Entrepreneurship As Social Change Chris Steyaert, Daniel Hjorth, 2008-01-01 a reflective and scholarly work that presents exciting and challenging views to mainstream entrepreneurship The four books comprising the series would certainly be a valuable addition to any entrepreneurship library

However each book also stands alone as an individual purchase Lorraine Warren International Journal of Entrepreneurial Behaviour and Research The narrative and flow of the book is superb and very interesting to read The book is well edited and thought provoking which makes it an interesting read Vanessa Ratten Journal of Enterprising Communities People and Places in the Global Economy This book the third in the Movements in Entrepreneurship series examines entrepreneurship as a societal phenomenon It provides an in depth study of the social aspects of entrepreneurship illustrating how entrepreneurship affects society The need to move beyond economy to disclose entrepreneurship in its societal forms is demonstrated as is the relevance of our understanding of entrepreneurship as a societal phenomenon The contributors show that entrepreneurship is a society creating force and as such it evokes new questions for entrepreneurship research and attempts to engage with new theoretical formulations They begin with discussions on early Schumpeter and a rhetorical analysis of the current academic literature on social entrepreneurship They go on to present myriad contextual examples of how entrepreneurship can shape social change and indicate how this is initiated through various social settings relationships and communities Through rich empirical work this book explores the social of social entrepreneurship and in doing so shows us how entrepreneurship is at home where society is created As such it will prove a fascinating read for academics

researchers and students with an interest in entrepreneurship sociology and economic sociology **Economy** Ron Martin, 2017-11-30 Economic geographers have always argued that space is key to understanding the economy that the processes of economic growth and development do not occur uniformly across geographic space but rather differ in degree and form as between different nations regions cities and localities with major implications for the geographies of wealth and welfare This was true in the industrial phase of global capitalism and is no less true in the contemporary era of post industrial knowledge driven global capitalism Indeed the marked changes occurring in the structure and operation of the economy in the sources of wealth creation in the organisation of the firm in the nature of work in the boundaries between market and state and in the regulation of the socio economy have stimulated an unprecedented wave of theoretical conceptual and empirical enquiry by economic geographers Even economists who traditionally have viewed the economy in non spatial terms as existing on the head of the proverbial pin are increasingly recognising the importance of space place and location to understanding economic growth technological innovation competitiveness and globalisation This collection of previously published work though containing but a fraction of the huge explosion in research and publication that has occurred over the past two decades seeks to convey a sense of this exciting phase in the intellectual development of the discipline and its importance in grasping the spatialities of contemporary economic life **Co-produced Economies** Ray

Hudson, 2019-02-13 In common with most other advanced capitalist economies of the Global North the UK has experienced a decline in the manufacturing industry and an increase in the service sector in recent decades At the same time there has been a substantial manufacturing growth in a number of countries in the Global South especially China and India Why have

these changes occurred What have been their economic and ecological consequences How can we best understand the way the contemporary economy functions This book explores the answers to these questions proposing that the contemporary capitalist economy is best understood as a complex socio spatial system of co production involving relations between people things and non human entities It is argued that these people typically have conflicting and competitive interests yet can come together to resolve their differences or find ways of regulating their conflicting interests National states continue to have a critical role in establishing these systems of regulation At the same time many companies draw on the knowledge of their customers while others enrol animals insects and plants as co producers As a result the improbable processes of commodity production and capital accumulation continue more or less routinely with problems and occasional crises overcome in a variety of ways Co produced Economies will be of interest to students of economic geography political economy and economic development and more generally to social scientists interested in issues of the causes and consequences of economic change It will also be of relevance to policy makers seeking to develop economic policies in the increasingly volatile global economy and in the context of growing environmental concerns **Environment & Planning** ,1998 Worlds of Welfare Steven Pinch,2002-11-01 Throughout the world welfare systems have been experiencing a period of unprecedented change Understanding these changes is difficult not only because of their diversity but also because they vary so much from place to place Worlds of Welfare provides a clear and concise guide to these changes The first part of the book examines the range of different welfare states around the world describing the various reforms such as privatisation and commercialisation which have been introduced in recent years The second part of the book tests the many theoretical perspectives for understanding such social change The book concludes with an exploration of the future of the welfare state in multicultural societies Clearly written with an extensive glossary of key terms the book demonstrates how a geographical perspective is crucial to understanding the diversity of welfare reform Worlds of Welfare will be of interest to all concerned for the future of welfare services *A Companion to Economic Geography* Eric Sheppard,2008-04-15 A Companion to Economic Geography presents students of human geography with an essential collection of original essays providing a key to understanding this important subdiscipline The contributions are written by prominent international scholars offering a wide ranging overview of the field Places economic geography in the wider context of geography Contributions from leading international scholars in the field Presents a comprehensive up to date and accessible overview of all the major themes in the field Explores key debates controversies and questions using a variety of historical and theoretical vantage points Charts the important work that has been done in recent years and looks forward to new developments in the global economy **The Oxford Handbook of Economic Geography** Gordon L. The Golden Age Illusion Michael John Webber, 1996-09-20. What happened to the so called golden age of the postwar boom? Unprecedented rates of economic growth, profitability and wage increases during the 1950s and 60s have given way to a global capitalist economy in disarray. Reassessing common interpretations of postwar economic history and geography, this book focuses on the evolution of the global economy from the 1950s to the present. Based on extensive research, the book assesses histories of growth, profitability and technological change in core industrial economies (Japan and the USA), raw material dependent economies (Australia and Canada) and several newly industrializing countries (Brazil, South Korea and Taiwan). The authors build on standard models of economic change to incorporate new developments in regional dynamics; they use nonlinear, nonequilibrium and evolutionary arguments to frame discussions of profit rates, technological change and interregional capital flows.

The Corporate Firm in a Changing World Economy (RLE International Business) Marc Smidt, Egbert Wever, 2013-04-02. This book examines the economic environment and phenomena of multinational business with reference to case studies of major multinational companies including IBM, Philips, Nissan and Volvo. It assesses how the major theories explaining the response of companies to changes are borne out by the experience of individual firms.

The Routledge Handbook of Henri Lefebvre, The City and Urban Society Michael E. Leary-Owhin, John P. McCarthy, 2019-11-21. The Routledge Handbook of Henri Lefebvre, The City and Urban Society is the first edited book to focus on Lefebvre's urban theories and ideas from a global perspective, making use of recent theoretical and empirical developments with contributions from eminent as well as emergent global scholars. The book provides international comparison of Lefebvrian research and theoretical conjecture and aims to engage with and critique Lefebvre's ideas in the context of contemporary urban social and environmental upheavals. To use Lefebvre's spatial triad as a research tool as well as a point of departure for the adoption of ideas such as differential space to reassess Lefebvre's ideas in relation to nature and global environmental sustainability and to highlight how a Lefebvrian approach might assist in mobilising resistance to the excesses of globalised neoliberal urbanism. The volume draws inspiration from Lefebvre's key texts *The Production of Space*, *Critique of Everyday Life* and *The Urban Revolution* and includes a comprehensive introduction and concluding chapter by the editors. The conclusions highlight implications in relation to increasing spatial inequalities, increasing diversity of needs including those of migrants, more authoritarian approaches and asymmetries of access to urban space. Above all, the book illustrates the continuing relevance of Lefebvre's ideas for contemporary urban issues and shows via global case studies how resistance to spatial

domination by powerful interests might be achieved The Handbook helps the reader navigate the complex terrain of spatial research inspired by Lefebvre In particular the Handbook focuses on the series of struggles globally for the right to the city and the collision of debates around the urban age cityism and planetary urbanisation It will be a guide for graduate and advanced undergraduate teaching and a key reference for academics in the fields of Human Geography Sociology Political Science Applied Philosophy Planning Urban Theory and Urban Studies Practitioners and activists in the field will also find the book of relevance
