East Asia, the West and International Security Robert O'Neill, 1987-06-18 The Culture of Defense Christopher D. Van Aller, 2001-01-01 Chris Van Aller demonstrates that a better understanding of the complicated civil military relationship in the United States is prerequisite to reforming the expensive and often inefficient military establishment maintained since World War II Arguing that reduced defense expenditures and adequate national security are both possible this book illustrates how American political culture remains deeply ambivalent about national security Though significant budget cuts have been implemented over the past five years Van Aller takes a closer look at the fact that no true reorganization or reconceptualization has taken place For policy makers historians of American military history and anyone who cares about this complex topic The Culture of Defense will be indispensable reading The Dangers of New Weapon Systems Trevor

Taylor, 1983-09-29 **New Technology and Western Security Policy** Robert O'Neill, 1985-06-18 *Prospects for Security in the Mediterranean* Robert O'Neill, 1988-06-18 A compilation of papers analyzing the issues affecting security in the Mediterranean area and their policy implications The Mediterranean is seen as a potential theatre for East West confrontation both on land and at sea as a key trade route and as an area of inter relationship conflicts **Quantitative**

Assessment in Arms Control Rudolf Avenhaus, 2012-12-06 This book originates in a series of contributions to the 1983 Systems Science Seminar at the Computer Science Department of the German Armed Forces University Munich Under the topic Quantitative Approaches to Arms Control that seminar attempted to review the present state of the art of systems analysis and numerate methods in arms control To this end the editors invited a number of experts from Europe the United States and Canada to share and discuss their views and assessments with the faculty and upper class computer science students of the university as well as numerous guests from the defence community and the interested public In three parts this book presents a selection of partly revised and somewhat extended versions of the seminar presentations followed in most cases by brief summaries of the transcripts of the respective discussions In addition to an introduction by the editors part I contains six papers on the present state and problems of arms control with emphasis on START Strategic Arms Reduction Talks INF Intermediate range Nuclear Forces negotiations and MBFR Mutually Balanced Force Reduction talks The

seven contributions to part II are devoted to mathematical models of arms competition and quantitative approaches to force balance assessment of both the static and dynamic variety Part III presents five papers which address technical and operational aspects and legal implications of arms control negotiations and verification

Military Development In Africa Bruce E. Arlinghaus, 2019-03-04 Increases in the number and improvements in the quality of arms transferred to sub-Saharan African nations clearly will affect those nations economic development and political stability both immediately and in the long term Problems of technology absorption manpower development and the diversion of financial and human resources occasioned by such transfers become more and more critical as the demand for military modernization by African governments grows and the industrial nations compete to meet the demand Dr Arlinghaus evaluates conflicting assessments of the costs and benefits of military development from the perspective that it would be best for African nations to allocate resources for defense on the basis of socioeconomic considerations as well as their military and political goals

Technology And Change In East-west Relations F. Stephen Larrabee, F Stephen Larrabee, 2019-07-11 This volume is based on a series of papers delivered at the conference by specialists from the United States and both Eastern and Western Europe It argues that arms control must shift its focus from quantities to qualities of weapons and attempt to constrain military technology

Security In Northeast Asia Stephen P Gibert, 2020-01-16 This book presents to the reader a comprehensive and integrated discussion of the Northeast Asian Western Pacific region and its relationships to United States and world security concerns and international political stability

Evolution of Nuclear Strategy Lawrence Freedman, 2016-01-03

The Evolution of Nuclear Strategy L. Freedman, 2003-07-18 First published twenty years ago Lawrence Freedman's *Evolution of Nuclear Strategy* was immediately acclaimed as the standard work on the history of attempts to cope militarily and politically with the terrible destructive power of nuclear weapons It has now been rewritten drawing on a wide range of new research and updated to take account of the period following the end of the cold war taking the story to contemporary arguments about missile defence

Europe in the Western Alliance Jonathan Alford, Kenneth Hunt, 2015-12-30 This analysis of the political and strategic dilemmas that Europeans now face makes a case for greater political and military cooperation and argues for the creation of a European defence identity that will not hinder improvements in East West relations nor loosen the ties with the US
