Markets During Deregulation in Indonesia Chris Manning,1997 **Industrializing Malaysia** K. S. Jomo,2013-05-13

Despite growing concern over environmental issues and the sustainability of economic growth industrialization is still generally associated with progress and development This is particularly true of developing countries where industrialization is often the nation s top priority Industrializing Malaysia presents a critical analysis of the experience of industrialization in Malaysia examining the role impact and efficacy of post independence industrialization policies The author refocuses attention on some major intended as well as unintended implications and consequences of policies and performance A wide range of issues is covered in addition to general historical commentaries and sectoral studies there are analyses of direct foreign investment technology linkages free trade zones industrial estates and rural development The Role of Government in East Asian Economic Development Masahiko Aoki,Hyung-Ki Kim,Masahiro Okuno-Fujiwara,1997-03-13 The role of government in East Asian economic development has been a continuous issue Two competing views have shaped enquiries into the source of the rapid growth high performing Asian economies and attempts to derive a general lesson for other developing economies the market friendly view according to which government intervenes little in the market and the developmental state view in which it governs the market What these views share in common is a conception of market and government as alternative mechanisms for resource allocation They are distinct only in their judgement of the extent to which market failures have been and ought to be remedied by direct government intervention This collection of essays suggests a breakthrough third view the market enhancing view Instead of viewing government and the market as mutually exclusive substitutes it examines the capacity of government policy to facilitate or complement private sector co ordination The book starts from the premise that private sector institutions have important comparative advantages over government in particular in their ability to process information available on site At the same time it recognizes that the capabilities of the private sector are more limited in developing economies The market enhancing view thus stresses the mechanisms whereby government policy is directed at improving the ability of the private sector to solve co ordination problems and overcome other market imperfections In presenting the market enhancing view the book recognizes the wide diversity of the roles of government across various East Asian economies including Japan Korea Hong Kong Malaysia and China and its path dependant and developmental stage nature U.S. Energy Policy United States.
