A Rebecca Clarke Reader Liane Curtis, 2005 **Women and the Nineteenth-Century Lied** Aisling Kenny, Susan Wollenberg, 2016-03-03 This book bridges a gap in existing scholarship by foregrounding the contribution of women to the nineteenth century Lied Building on the pioneering work of scholars in recent years it consolidates recent research on women s achievements in the genre and develops an alternative narrative of the Lied that embraces an understanding of the contributions of women and of the contexts of their engagement with German song and related genres Lieder composers including Fanny Hensel Clara Schumann Pauline Viardot Garcia and Josephine Lang are considered with a stimulating variety of analytical approaches In addition to the focus on composers associated with history and theory of the Lied the various chapters explore the cultural and sociological background to the Lied s musical environment as well as engaging with gender studies and discussing performance and pedagogical contexts The range of subject matter reflects the interdisciplinary nature of current research in the field and the energy it generates among scholars and performers Women and the Nineteenth Century Lied aims to widen readers perception of the genre and help promote awareness of women s contribution to nineteenth century musical life through critical appraisal of the cultural

Analytical Essays on Music by Women Composers: Concert Music, 1960-2000 Laurel Parsons, Brenda Ravenscroft, 2016-03-18 Over the past 30 years musicologists have produced a remarkable new body of research literature focusing on the lives and careers of women composers in their socio historical contexts But detailed analysis and discussion of the works created by these composers are still extremely rare This is particularly true in the domain of music theory where scholarly work continues to focus almost exclusively on male composers Moreover while the number of performances broadcasts and recordings of music by women has unquestionably grown these works remain significantly underrepresented in comparison to music by male composers Addressing these deficits is not simply a matter of rectifying a scholarly gender imbalance the lack of knowledge surrounding the music of female composers means that scholars performers and the general public remain unfamiliar with a large body of exciting repertoire

Analytical Essays on Music by Women Composers Concert Music 1960 2000 is the first to appear in a groundbreaking four volume series devoted to compositions by women across Western art music history Each chapter opens with a brief biographical sketch of the composer before presenting an in depth critical analytic exploration of a single representative composition linking analytical observations with questions of meaning and sociohistorical context Chapters are grouped thematically by analytical approach into three sections each of which places the analytical methods used in the essays that follow into the context of late twentieth century ideas and trends Featuring rich analyses and critical discussions many by leading music theorists in the field this collection brings to the fore repertoire from a range of important composers thereby enabling further exploration by scholars teachers performers and listeners

Phyllis Weliver,2016-07-28 Over the first half of the nineteenth century writers like Austen and Bront confined their critiques to satirical portrayals of women musicians Later however a marked shift occurred with the introduction of musical female characters where were positively to be feared First published in 2000 this book examines the reasons for this shift in representations of female musicians in Victorian fiction from 1860-1900 Focusing on changing gender roles musical practices and the framing of both of these scientific discourses the book explores how fictional notions of female musicians diverged from actual trends in music making This book will be of interest to those studying nineteenth century literature and music
