The Lever of Riches Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative

societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

The Long Way Home Odell Richardson Jr., 2009-11 The Long Way Home The Testimony is a first of its kind from the inner city streets of Baltimore Maryland This narrative non fiction story is NOT a glorification of the despair that plagues many urban districts throughout our country but it is an informative intense detailed urban centerpiece that goes against conventional wisdom of what society may believe about the inner city and many of its occupants This story bridges a gap many believed could not be It s a unique approach to the harsh realities of the streets and to life as a whole It s a story about change decisions and consequences This is one man s story It s an urban story about God This is certainly not a street tale lacking depth one without significant meaning or positive goals This story is about family

trials perseverance love God life and its purpose This read will erase any doubt and convince all that anything is possible for anyone The author assures us all that this is a story told with two main goals in mind to Glorify God and to strive for a good future while loving every human being along the way
