Directions Bruce J. Caldwell, Stephan Böhm, 2012-12-06 When we first invited the group of distinguished scholars represented here to contribute to a new volume on Austrian economics four themes were stressed tensions new directions selectivity and criticism In this brief introduction we will explain why those themes were emphasized and thereby shed light on our intentions and aspirations for the volume The subtitle Tensions and New Directions indicates clearly the intent of the volume desired If we take the 1871 publication of Carl Menger's Principles of Economics Grundsätze der Volkswirtschaftslehre as marking its birth the Austrian tradition is now well over one hundred years old The origins of the so called Austrian Revival are more difficult to pinpoint precisely but many would accept two decades as a reasonable estimate of its lifespan In any case since the mid 1970s several collections of articles written by Austrians have been published The intent of these collections appeared to be to educate persuade and inspire various audiences Uninformed readers needed to be told about the specifics of the Austrian position to be shown how it differed from and improved upon its rivals The initiated needed to be reassured that their commitment to a novel program was justified As such much of the recent Austrian literature has consisted either of exegetical accounts of the views of past figures or of critical assessments of the positions of alternative research programs in economics from an Austrian perspective *New Direction in Austrian Economics* Institute for Humane Studies, L. Technology and Socialist Construction Daniel E. Saros, 2014-05-09 The failure of command central planning in the twentieth century has led to a general disillusionment within the socialist movement worldwide Some alternatives to capitalism have been proposed since the end of the Cold War but none has offered an alternative form of economic calculation This book explains how modern information technology may be used to implement a new method of economic calculation that could bring an end to capitalism and make socialism possible In this book the author critically examines a number of socialist proposals that have been put forward since the end of the Cold War It is shown that although these proposals have many merits their inability effectively to incorporate the benefits of information technology into their models has limited their ability to solve the problem of socialist construction The final section of the book proposes an entirely new model of socialist development based on a needs profile that makes it possible to convert the needs of large numbers of people into data that can be used as a guide for resource allocation This analysis makes it possible to rethink and carefully specify the conditions necessary for the abolition of capital and consequently the requirements for socialist revolution and ultimately communist society Information Technology and Socialist Construction will be of interest to students and scholars

of political economy the history of economic thought labour economics and industrial economics Total Freedom Chris Matthew Sciabarra,2000-11-01 Building upon his previous books about Marx Hayek and Rand Total Freedom completes what Lingua Franca has called Sciabarra s epic scholarly quest to reclaim dialectics usually associated with the Marxian left as a methodology that can revivify libertarian thought Part One surveys the history of dialectics from the ancient Greeks through the Austrian school of economics Part Two investigates in detail the work of Murray Rothbard as a leading modern libertarian in whose thought Sciabarra finds both dialectical and nondialectical elements Ultimately Sciabarra aims for a dialectical libertarian synthesis highlighting the need not sufficiently recognized in liberalism to think of the totality of interconnections in a dynamic system as the way to ensure human freedom while avoiding totalitarianism such as resulted from Marxism **Friedrich A. Hayek** John Cunningham Wood,Robert D. Wood,2004 **The Austro-Libertarian Point of View** Alan G. Futerman,Walter E. Block,2021-11-01 This book covers several areas of economic theory and political philosophy from the perspective of Austrian Economics and libertarianism As such it deals with Epistemology and Methodology Microeconomics Macroeconomics Labor Economics International Economics Political Philosophy Law and Public Policy all from the Austro libertarian perspective Hence this book offers an integrated view of libertarianism and Austrian economics in the light of recent debates in the areas of economic science and political philosophy Moreover it builds from the foundations of the Austrian approach epistemology and methodology while the latter material deals with its application to the individual from the microeconomic perspective which in turn allows an exploration of subjects in macroeconomics Additionally this work applies Austro libertarianism to law politics and public policy Thus it offers a unified view of the entire approach in a logical progression allowing the readers to judge this perspective in full Futerman and Block say that their book is not a manual which I suppose it is not But it is a collection of highly pertinent essays from which you can understand what is mistaken in the orthodoxy of economics law and politics The central term of art in Austrian economics is that phrase human action It is the exercise of human will not the blind bumping of one molecule against another or one organism against another as in the physical sciences Futerman and Block distinguish Austrian economics as a scientific enterprise based on liberty of the will from libertarianism as an advocacy based on policies implied by such liberty Although Austrian economics is positive and libertarianism is normative they write this book shows how both are related how each can support the other Indeed they do Deirdre N McCloskey PhD UIC Distinguished Professor of Economics and of History Emerita Professor of English Emerita Professor of Communication Emerita University of Illinois at Chicago

For these insights the budding economist as well as the historian of thought should be grateful From the foreword by Kenneth J Arrow **An Entrepreneurial Theory of the Firm** Frédéric Sautet,2000-05-11 This original provocative work encompasses a wealth of existing literature and leads it in a new direction It will inspire economic scholars particularly within the fields of Austrian economics and the theory of the firm **The Classical Liberal Case for Israel** Walter E. Block,Alan G. Futerman,2021-11-02 This book offers a unique perspective on the State of Israel based on classical liberalism both on a historical and theoretical level Specifically it makes a classical liberal and libertarian analysis based upon homesteading and private property rights to defend the State of Israel As such this work explores the history of the Jewish State both to provide a positive case for its right to exist and to clarify the myths surrounding its origin and development At the same time it deals with other relevant related subjects such as the complex situation between Israel and the Palestinian Arabs the military campaigns against the Jewish State the connection between anti Zionism and anti Semitism and Israel s economic miracle The thorough analysis presented in this work intends to show not only why the voices and movements against Israel are wrong including the Boycott Divestment and Sanctions movement BDS but more importantly why Israel is an example of human flourishing and freedom that every advocate for liberty should celebrate The Classical Liberal Case for Israel makes the practical and moral case for Israel It is based on truths and facts that need to be repeated over and over Block Futerman understand that the only way to defeat a big lie is with a big truth Benjamin Netanyahu Prime Minister of the State of Israel Jerusalem Israel Classical Liberalism often associated with the spread West from Northern Europe in creating free nations is argued here as applying to Israel with ancient roots in the principles of human freedom Vernon L Smith Ph D Nobel Prize in Economic Sciences 2002 and Professor George L Argyros Endowed Chair in Finance and Economics Professor of Economics and Law Smith Institute for Political Economy and Philosophy at Chapman University *Mind, Society, and Human Action* Richard Wagner,2010-02-25 In this book Wagner offers a new logic for economic analysis seeking to transcend the distinction between neoclassical and Austrian economics that has come increasingly into play over the past 30 years *Subjectivism and Economic Analysis* Roger Koppl,Gary Mongiovi,1998-10-15 Subjectivism plays a fundamental role in many of the leading alternative schools in economics This work explores major methodological issues in the area of radical subjectivism and includes contributions from Jorg Bibow Peter Boettke Maurizio Caserta Steven Horwitz Brian J Loasby Steven Parsons Steve Sullivan and Carlo Zappia **Beyond Positivism** Bruce Caldwell,2015-07-20 Since its publication in 1982 this book has become established as one of the major works in economic methodology with its rejection of positivism and advocacy of pluralism profoundly influencing economics over the last decade **Full Reserve Banking versus the Real Bills Doctrine** Philipp Bagus,2024-07-24 In Full Reserve Banking versus the Real Bills Doctrine Philipp Bagus defends Austrian monetary theory and full reserve banking against the real bills doctrine Responding to economist Juan Ram n Rallo s critique of Ludwig von Mises s The Theory of Money and Credit in Una cr tica a la teor a monetaria de Mises Bagus

demonstrates that Mises's supposed errors are not errors at all. He mercilessly dismantles Rallo's proposed alternative theory of money point by point. Bagus shows that only by abandoning the aberrations of real bills doctrine, fractional reserve banking, and Feketician liquidity theory and adopting Austrian monetary theory will the economic discipline be able to advance in reaching a true understanding of monetary phenomena. *Pure Time-Preference Theory of Interest*, The Jeffrey

Herbener, 2011-12-15 **Foundations of Entrepreneurship and Economic Development** David A Harper, 2003-03-13

This well-written book is the first to deal with entrepreneurship in all its aspects. It considers the economic, psychological, political, legal, and cultural dimensions of entrepreneurship from a market process perspective. David A Harper has produced a volume that analyses why some people are quicker than others in discovering profit opportunities. Importantly, the book also covers the issue of how cultural value systems orient entrepreneurial vision and, in contrast to conventional wisdom, the book argues that individualist cultural values are not categorically superior to group-oriented values in terms of their

consequences for entrepreneurial discovery. Economic Foundations of Strategic Management Mehmet Barca, 2017-10-24

This book explores the extent to which economic theory is able to provide the theoretical foundations of strategic management. To this end, it draws on the philosophy of science, microeconomic theory, and different approaches to strategic management. The work shows that many of the propositions of strategic management are deducible from the economic theories considered. It argues that these propositions should be made open to empirical testing and that a unified theory of strategic management should be developed. Thus, the book addresses a current major concern of theorists that strategy remains atheoretical and that this reduces the predictive power of the subject and hampers further theory development. The essential contribution made is that economic theory should be systematically explored in order to establish the foundations of business strategy. Critical Realism Justin Cruickshank, 2003. An introduction to the difference that critical realism can

make to contemporary social sciences, covering cultural studies, feminism, globalization, heterodox economics, education policy, the self, and the underclass debate. **Is the Market a Test of Truth and Beauty?: Essays in Political Economy** Leland B. Yeager, 2011
