Conley,2017-03-01 Jack Tar to Union Jack examines the intersection between empire navy and manhood in British society from 1870 to 1918 Through analysis of sources that include courts martial cases sailors own writings and the HMS Pinafore Conley charts new depictions of naval manhood during the Age of Empire a period which witnessed the radical transformation of the navy the intensification of imperial competition the democratisation of British society and the advent of mass culture Jack Tar to Union Jack argues that popular representations of naval men increasingly reflected and informed imperial masculine ideals in Victorian and Edwardian Britain Conley shows how the British Bluejacket as both patriotic defender and dutiful husband and father stood in sharp contrast to the stereotypic image of the brave but bawdy tar of the Georgian navy This book will be essential reading for students of British imperial history naval and military history and gender studies **Land Based Air Power or Aircraft Carriers?** Gjert Lage Dyndal,2016-04-22 During the 1960s in the

midst of its retreat from empire the British government had to grapple with complex political and military problems in order to find a strategic defence policy that was both credible and affordable Addressing what was perhaps the most contentious issue within those debates this book charts the arguments that raged between supporters of a land based air power strategy and those who favoured aircraft carriers Drawing upon a wealth of previously classified documents the book reveals how the Admiralty and Air Ministry became interlocked in a bitter political struggle over which of their military strategies could best meet Britain's future foreign policy challenges Whilst the broad story of this inter service rivalry is well known the Air Force's proposal for a series of island based airfields and the Navy championing of a small number of expensive but mobile aircraft carriers the complexity and previous lack of archival sources means that it has until now only ever been partially researched and understood Former studies have largely focused on the cancellation of the CVA 01 carrier programme and offered little depth as regards the Royal Air Force perspectives Given that this was a two Service rivalry which greatly influenced many aspects of British foreign and defence policy decisions of the period this book presents an important and balanced overview of the complex issues involved Through this historical study of the British debate about maritime air power and strategic alternatives in the 1960s the detailed arguments used for and against both alternatives demonstrate clear relevance to both historical and contemporary conceptual debates on carrier forces and land based air power Both from military strategy and inter service relationship perspectives contemporary Britain and many other nations with maritime forces may learn much from this historical case **Campbell's Illustrated History of the World's Columbian Exposition** James B. Campbell,1894

Britain and the Sea Glen O'Hara,2010-06-30 O'Hara presents the first general history of Britons relationship with the surrounding oceans from 1600 to the present day This all encompassing account covers individual seafarers ship borne

migration warfare and the maritime economy as well as the British people's maritime ideas and self-perception throughout the centuries

The Price of Victory, N. A. M. Rodger, 2024-10-24 The final instalment of N. A. M. Rodger's definitive authoritative trilogy on Britain's naval history. At the end of the French and Napoleonic wars, British sea power was at its apogee. But by 1840, as one contemporary commentator put it, the Admiralty was full of intellectuals becalmed in the smoke of Trafalgar. How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book, which refuses to accept standard assumptions and analyses. All the great actions are here, from Navarino in 1827, won by a daringly disobedient Admiral Codrington, to Jutland. D. Day, the Battle of the Atlantic, and the battles in the Pacific in 1944-45, in concert with the US Navy. The development and strategic

significance of submarine and navy air forces is superbly described as are the rapid evolution of ships from classic Nelsonic type to hybrid steam sail ships then armour clad and the fully armoured Dreadnoughts and beyond and weapons The social history of officers and men and sometimes women always a key part of the author s work is not neglected Rodger sets all this in the essential context of politics and geo strategy The character and importance of leading admirals Beatty Fisher Cunningham is assessed together with the roles of other less famous but no less consequential figures Based on a lifetime s learning it is the culmination of one of the most significant British historical works in recent decades Naval specialists will find much that is new here and will be invigorated by the originality of Rodger s judgements but everyone who is interested in the one of the central threads in British history will find it rewarding
