New Genetic Medicine Theological And Ethical Reflections:

The New Genetic Medicine Thomas Anthony Shannon, James J. Walter, 2003 Since the 1970s the interrelated areas of medical genetics and biotechnology have developed dramatically and afforded increased control over the design of living organisms From the very beginning controversies over these techniques and their applications to plants animals and humans have raged in many disciplines including science philosophy ethics and religion This book brings together the seminal essays of two leading Catholic moral theologians Thomas Shannon and James Walter in an effort to identify the key ethical and theological questions raised by the new genetic medicine What is unique about this book is that it specifically and directly brings modern genetics and the Roman Catholic theological and ethical tradition into dialogue While the authors argue that the Catholic tradition has much to offer in putting this current scientific revolution into perspective they well understand the need to avoid merely repeating the tradition in favor of bringing the best of the tradition to bear on the precise questions posed by modern genetic technology

Ethics in Biomedical Research Matti Häyry, Tuija Takala, Peter Herissone-Kelly, 2007 This book deals with the international assessment and regulation of biomedical research In its chapters some of the leading figures in today's bioethics address questions centred on global development scientific advances and vulnerability The series Values In Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics

Reconceiving Reproductive Health: Theological and Christian Ethical Reflections Manitza Kotzé, Nadia Marais, Nina Müller van Velden, Nadine Bowers du Toit, Mwawi N. Chilongozi, Hanzline R. Davids, Gideon R. Kotzé, Tayla Minnaar, Peter Nagel, Selina Palm, Jeremy Punt, Riaan Rheeder, Tanya van Wyk, Fralene van Zyl, 2019-12-12 While reproduction is fairly often touched upon in theological and Christian ethical discussions reproductive health is not However reproductive health is a matter of theological and ethical concern Discussion pertaining to reproductive health includes a number of debates about for instance abortion and the termination of pregnancy reproductive loss childlessness infertility stillbirth miscarriage and adoption Additionally new reproductive possibilities made available by the development of reproductive technology have necessitated theological and ethical reflection on for example surrogacy post menopausal pregnancies litter births single mothers or fathers by choice in vitro fertilisation and the so called saviour siblings These new developments compel us to reconceive our notions of what reproductive health is or should be Many of these topics are receiving increasing attention in a variety of theological publications The focus of this volume is unique however and to the best of our knowledge this is the first volume dealing not only with reproductive issues but also reflecting theologically and ethically on reproductive health It makes a contribution by providing a variety of perspectives from different theological fields on this theme and in many chapters focussing especially on the South African context These discussions are also part of urgent debates within churches which require developing life giving theological language and imaginative theological alternatives that may speak to experiences of

matters relating to reproductive health The popular books TV series and films that touch upon these discussions including The Handmaid's Tale and Mother strengthen the perception that a more in depth theological and ethical discussion on the theme may be necessary particularly towards exploring stories and confessions from our faith tradition that may provide us with a timely opportunity to do the important work of theological reconceiving

Reflections on Bioethics Jose Antonio Morales-Gonzalez, Eugenia Aguilar Nájera, 2018-06-27 The book Reflections on Bioethics is an effort that brings together works grouped into five sections Bioethics and Health Bioethics and Education Bioethics and Technology Bioethics in the Use of Experimental Animals and Selected Topics of Bioethics In each of these sections the fundamental concepts of bioethics and their relationship with each of these branches of knowledge are covered The purpose is to give the reader a specific document of topics it is not intended to be a treaty because the study of any of the five sections is very broad However this is an effort that manages to combine in interdisciplinary subjects that are fundamental for professionals of all fields of knowledge

Genetics and Christian Ethics Celia Deane-Drummond, 2006 In the immediate future we are likely to witness significant developments in human genetic science It is therefore of critical importance that Christian ethics engages with the genetics debate since it affects not just the way we perceive ourselves and the natural world but also has wider implications for our society This book considers ethical issues arising out of specific practices in human genetics including genetic screening gene patenting gene therapy genetic counselling as well as feminist concerns Genetics and Christian Ethics argues for a particular theo ethical approach that derives from a modified version of virtue ethics drawing particularly on a Thomistic understanding of the virtues especially prudence or practical wisdom and justice The book demonstrates that a theological voice is highly relevant to contested ethical debates about genetics

Design and Destiny Ronald Cole-Turner, 2008 Scholars discuss the genetic modification of embryonic cells from the viewpoints of traditional Jewish and Christian teaching considering both the possible therapeutic benefits of this technology and moral concerns about its implementation We are approaching the day when advances in biotechnology will allow parents to design a baby with the traits they want The continuing debate over the possibilities of genetic engineering has been spirited but so far largely confined to the realms of bioethics and public policy Design and Destiny approaches the question in religious terms discussing human germline modification the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons although they offer certain moral conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism's traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that

traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter

Genomic Medicine Dhavendra Kumar, Charis Eng, 2015 The first edition of *Genomics and Clinical Medicine* provided an overview of genomics based advances in disease susceptibility diagnosis and prediction of treatment outcomes in various areas of medicine Since its publication the science of genomics has made tremendous progress and exciting new developments in biotechnology and bioinformatics have created possibilities that were inconceivable only a few years ago This completely revised second edition of *Genomic Medicine* reflects the rapidly changing face of applied and translational genomics in the medical and health context and provides a comprehensive coverage of principles of genetics and genomics relevant to the practice of medicine

Catholic Perspectives on Peace and War Thomas Massaro, Thomas Anthony Shannon, 2003 This book offers a thorough and accessible analysis of Catholic teaching on war and warmaking from its earliest stages to the present Moral theologians Thomas Massaro and Thomas A Shannon begin with a survey of the teachings on war in various religions and denominations and then trace the development of Just War theory and application review the perspective of several Catholic bishops comment on the bishops pastoral letter *The Challenge of Peace* address contemporary developments in light of 9 11 and the United States war with Iraq and conclude with theological reflections Complete with recommended readings *Catholic Perspectives on Peace and War* offers an informative and thoughtful moral analysis that helps readers navigate the rapidly changing terrain of war warmaking and peace initiatives

Into the Jaws of Yama, Lord of Death Karma Lekshe Tsomo, 2012-02-01 This book explores the Buddhist view of death and its implications for contemporary bioethics Writing primarily from within the Tibetan tradition author Karma Lekshe Tsomo discusses Buddhist

notions of human consciousness and personal identity and how these figure in the Buddhist view of death Beliefs about death and enlightenment and states between life and death are also discussed Tsomo goes on to examine such hot button topics as cloning abortion assisted suicide euthanasia organ donation genetic engineering and stem cell research within a Buddhist context introducing new ways of thinking about these highly controversial issues

Contemporary Issues in Bioethics

James J. Walter, Thomas A. Shannon, 2005-12-08 Contemporary Issues in Bioethics A Catholic Perspective applies the best of the Roman Catholic theological and ethical tradition to some of the most controversial and complex bioethical topics that confront contemporary society Authors James Walter and Thomas Shannon offer a fresh analysis from the Catholic tradition and show how a specifically Catholic perspective might inform public discussion on these issues In an age where it is claimed that religion should not be part of ethical discussion on bioethical issues this book takes a decidedly different tack and shows that the Catholic tradition has something very important to offer Contemporary Issues in Bioethics combines clear concise and accessible prose with teachable case studies on such issues as reproductive cloning quality of life and clinical decision making and the withdrawal of artificial nutrition and hydration Divided into four sections theological issues issues at the beginning of life issues with genetic medicine and the care of ill patients and issues at the end of life this book is ideal for use in college university and seminary courses on bioethics as well as for medical professionals policy makers and individual readers

Distributive Justice and the New Medicine George Patrick Smith, 2010-01-01 Smith has packed an incredible amount of information into this relatively short and clearly written book His erudition is unquestionable and his knowledge of current trends in medical technology and the ethical issues surrounding them is obvious on every page P Jenkins Choice George P Smith is one of the world's leading experts on the legal and ethical issues raised by modern medicine His book is a wide ranging and deeply informed and considered analysis of those issues with particular emphasis on the inequality with which the benefits of modern medicine are bestowed on the sick Knowledgeable as well about the technical aspects of the biomedical revolution Smith writes with insight and authority and offers a perspective that will influence the policy debates Richard A Posner United States Court of Appeals for the Seventh Circuit and University of Chicago Law School US While much has been written about the various issues addressed in this book genetics cloning informed consent organ donation Smith's book moves beyond traditional legal analysis tying these issues together by examining them through the lens of distributive justice He thus provides the reader with a unique and valuable perspective on this important area Distributive Justice and the New Medicine will be of interest to all those interested in health law and bioethics and in particular for those interested in distributive justice Belinda Bennett Journal of Law Social Justice and Global Development Professor George P Smith's Distributive Justice and the New Medicine is a major new work by one of the world's leading medical lawyers This book brings important new insights into the complex area of rationing health care resources and should be read by anyone interested in seeking to create a just society Jonathan Herring Exeter College University of Oxford UK Is the advancement of

scientific knowledge and the development of biomedical technologies known as the New Medicine desirable George P Smith asks this fundamental question while also confronting the distribution of these scarce medical resources Law economics medical science philosophy and ethics all coalesce in this discussion of how to structure normative standards of conduct that will improve the quality of human life The author begins by examining various economic constructs as aids for achieving a fair and equitable delivery of health care services He then assesses their level of practical application and evaluates the costs and benefits to society of pursuing the development and use of the New Medicine The book ends with a case study of organ and tissue transplantation that illustrates the implementation of distributive justice The author concludes that as long as clinical medicine maintains its focus on healing and alleviating suffering among patients a point of equilibrium will be reached that advances the common good This timely and compelling exploration will be a must read for scholars researchers policymakers and all those interested in advances in medical technology and the issues surrounding access to health care

A Glass Darkly David Gareth Jones,R. John Elford,2010 This book is a sequel to the first volume of New International Studies in Applied Ethics and includes essays from some of the same contributors Like the previous volume the book explores the interface between medicine and theology The essays demonstrate the complementarity evident between the two and examine how those coming from different theological traditions are able to provide helpful insights Points of disagreement and their crucial role in contributing to an understanding of the complexities of the debate are acknowledged Much of the discussion focuses on use of the Bible The contributors show an awareness of the pastoral necessity of providing access to new medical technologies for those in need Out of this emerges a positive view of some of the human benefits of modern medicine and the ways in which Christian theology can engage with it constructively The discussion throughout is related to the wider literature in the field

Teaching Religion and Healing Linda L. Barnes,Inés Talamantez,2006-10-26
Publisher description **Battleground: Religion** Daniel L. Smith-Christopher,2008-12-30 Is there a controversial issue in

the contemporary world that does not involve religion Whether it s a debate over the beginning of life or on sexuality and family life or on the stewardship of humans over the environment almost all of the most contentious matters that impact today s society involve people s deeply held religious beliefs Battleground Religion helps clarify these complex topics by examining how various religious beliefs and practices impact current political social and cultural debates Each of the approximately 100 entries examines a hot button issue from war and peace to the culture wars and discusses in a balanced and objective way the points of view on these topics from all parts of the religious spectrum Students will come away from Battleground Religion with a better understanding of the issues that they will be encountering for years to come Each entry includes a bibliography or resources for further information

Is Human Nature Obsolete? Harold W. Baillie, Timothy Casey, 2005 An interdisciplinary exploration of whether modern genetics and bioengineering are leading us to a posthuman future

Theological Bioethics Lisa Sowle Cahill, 2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro life movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In *Theological Bioethics* Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at both community and national levels In Cahill s eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom
