New Great Transformation Change And Continuity In East Central Europe:

The New Great Transformation? Christopher G. A. Bryant, Edmund Mokrzycki, 1994 This timely book provides an essential guide to the social political and economic upheavals in post communist Europe , Democracy and Enlargement in Post-Communist Europe Christian W. Haerpfer, 2003-09-02 This book presents the principal findings of a unique and in depth study into the birth of democracy and the market economy in fifteen post communist countries **Reform of the Socialist System in Central and Eastern Europe** Martin J. Bull, Mike Ingham, 2016-07-27 This book analyzes the reform of the socialist system in Central and Eastern Europe and the former Soviet Union Uniquely it adopts a multi disciplinary perspective which includes authors from both Western Europe and the former Communist world The volume contains analyses of the prospects for civil society economic reform and privatisation theories of economic transition and the role of the state political change and the persistence of former Communist parties the prospects for democracy in the former Soviet Union and gender aspects of labour market reform East Central Europe and the former Soviet Union Michael Bradshaw, Alison Stenning, 2016-04-15 A comprehensive introduction to the important economic social and political processes and development issues in this increasingly popular area of study Employing a groundbreaking thematic approach the book centres its discussion on the interrelation between contemporary development theories and continuing transition issues in this huge and complex region **Identity in a Post-communist Balkan State** Douglas Saltmarsh, 2017-07-12 This title was first published in 2001 In seeking to better understand post communist identity change this book presents an analysis based on the study of everyday life in two villages in northern Albania The author describes the villages from the perspective of community economic activity and relations with the state The book applies theories relating identity and civil society to the social economic and political realities associated with post communist transformation By describing village life in northern Albania at the close of the 20th century it aims to complement the anthropological work undertaken by Edith Durham in the early 1900s and by Margaret Hasluck in the 1930s *Post-Communist Democratisation in Lithuania* Diana Janušauskienė, 2011 Preliminary Material Introduction Theorising Post Communist Democratisation The Role of Political Elites The New Political Scene in Lithuania Rising New Elites A Case of Youth Political Organisations Conclusions Notes References The Content of the Questionnaires Description of the Respondents Summarised Data from the Survey of the Members of Youth Political Organisations Summarised Data of the Survey of Members of the Lithuanian Parliament in 1996 2000 About the Author The Testimonies of Russian and American Postmodern Poetry Albena Lutzkanova-Vassileva, 2014-12-18 This book challenges the belief in the purely linguistic nature of contemporary poetry and offers an interpretation of late twentieth century Russian poetry as a testimony to the unforeseen annulment of communist reality and its overnight displacement by a completely unfathomable post totalitarian order Albena Lutzkanova Vassileva argues that because of the sudden invalidation of a reality that had been largely seen as unattained and everlasting this shift

remained secluded from the mind and totally resistant to cognition thus causing a collectively traumatic psychological experience The book proceeds by inquiring into a school of contemporary American poetry that has been likewise read as cut off from reality Executing a comparative analysis Vassileva advances a new understanding of this poetry as a testimony to the overwhelming and traumatic impact of contemporary media which have assailed the mind with far more signals than it can register digest and furnish with semantic weight

Elites in Transition Heinrich Best,Ulrike Becker,2013-11-11 Who rules in Eastern Europe became a fundamental question for western researchers and other observers after communist regimes were established in the region and it gained further importance as state socialism expanded into Central Europe after the Second World War A political order which according to Leninist theory of the state and to subsequent Stalinist political practice was primarily a highly centralised and repressive power organisation directed as if it were natural researchers attention towards the highest echelon of office holders in party and state Extreme centralisation of power in these regimes was consequently linked to an elitist approach to analysing them from a distant viewpoint It is one of the many paradoxes of state socialism that a social and political order which presumptuously claimed to be the final destination of historical development and to be based on deterministic laws of social evolution which claimed an egalitarian nature and denied the significance of the individual was perceived through the idiosyncrasies rivalries and personal traits of its rulers The largest part of these societies remained in grey obscurity only occasionally revealing bits of valid information about a social life distant from the centres of power It is debatable whether this top headedness of western research into communist societies created a completely distorted picture of reality however it certainly contributed to an overestimation of the stability of these regimes an underestimation of their factual diversity and a misjudgement of the extent of conflicts and cleavages dividing them

The Romanian Mass Media and Cultural Development David Berry,2017-07-05 This compelling book assesses the development of the mass media since the Romanian Revolution in December 1989 and the media's impact on cultural development the public sphere civil society and democracy It controversially claims that Romania's failure to experience a thoroughgoing enlightenment project in its entire history remains a major obstacle for producing democratic ownership of the media and democratic development of society Analyzing both the print and broadcast media and their respective effects on development the book also discusses the effects of Romanian law on media and societal development ethics and media responsibilities It concludes however that far from having an absolutely negative impact on Romanian post communism the media has helped produce a contradictory empirical form that equally contains positive moments in terms of subjective cultural development

Globalisation and Enlargement of the European Union Andreas Bieler,2002-11 On January 1 1995 Austria and Sweden joined the European Union This book analyses why these two countries joined at such a moment when steps towards a Common Foreign and Security Policy threatened their neutrality

Reconstructing the Regional Economy Adrian Smith,1998-06-25 The book focuses on regional and economic change in Eastern and Central

Europe using Slovakia as a case study It explains the relationship between industrial change and regional development and discusses fragmentation within the context of the legacy of the state socialist industrialization model *Global Geographies of Post-Socialist Transition* Tassilo Herrschel, 2006-09-27 Since the formal raising of the Iron Curtain there has been much interest in post socialism and the process of post socialist transition This timely book provides a systematic review and analysis of the process of transition Herrschel explores recent theories concepts and debates on post socialism and the notion of transition provides a systematic topical account of post socialist transitions around the world as evidence by social economic and political processes examines case studies of post socialist transition in east and Central Europe the former Soviet Union Asia and South East Asia and Africa and Latin America brings together theoretical and practical aspects by examining what lessons can be learned from recent experiences *Global Geographies of Post Socialist Transition* provides a truly global comparative account of the meaning and processes of post socialist transition and will be an invaluable resource for all those interested in this area

Regulatory Transformations Bettina Lange, Fiona Haines, Dania Thomas, 2015-09-10 The issue of whether transnational risk can be regulated through a social sphere goes to the heart of what John Ruggie has described as embedded liberalism how capitalist countries have reconciled markets with the social community that markets require to survive and thrive This collection located in the wider debates about global capitalism and its regulation tackles the challenge of finding a way forward for regulation It rejects the old divisions of state and market citizens and consumers social movements and transnational corporations as well as economic and social regulation Instead this rich multidisciplinary collection engages with a critical theme the idea of harnessing the regulatory capacity of a social sphere by recognising the embeddedness of economic transactions within a social and political landscape This collection therefore explores how social norms practices actors and institutions frame economic transactions and thereby regulate risks generated by and for business state and citizens A key strength of this book is its integration of three distinct areas of scholarship Karl Polanyi s economic sociology regulation studies and socio legal studies of transnational hazards The collection is distinct in that it links the study of specific transnational risk regulatory regimes back to a social theoretical discussion about economy society interactions informed by Polanyi s work Each of the chapters addresses the way in which economics as well as economic and social regulation can never be understood separately from the social particularly in the transnational context Endorsement This thought provoking collection asks the most critical question of our time how to civilise markets through social accountability and political action The climate and financial crises we face show how crucial this challenge is Lange Haines and Thomas have put together a series of fruitful case studies of the possibilities for embedding economic relationships in social relationships by a series of top class researchers within their own illuminating and sensitive framing of the issue Professor Christine Parker Professor of Regulatory Studies at Monash University

The Other Cold War Heonik Kwon, 2010-12-06 In this conceptually bold project Heonik Kwon uses anthropology to interrogate the cold war s cultural and

historical narratives Adopting a truly panoramic view of local politics and international events he challenges the notion that the cold war was a global struggle fought uniformly around the world and that the end of the war marked a radical universal rupture in modern history Incorporating comparative ethnographic study into a thorough analysis of the period Kwon upends cherished ideas about the global and their hold on contemporary social science His narrative describes the slow decomposition of a complex social and political order involving a number of local and culturally creative processes While the nations of Europe and North America experienced the cold war as a time of long peace postcolonial nations entered a different reality altogether characterized by vicious civil wars and other exceptional forms of violence Arguing that these events should be integrated into any account of the era Kwon captures the first sociocultural portrait of the cold war in all its subtlety and diversity

State and Society in Post-Socialist Economies J. Pickles, 2008-01-17 *State and Society in Post Socialist Economies* focuses on the reform economies of post socialist Europe It looks at how various projects of communism that emerged in have been and are still being dismantled and recomposed by alternative visions institutions and practices of capitalist market economies and democratic polities

Gender and Civil Society Jude Howell, Diane Mulligan, 2004-09-30 The international scope of the case studies means that the book will appeal to the international market Civil society and gender studies are both widely studied and previous titles in these areas have sold well There are no competing titles that consider both civil society and women s political activities

Welfare State Transformation in the Yugoslav Successor States Marija Stambolieva, 2016-04-28 Welfare states are the product of economic political and social interactions and undergo changes as these interactions transform Existing welfare state theories mainly tend to explain the emergence and development of the welfare state in the western industrialized and capitalist world While the states of Central and Eastern Europe have recently been integrated in the academic discourse the countries of the former Yugoslavia have been predominantly excluded from comparative analysis Issues of nationalism and ethnic polarization have been prevalent there while socio economic issues have been put on the back burner This book explores what happened to the strong social states and relatively equal societies which existed in Slovenia Croatia Serbia and Macedonia and looks into what accounts for these diverse outcomes By investigating the applicability of the theories on welfare state development and typologization it fills in the gap in the welfare state literature It offers an original typology of social citizenship that takes into account the diversity of welfare policy formations across the region The aim of this typology is not to compete with existing ones but rather to offer a framework for better understanding of states that do not necessarily fit into known explanatory categories In a global context of changing economic circumstances and contending political responses macroeconomic policy and welfare state reform become order of the day By featuring the ways that states adjust to new pressures this book s arguments may come in handy to those trying to make sense of the crisis and the powers that drive the policy solutions

Post-Communist Democratization John S. Dryzek, Leslie Holmes, 2002-06-13 Democracy is not just a matter of constitutions parliaments

elections parties and the rule of law In order to see if or how democracy works we must attend to what people make of it and what they think they are doing as they engage with politics or as politics engages them This book examines the way democracy and democratization are thought about and lived by people in China Russia and eleven other countries in the post communist world It shows how democratic politics and sometimes authoritarian politics work in these countries and generates insights into the prospects for different kinds of political development The authors explore the implications for what is probable and possible in terms of trajectories of political reform and examine four roads to democratization liberal republican participatory and statist The book will be of interest to students and scholars of comparative politics political theory and post communist studies Can Europe Work? Stephen E. Hanson, Willfried Spohn, 1995-12 In Can Europe Work Germany and the Reconstruction of Postcommunist Societies eight scholars from the United States and Europe discuss the problems posed for European unity by the collapse of communism and the reemergence of Germany as Europe's strongest state Among the topics addressed are a comparison of nationalism in Western and Eastern Europe the intellectual origins of the often antiliberal and antidemocratic East European nationalism deteriorating popular support for the Polish Roman Catholic Church a comparative analysis of the German nation state in the nineteenth and twentieth centuries German economic influence in East Central Europe the role of Germany in the breakup of Yugoslavia the causes of recession in Eastern Europe and a sobering study of Russia's current economic problems The book is expected to attract a large audience in both North America and Europe among academic specialists on the region as well as those concerned with policy issues arising from the turbulent environment of postcommunist East Central Europe
