economics as well as professionals working in the spheres of public policy and governance.

Solving the Innovation Puzzle Harvey M. Bernstein, Andrew C. Lerner, 1996. A first-hand perspective of innovation in the design and construction industry, the book outlines the obstacles to bringing innovation ideas into practice, including the influence of government policies and private sector priorities. The authors not only describe the problems at hand but they also provide possible solutions to help expedite the transfer of infrastructure-related innovation into practice in order to assure an economically viable and competitive nation.

Journal of Green Building, 2006. Building Business-Government Relations Anna Ni, Montgomery Van Wart, 2015-08-20. This book introduces business-government relations in the institutional context of the United States from a practitioner's perspective. It provides the historical, descriptive and comparative accounts of the public and private sectors, the different roles government plays with business, including several conceptual models to understand the social interactions between the two sectors and various economic policies associated with business. Business-government relations are framed into three different social-economic contexts. The sociopolitical arena in which government's role as agent of business interest groups and government's limited role as social architect are introduced. The local economic development in which government acts as a promoter of partner with and buyer from business. The global market where government mainly plays a role as promoter of domestic business. In the course of discussion, a set of skills such as searching government jobs, starting a business, analyzing stakeholders, ethical reasoning, advancing a business agenda, leveraging public resources, contracting with government, interpreting global trends, doing business abroad and leveraging international resources are introduced and exercised.
