The Australian Mathematics Teacher, 1995

Social Class and Educational Inequality Iram Siraj, Aziza Mayo, 2014-06-05

Social class is often seen as an intractable barrier to success yet a number of children from disadvantaged backgrounds still manage to show resilience and succeed against the odds This book presents the findings from fifty Child and Family Case Studies CFCS conducted with 13 16 year olds The authors look specifically at the roles that people and experiences at home in schools and in the wider community have played in the learning life courses of these children how these factors have affected their achievement and explanations and meanings given by respondents to the unique characteristics experiences and events in their lives Featuring the voices of real parents and children and backed up by a decade of quantitative data this is a compelling record that will help readers to understand the complex nature of social disadvantage and the interplay between risk and protective factors in homes and schools that can make for a transformational educational experience

All-Attainment Teaching in Secondary Mathematics Colin Jackson, 2022-02-09 This book is about the promotion of all attainment teaching in the mathematics classroom The book contains the individual stories of six teachers working in three different schools an inner London comprehensive with a largely working class intake a comprehensive on the south coast and a rural comprehensive in Cambridgeshire Each story describes and explains in brief the background of the teacher and how each came to teach all attainment groups in mathematics The research reported in this book is the only close examination and analysis of the practices and methodologies of successful all attainment educators in the modern age Three major themes are identified and examined what sustains the teachers how they introduce develop and maintain all attainment teaching and how they make all attainment work in the classroom From an analysis of these findings the book presents two interrelated models of the knowledge and understandings the research has generated The first one is an overarching model of situation and horizon Used as a means of visualizing and understanding the current situation for teachers it can aid in encouraging change for the better The second model offers teachers a way to think of all attainment teaching as an enabler for all students most especially for disadvantaged students Both models have original and explanatory power and offer new ways of conceptualizing how mathematics teaching for social justice might be understood and implemented offering fresh perspectives and unique insights As such it will be of help to students at undergraduate Masters and doctoral level and to education researchers more widely

Motivating Your Secondary Class Maurice Galton, Susan Steward, Linda Hargreaves, Charlotte Page, Anthony Pell, 2009-08-24 Why do so many pupils in Years 7 8 and 9 switch off and make very little progress in the core subjects such as English and mathematics What can teachers and schools do to improve pupils attitudes and motivation Maurice Galton and his team have collected examples from various schools of what works in re energising demotivated pupils This book presents practical advice and strategies for improving lower secondary school classrooms ranging from reducing class size to innovative induction programmes emphasising the development of core study skills and developing effective procedures to train pupils to cooperate rather than confront each other during lessons Chapters cover Making a Good Start to Secondary Education Creating a Cooperative Classroom Climate Improving

Communication between Pupils and Teachers Why are some classrooms more successful How can school structures influence positive relationships The book is a much needed resource for all secondary teachers and is particularly useful for year and subject heads

Mathematics, Affect and Learning Peter Grootenboer, Margaret Marshman, 2015-10-17 This book examines the beliefs attitudes values and emotions of students in Years 5 to 8 aged 10 to 14 years about mathematics and mathematics education Fundamentally this book focuses on the development of affective views and responses towards mathematics and mathematics learning Furthermore it seems that students develop their more negative views of mathematics during the middle school years Years 5 to 8 and so here we concentrate on students in this critical period The book is based on a number of empirical studies including an enquiry undertaken with 45 children in Years 5 and 6 in one school a large scale quantitative study undertaken with students from a range of schools across diverse communities in New Zealand and two related small scale studies with junior secondary students in Australia This book brings substantial empirically based evidence to the widely held perception that many students have negative views of mathematics and these affective responses develop during the middle years of school The data for this book were collected with school students and students who were actually engaged in learning mathematics in their crucial middle school years The findings reported and discussed here are relevant for researchers and mathematics educators policy makers and curriculum developers and teachers and school principals engaged in the teaching of mathematics

Implementing Inclusive Education Richard Rieser, 2012 This revised and expanded second edition of *Implementing Inclusive Education* shows how Commonwealth countries are attempting to undertake inclusion in education and will encourage all those charged with ensuring education for all to make certain that disabled children are fully included in all aspects of the education system

The New York Teacher, and the American Educational Monthly, 1871

My School Lesley Scanlon, 2014-12-17 Education issues feature almost daily in print media online on the radio and on television much of which focuses on the perceived deficits of students and teachers Singled out for special attention are low socio economic status SES schools which are frequently characterised by teachers and students with little investment in learning and teaching Yet within this plethora of educational discussion there is no contemporary longitudinal study of what it means to learn and teach in a disadvantaged school within the policy context of the education revolution in Australia Drawing on 500 interviews conducted over a four period with the Principal parents teachers and students at a regional low SES school this book challenges the profile of one school as represented on the My School website which publishes the results of National Assessment Program in Literacy and Numeracy NAPLAN Chapters situate the original research within an international and national educational context before exploring topics including leadership and management student behaviour constructs of the good teacher the involvement of parents in school and the digital revolution The book closes with an appraisal of the major themes that emerged from the multiple perspectives of the study This is the first book to provide a longitudinal ethnographic study of a school in Australia which examines the impact of the education

revolution on the Principal parents teachers and students It comprehensively challenges the official My School representation of a low SES school and will appeal to researchers in education as well as those involved in postgraduate teacher education and sociology courses both from Australia and internationally
