Role Of Purchasers And Payers In The Clinical Research Enterprise:

The Role of Purchasers and Payers in the Clinical Research Enterprise Institute of Medicine, Board on Health Sciences Policy, Clinical Research Roundtable, 2002-06-14 In a workshop organized by the Clinical Research roundtable representatives from purchaser organizations employers payer organizations health plans and insurance companies and other stakeholder organizations voluntary health associations clinical researchers research organizations and the technology community came together to explore What do purchasers and payers need from the Clinical Research Enterprise How have current efforts in clinical research met their needs What are purchasers payers and other stakeholders willing to contribute to the enterprise This book documents these discussions and summarizes what employers and insurers need from and are willing to contribute to clinical research from both a business and a national health care perspective and Payers in the Clinical Research Enterprise, 2002 Transforming Clinical Research in the United States Institute of Medicine, Board on Health Sciences Policy, Forum on Drug Discovery, Development, and Translation, 2010-11-22 An ideal health care system relies on efficiently generating timely accurate evidence to deliver on its promise of diminishing the divide between clinical practice and research There are growing indications however that the current health care system and the clinical research that guides medical decisions in the United States falls far short of this vision The process of generating medical evidence through clinical trials in the United States is expensive and lengthy includes a number of regulatory hurdles and is based on a limited infrastructure The link between clinical research and medical progress is also frequently misunderstood or unsupported by both patients and providers The focus of clinical research changes as diseases emerge and new treatments create cures for old conditions As diseases evolve the ultimate goal remains to speed new and improved medical treatments to patients throughout the world To keep pace with rapidly changing health care demands clinical research resources need to be organized and on hand to address the numerous health care questions that continually emerge Improving the overall capacity of the clinical research enterprise will depend on ensuring that there is an adequate infrastructure in place to support the investigators who conduct research the patients with real diseases who volunteer to participate in experimental research and the institutions that organize and carry out the trials To address these issues and better understand the current state of clinical research in the United States the Institute of Medicine's IOM Forum on Drug Discovery Development and Translation held a 2 day workshop entitled Transforming Clinical Research in the United States The workshop summarized in this volume laid the foundation for a broader initiative of the Forum addressing different aspects of clinical research Future Forum plans include further examining regulatory administrative and structural barriers to the effective conduct of clinical research developing a vision for a stable continuously funded clinical research infrastructure in the United States and considering strategies and collaborative activities to facilitate more robust public engagement in the clinical research enterprise Political and Economic Implications of Blockchain Technology in Business

and Healthcare Rodrigues, Dário de Oliveira, 2021-06-11 Besides love money and health are the most valuable human yearnings Therefore blockchain technology is paramount a new foundation of confidence for human valuable transactions Like information sharing was catalyzed on the pre blockchain internet transactions are now triggered on the new internet of value In this second digital inflection point economic media encompasses value beside information and individuals can privately transact digital assets for the first time in history Decentralized but structured organizations running on blockchain networks reduce transaction costs and are particularly competitive insofar as they guarantee data authenticity confidentiality and integrity providing functional autonomy with disintermediation and smart contracts Everything changed after user data were made public on the internet and privately traded by big tech companies and nothing will be the same once that data is made private on the internet and publicly transacted by their rightful owners While the internet of information reshaped the world the internet of value will reform it and everything will depend politically on this being done freely Political and Economic Implications of Blockchain Technology in Business and Healthcare provides relevant theoretical frameworks on the civilizational impact of blockchain technology which redesigns human interactions concerning value transactions It gives ideas concepts and instruments to advance the knowledge on cryptoeconomics and decentralized governance in the new distributed trust paradigm The chapters explore the ethical repercussions and profound political economic consequences to society providing insights into business applications focusing on the healthcare sector In a blockchain era affected by the post COVID 19 new normal which mixes politics economics and health this book is essential for students and researchers in social and life sciences professionals and policymakers working in the fields of public and business administration and healthcare workers and researchers academicians and students interested in blockchain technology and its political and economic impacts in the industry and society DNP Role Development for Doctoral Advanced Nursing Practice H.
