New Directions In Question Answering:

Advances in Open Domain Question Answering Tomek Strzalkowski, Sanda Harabagiu, 2006-10-07 Automated question answering the ability of a machine to answer questions simple or complex posed in ordinary human language is one of today's most exciting technological developments. It has all the markings of a disruptive technology, one that is poised to displace the existing search methods and establish new standards for user-centered access to information. This book gives a comprehensive and detailed look at the current approaches to automated question answering. The level of presentation is suitable for newcomers to the field as well as for professionals wishing to study this area and/or to build practical QA systems. The book can serve as a how-to handbook for IT practitioners and system developers. It can also be used to teach advanced graduate courses in Computer Science, Information Science, and related disciplines. The readers will acquire in-depth practical knowledge of this critical new technology.

New Directions in Question Answering Mark T. Maybury, 2004 Major trends in the development of an important new method of information access that combines elements of natural language processing, information retrieval, and human computer interaction. Question answering systems which provide natural language responses to natural language queries are the subject of rapidly advancing research encompassing both academic study and commercial applications, the most well-known of which is the search engine Ask Jeeves. Question answering draws on different fields and technologies including natural language processing, information retrieval, explanation generation, and human computer interaction. Question answering creates an important new method of information access and can be seen as the natural step beyond such standard Web search methods as keyword query and document retrieval. This collection charts significant new directions in the field including temporal, spatial, definitional, biographical, multimedia, and multilingual question answering. After an introduction that defines essential terminology and provides a roadmap to future trends, the book covers key areas of research and development. These include current methods, architecture, requirements, and the history of question answering on the Web, the development of systems to address new types of questions, interactivity, which is often required for clarification of questions or answers, reuse of answers, advanced methods, and knowledge representation and reasoning used to support question answering. Each section contains an introduction that summarizes the chapters included and places them in context, relating them to the other chapters in the book as well as to the existing literature in the field and assessing the problems and challenges that remain.

Emerging Applications of Natural Language Processing: Concepts and New Research Bandyopadhyay, Sivaji, Naskar, Sudip Kumar, Ekbal, Asif, 2012-10-31 This book provides pertinent and vital information that researchers, postgraduate, doctoral students, and practitioners are seeking for learning about the latest discoveries and advances in NLP methodologies and applications of NLP. Question Answering over Text and Knowledge Base Saeedeh Momtazi, Zahra Abbasiantaeb, 2022-11-04 This book provides a coherent and complete overview of various Question Answering (QA) systems. It covers three main categories based on the

source of the data that can be unstructured text TextQA structured knowledge graphs KBQA and the combination of both Developing a QA system usually requires using a combination of various important techniques including natural language processing information retrieval and extraction knowledge graph processing and machine learning After a general introduction and an overview of the book in Chapter 1 the history of QA systems and the architecture of different QA approaches are explained in Chapter 2 It starts with early close domain QA systems and reviews different generations of QA up to state of the art hybrid models Next Chapter 3 is devoted to explaining the datasets and the metrics used for evaluating TextQA and KBQA Chapter 4 introduces the neural and deep learning models used in QA systems This chapter includes the required knowledge of deep learning and neural text representation models for comprehending the QA models over text and QA models over knowledge base explained in Chapters 5 and 6 respectively In some of the KBQA models the textual data is also used as another source besides the knowledge base these hybrid models are studied in Chapter 7 In Chapter 8 a detailed explanation of some well known real applications of the QA systems is provided Eventually open issues and future work on QA are discussed in Chapter 9 This book delivers a comprehensive overview on QA over text QA over knowledge base and hybrid QA systems which can be used by researchers starting in this field It will help its readers to follow the state of the art research in the area by providing essential and basic knowledge

New Directions in the Russellian Theory of Time
Emiliano Boccardi, L. Nathan Oaklander, Erwin Tegtmeier, 2024-11-28 The main debates in the philosophy of time have centred on whether A theory with events ordered by pastness presentness and futurity or B theory ordered by earlier than or later than are equally fundamental Emiliano Boccardi L Nathan Oaklander and Erwin Tegtmeier instead uphold the Russellian theory or R theory and consider not only the fundamental differences but also its superiority They argue McTaggart's misinterpretation of Russell has led to a false dichotomy between the A and B theories while exploring the connection between temporal relations temporal facts and time In defence of the R theory they argue how it offers a metaphysical explanation of the nature of time in addition to investigating whether ontological theories of time can be considered from a moral or existential point of view Using an ontological approach this volume clarifies what is mistaken about both theories can only be resolved by adopting a Russellian philosophy reaching beyond the A theory vs B theory debate

Proceedings of 2013 World Agricultural Outlook Conference Shiwei Xu, 2014-07-03 Food security has always been a major global concern and is getting more attention in recent years In fact the global economy and stability has been severely challenged by the precarious state of food security which was exacerbated by a combination of sharp price volatility and disastrous weather conditions related to climate change The book aims to improve the analysis and projection of agricultural production and marketing facilitates information exchange to better food supply and demand and ultimately contributes to enhance world food security and sustainable global agricultural development
