Revolutionary Contagion and International Politics Chad E. Nelson, 2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own polities and what are the international effects of this fear In *Revolutionary Contagion* Chad E Nelson develops and tests a theory that explains how states react to ideological driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion

Hersh The New Yorker Upon leaving the White House in 1961 President Eisenhower famously warned Americans about the dangers of a military industrial complex and was clearly worried about the destabilizing effects of a national economy based on outsized investments in military spending As more and more Americans fall into poverty and the global economy spirals downward the United States is spending more on the military than ever before What are the consequences and what can be done Melvin A Goodman a twenty four year veteran of the CIA brings peerless authority to his argument

that US military spending is indeed making Americans poorer and less secure while undermining our political standing in the world Drawing from his firsthand experience with war planners and intelligence strategists Goodman offers an insider s critique of the US military economy from President s Eisenhower s farewell warning to Barack Obama s expansion of the military s power He outlines a much needed vision for how to alter our military policy practices and spending in order to better position the United States globally and enhance prosperity and security at home Melvin A Goodman is the Director of the National Security Project at the Center for International Policy A former professor of international security at the National War College and an intelligence adviser to strategic disarmament talks in the 1970s he is the author of several books including the critically acclaimed *The Failure of Intelligence* **Reforming the Tsar's Army** David
