increasingly apparent that a new generation of historians has emerged. These scholars have become concerned with research sources and questions traditionally beyond the scope of the discipline of history. Indeed, recent monographs in history have demonstrated a growing awareness of the cultural imagination in analyses of patterns of change and continuity in the past. Such a movement has also encouraged the development of new networks between different disciplines in the Arts and Social Sciences. The authors of these chapters come from a wide range of academic backgrounds. While all are concerned with crucial issues of the past, they represent a substantial variety of disciplines. In addition to the historians are those trained and working in literary studies, art history, design, music, and science. As early career scholars, the research they present is cutting edge; these contributions represent the very latest trends in cultural studies and demonstrate the attempts of new researchers to answer the most current and challenging questions that are being proposed in this field.

The Place of Enchantment Alex Owen, 2006-12-15. By the end of the nineteenth century, Victorians were seeking rational explanations for the world in which they lived. The radical ideas of Charles Darwin had shaken traditional religious beliefs. Sigmund Freud was developing his innovative models of the conscious and unconscious mind. And anthropologist James George Frazer was subjecting magic, myth, and ritual to systematic inquiry. Why then, in this quintessentially modern moment, did late Victorian and Edwardian men and women become absorbed by metaphysical quests, heterodox spiritual encounters, and occult experimentation? In answering this question for the first time, *The Place of Enchantment* breaks new ground in its consideration of the role of occultism in British culture prior to World War I. Rescuing occultism from its status as an irrational indulgence and situating it at the center of British intellectual life, Owen argues that an involvement with the occult was a leitmotif of the intellectual avant-garde. Carefully placing a serious engagement with esotericism squarely alongside revolutionary understandings of rationality and consciousness, Owen demonstrates how a newly psychologized magic operated in conjunction with the developing patterns of modern life. She details such fascinating examples of occult practice as the sex magic of Aleister Crowley, the pharmacological experimentation of W. B. Yeats, and complex forms of astral clairvoyance as taught in secret and hierarchical magical societies like the Hermetic Order of the Golden Dawn. Through a remarkable blend of theoretical discussion and intellectual history, Owen has produced a work that moves far beyond a consideration of occultists and their world. Bearing directly on our understanding of modernity, her conclusions will force us to rethink the place of the irrational in modern culture. An intelligent, well-argued, and richly detailed work of cultural history that offers a substantial contribution to our understanding of Britain. Nick Freeman, *Washington Times*.
