LaTeX in 24 Hours Dilip Datta, 2017-06-27 This book presents direct and concise explanations and examples to many LaTeX syntax and structures allowing students and researchers to quickly understand the basics that are required for writing and preparing book manuscripts journal articles reports presentation slides and academic theses and dissertations for publication Unlike much of the literature currently available on LaTeX which takes a more technical stance focusing on the details of the software itself this book presents a user focused guide that is concerned with its application to everyday tasks and scenarios It is packed with exercises and looks at topics like formatting text drawing and inserting tables and figures bibliographies and indexes equations slides and provides valuable explanations to error and warning messages so you can get work done with the least time and effort needed This means LaTeX in 24 Hours can be used by students and researchers with little or no previous experience with LaTeX to gain quick and noticeable results as well as being used as a quick reference guide for those more experienced who want to refresh their knowledge on the subject Experiencing the Environment

Seymour Wapner, 2012-12-06 The purpose of this volume is to explore theory problem formulation and methodology in experiencing the environment In this embryonic field the writings of a number of individuals already stand out as representative of distinctive viewpoints In order to facilitate further development of the field a conference was proposed to gather in one place representatives of a number of major viewpoints with regard to the embryonic field of environmental psychology It was hoped that a colloquy among such representatives would facilitate a clarification of the similarities and differences between the various perspectives and might enable proponents of any given point of view to benefit from the insights of others with different orientations Hopefully it might also promote a greater articulation for this emerging field of inquiry With these ends in mind the sponsors of the conference asked the various prospective participants to present their theoretical positions and representative research illustrative of those positions Some of the perspectives represented at the conference emphasized the point that the construal of phenomena depends heavily on the values and needs of perceivers Implicit in this kind of position is the thesis that anyone who seeks to describe a complex happening is likely to shape it in terms of presuppositions biases etc that may not be shared by others **Big Data Analytics: From Data to Discovery**

Architects of Memory Nathan R. Johnson, 2020-05-26 Probes the development of information management after World War II and its consequences for public memory and human agency We are now living in the richest age of public memory From museums and memorials to the vast digital infrastructure of the internet access to the past is only a click away Even so the methods and technologies created by scientists espionage agencies and information management coders and programmers have drastically delimited the ways that communities across the globe remember and forget our wealth of retrievable knowledge In *Architects of Memory* Information and Rhetoric in a Networked Archival Age Nathan R Johnson charts turning points where concepts of memory became durable in new computational technologies and modern memory infrastructures took hold He works through both familiar and esoteric memory technologies from the card catalog to the book cart to Zotocoding and keyword indexing as he delineates histories of librarianship and information science and provides a working vocabulary for understanding rhetoric's role in contemporary memory practices This volume draws upon the twin concepts of memory infrastructure and mnemonic techn to illuminate the seemingly opaque wall of mundane algorithmic techniques that determine what is worth remembering and what should be forgotten Each chapter highlights a conflict in the development of twentieth century librarianship and its rapidly evolving competitor the discipline of information science As these two disciplines progressed they contributed practical techniques and technologies for making sense of explosive scientific advancement in the wake of World War II Taming postwar science became part and parcel of practices and information technologies that undergird uncountable modern communication systems including search engines algorithms and databases for nearly every national clearinghouse of the twenty first century
