**New Directions** Rolf Färe, Shawna Grosskopf, 2006-03-30 The format of this monograph is three essays which we arrived at after spending a year writing over one hundred pages of what we eventually realized was a tedious reworking of old material So we started over determined to write something new At first we thought this approach might not work as a coherent monograph which is why we chose the essay format rather than chapters As it turns out there is a common thread namely the directional distance function which also gave us our title As you shall see the directional distance function includes traditional distance functions and efficiency measures as special cases providing a unifying framework for existing productivity and efficiency measures It is also flexible enough to open up new areas in productivity and efficiency analysis such as environmental and aggregation issues That we did not see this earlier is humbling a student at a recent conference raised his hand and asked Why didn't you start with the directional distance function in the first place In deed This manuscript is intended to make up for our earlier oversights This monograph contains papers coauthored with Wen Fu Lee and Osman Zaim and one paper written by two former students Hiroyuki Fukuyama and Bill Weber We thank them for their contributions An other former student Jim Logan Logi read and critiqued the manuscript for which we are grateful *New Directions in the American Presidency* Lori Cox Han, 2017-10-06 Especially coming out of the landmark presidential elections of 2008 and 2016 the study of the American presidency both as a political institution and of those who have held the office is one of the most fascinating and dynamic fields of study within American government *New Directions in the American Presidency* takes a current look at the various issues facing the contemporary presidency and provides a state of the art overview of current trends in the field of presidency research This volume of original chapters by leading presidential scholars is designed to include all the essential topics covered in an undergraduate level presidency course or a graduate level seminar while also bringing together key disciplinary debates and treatment of important current real world developments Each chapter is written with students in mind so that it remains accessible interesting and engaging New to the Second Edition New key chapters on presidents and political parties and presidential leadership essential following the 2016 presidential election A fresh approach to the President and the Constitution and the President and domestic policymaking are provided by new authors for these foundational chapters All chapters have been revised with updates coming out the 2016 election especially in relation to presidential campaign politics media and the Supreme Court

probabilistic methods multi criteria decision making utility theory approximate reasoning human centric computing and many others Applications concerns a number of fields such as internet and semantic web social networks and trust control and robotics computer vision medicine and bioinformatics as well as finance security and e Commerce among others Dedicated to the 50th Anniversary of Fuzzy Logic and to the 95th Birthday Anniversary of Lotfi A Zadeh the book not only offers a timely view on the field yet it also discusses thought provoking developments and challenges thus fostering new research directions in the diverse areas of soft computing **New Directions in Applied Mathematics** P.J. Hilton,G.S. Young,2012-12-06 It is close enough to the end of the century to make a guess as to what the Encyclopedia Britannica article on the history of mathematics will report in 2582 We have said that the dominating theme of the Nineteenth Century was the development and application of the theory of functions of one variable At the beginning of the Twentieth Century mathematicians turned optimistically to the study off unctions of several variables But wholly unexpected difficulties were met new phenomena were discovered and new fields of mathematics sprung up to study and master them As a result except where development of methods from earlier centuries continued there was a recoil from applications Most of the best mathematicians of the first two thirds of the century devoted their efforts entirely to pure mathe matics In the last third however the powerful methods devised by then for higher dimensional problems were turned onto applications and the tools of applied mathematics were drastically changed By the end of the century the temporary overemphasis on pure mathematics was completely gone and the traditional interconnections between pure mathematics and applications restored This century also saw the first primitive beginnings of the electronic calculator whose development in the next century led to our modern methods of handling mathematics **New Directions in Soviet Literature** Sheelagh Duffin Graham,1992-12-13 This is a selection of papers on Russian literature of the Soviet period presented at the IVth World Congress for Soviet and East European Studies in 1990 The ten articles range from the experimental prose and drama of the 1920s to studies of work by younger writers of the 1980s The articles include analyses of works by individual writers and examinations of general phenomena for example village prose or the way Stalin is presented in literature of the glasnost era **Current Perspectives and New Directions in Mechanics, Modelling and Design of Structural Systems** Alphonse Zingoni,2022-09-05 Current Perspectives and New Directions in Mechanics Modelling and Design of Structural Systems comprises 330 papers that were presented at the Eighth International Conference on Structural Engineering Mechanics and Computation SEMC 2022 Cape Town South Africa 5 7 September 2022 The topics featured may be clustered into six broad categories that span the themes of mechanics modelling and engineering design i mechanics of materials elasticity plasticity porous media fracture fatigue damage delamination viscosity creep shrinkage etc ii mechanics of structures dynamics vibration seismic response soil structure interaction fluid structure interaction response to blast and impact response to fire structural stability buckling collapse behaviour iii numerical modelling and experimental testing numerical methods

simulation techniques multi scale modelling computational modelling laboratory testing field testing experimental measurements iv design in traditional engineering materials steel concrete steel concrete composite aluminium masonry timber v innovative concepts sustainable engineering and special structures nanostructures adaptive structures smart structures composite structures glass structures bio inspired structures shells membranes space structures lightweight structures etc vi the engineering process and life cycle considerations conceptualisation planning analysis design optimization construction assembly manufacture maintenance monitoring assessment repair strengthening retrofitting decommissioning Two versions of the papers are available full papers of length 6 pages are included in an e book while short papers of length 2 pages intended to be concise but self contained summaries of the full papers are in this printed book This work will be of interest to civil structural mechanical marine and aerospace engineers as well as planners and architects

**The Fallacies of Cold War Deterrence and a New Direction** Keith B. Payne, 2014-07-11 In 1938 Prime Minister Neville Chamberlain hoped that a policy of appeasement would satisfy Adolf Hitler s territorial appetite and structured British policy accordingly This plan was a failure chiefly because Hitler was not a statesman who would ultimately conform to familiar norms Chamberlain s policy was doomed because he had greatly misjudged Hitler s basic beliefs and thus his behavior U S Cold War nuclear deterrence policy was similarly based on the confident but questionable assumption that Soviet leaders would be rational by Washington

s standards they would behave reasonably when presented with nuclear threats The United States assumed that any sane challenger would be deterred from severe provocations because not to do so would be foolish Keith B Payne addresses the question of whether this line of reasoning is adequate for the post Cold War period By analyzing past situations and a plausible future scenario a U S Chinese crisis over Taiwan he proposes that American policymakers move away from the assumption that all our opponents are comfortably predictable by the standards of our own culture In order to avoid unexpected and possibly disastrous failures of deterrence he argues we should closely examine particular opponents culture and beliefs in order to better anticipate their likely responses to U S deterrence threats      **Explanation: New Directions in Philosophy** The Faculty in Philosophy,2012-12-06 This volume initiates a series of American University Publications in Philosophy It is expected that as occasion permits volumes will be added to the series contributing to the dialogue that is contemporary philosophy The essays in this volume were written by the faculty in philosophy at The American University during the academic year 1970 71 and appear here for the first time In a variety of modes the essays cluster around epistemological problems collateral with theories of explanation In view of recent attention to such theories this volume explores several new directions in the explanation of behavior language and religion We are especially appreciative of the secretarial assistance of Mrs Madaline Shoemaker whose magic turned many an unreadable manuscript into an intelligible essay We are also grateful to Miss Maria Wilhelm for the final typing of the volume and to the Office of the Dean for Graduate Studies The American University for encouragement and for a financial grant toward typing expenses Barry L Blose Harold A Durfee David F T Rodier Editorial Committee T ABLE OF CONTENTS Preface v CONTEMPORARY DIRECTIONS THE SPIRIT OF CoNTEMPORARY AMERICAN PHILosoPHY Roger T      **In Focus** National Clearinghouse for Alcohol Information,1977
