Runyan,1985 This first general survey of European naval and maritime history for theperiod from A D 300 to 1500 focuses on Western Europe including the Baltic NorthSea and Atlantic traditions and on the Mediterranean particularly Byzantine andMoslem naval history The authors survey a number of interconnected areas the useof seapower in international and intercultural relations commerce and trade routes naval technology and design military tactics the physical features of seafaring and the geography of the sea They make accessible to the general reader verytechnical scholarship and provide numerous maps and illustrations that explain thechanges in ship design and construction The overall result is a powerful historicalsynthesis which gives students teachers and general readers a feel for theseafaring life and the place of the sea within medieval civilization **Maritime History and Identity** Duncan Redford,2013 The sea and its relation to human life has always been a subject of fascination for historians For the first time this book looks at the field of Maritime History through the prism of identity looking at how the sea has influenced the formation of identity at a national local and individual level from the early modern age to the present It looks at a variety of people who interacted with the sea in different ways from merchant sailors to naval officers and on land from dockworkers to the civilians who participated in the sea based festivals in the Mediterranean port city of Messina A cultural strand runs through the volume with chapters focussing on the cultural construction of the naval hero in literature poetry music and art and an appraisal of the Japanese author and journalist It Masanori whose works had such a

profound influence on Japan's post World War II national identity. A key focus is the ways in which the Royal Navy influenced British identity at a national and regional level but other countries with a strong naval tradition such as Japan, Italy and Germany are also analysed. By bringing together a variety of themes related to identity, this book provides the first attempt to thoroughly analyse the ways in which maritime historians have engaged with the question of identity in recent years. In doing so, it provides an important and unique addition to the historiography which will be essential reading for all scholars of maritime and naval history and those concerned with the question of identity.
