The New Game Plan for Recovery Tobin Quereau, Tom Zimmerman, 1992 Healing in Action Barney

Straus, 2018-09-04 Healing in Action Adventure Based Counseling with Therapy Groups is a practical guide for therapists wanting to integrate interactive games and challenges into their work. It provides current research supporting using ABC with trauma survivors and those recovering from addictions as well as its efficacy with a broader population. Twelve activity-based chapters take the reader through various one-hour sessions of activities based on a particular theme or material used complete with 50 descriptive photos of groups in action. Therapists will be able to use these activities to help their patients experience in vivo the joy, freedom, and playfulness that are the hallmarks of sound mental health. With its combination of sound theoretical material and practical application, this book is a valuable resource for practitioners and graduate students alike.

Einstein Never Used Flash Cards Kathy Hirsh-Pasek, PhD, Roberta Michnick Golinkoff, PhD, Diane Eyer, PhD, 2004-08-12 BOOKS FOR A BETTER LIFE AWARD WINNER An enlightening guide to how infants and toddlers learn and why play is the key to enhancing your child's development. A smashingly good book. Edward Zigler, PhD, director Yale's Center in Child Development and Social Policy and the father of Head Start programs. In Einstein Never Used Flash Cards, highly credentialed child psychologists Kathy Hirsh-Pasek, PhD, and Roberta Michnick Golinkoff, PhD, with Diane Eyer, PhD, offer a compelling indictment of the growing trend toward accelerated learning and the cult of achievement that pressures parents to help their children to get ahead. It's a message that stressed-out parents are craving to hear: Letting tots learn through unstructured play is not only okay, it's a better way for children to learn than drilling academics. Drawing on overwhelming scientific evidence from their own studies and the collective research results of child development experts, Kathy, Roberta, and Diane explain the process of learning from a child's point of view, addressing how play helps boost learning in key areas of development such as math, reading, verbal communication, science, self-awareness, and social skills. To help parents foster creative play, they offer forty age-appropriate games. These simple, fun, yet powerful exercises work as well or better than expensive enrichment programs and high-tech educational toys to teach children what their ever-active, curious minds are excited to learn. Packed with insights from fascinating studies and thoughtful advice, Einstein Never Used Flash Cards reassures and empowers parents with knowledge that helps their children grow and thrive. **Holistic**
