**The India Directory, Or, Directions for Sailing to and from the East Indies, China, Australia, and the Interjacent Ports of Africa and South America** James Horsburgh, 1841      *Genes, Language, & Culture History in the Southwest Pacific* Jonathan S. Friedlaender, 2007-04-19 The broad arc of islands north of Australia that extends from Indonesia east towards the central Pacific is home to a set of human populations whose concentration of diversity is unequalled elsewhere Approximately 20% of the world's languages are spoken here and the biological and genetic heterogeneity among the groups is extraordinary Anthropologist W W Howells once declared diversity in the region so Protean as to defy analysis However this book can now claim considerable success in describing and understanding the origins of the genetic and linguistic variation there In order to cut through this biological knot the authors have applied a comprehensive battery of genetic analyses to an intensively sampled set of populations and have subjected these and complementary linguistic data to a variety of phylogenetic analyses This has revealed a number of heretofore unknown ancient Pleistocene genetic variants that are only found in these island populations and has also identified the genetic footprints of more recent migrants from Southeast Asia who were the ancestors of the Polynesians The book lays out the very complex structure of the variation within and among the islands in this relatively small region and a number of explanatory models are tested to see which best account for the observed pattern of genetic variation here The results suggest that a number of commonly used models of evolutionary divergence are overly simple in their assumptions and that often human diversity has accumulated in very complex ways      *Exploring Structures in Languages and Language Contact* Nataliya Levkovych, Julia Nintemann, Maike Vorholt, 2025-06-02 The contributions of this volume offer fresh insights into different aspects of grammatical structures Language contact is the primary focus of several contributions addressing various aspects of this topic including lexical borrowings creole languages and other contact effects Ranging from typological perspectives on grammatical structures to individual case studies the volume sheds light on the complex processes underlying linguistic diversity worldwide      **Circulation in Population Movement (Routledge Revivals)** Murray Chapman, R. Mansell Prothero, 2013-09-05 First published in 1985 this collection of essays deals with processes of population movement and how they have operated over time It is also about people Melanesians who number some five million and inhabit the region stretching from the Indonesian province of Irian Jaya to the Independent State of Fiji Standard work on Movement in third world societies has emphasized migration involving a shift in residence from one domicile to another at the expense of the interchange of people between diverse places and different circumstances Many moves as from villages and towns are circulatory they begin at go away from but ultimately end in the same dwelling place and community This book focuses on the full range of territorial mobility especially circulation and its meanings for the people involved This volume brings together indigenous scholars foreign field researchers and international authorities from many of the social sciences

anthropology demography economics geography and sociology It presents a set of multicultural statements about the mobility of particular peoples within a region of the third world This collection about specifically Melanesian issues aims to stimulate broader visions among population scholars and it underlines the pressing need for more theoretical and empirical work on a volatile yet neglected category of population movement     The Proceedings of the Scientific Meetings of the Zoological Society of London Zoological Society of London,1879     **Preliminary Determination of Epicenters** ,1983

the island of Nauru where thirty nine leprosy patients were killed and thousands of Naurans were ill treated and forced to leave their homes Without denying individual and national responsibility the author explores individual atrocities in their broader social psychological and institutional milieu and places Japanese behavior during the war in the broader context of the dehumanization of men at war In his substantially revised conclusion Tanaka brings in significant new interpretations to explain why Japanese imperial forces were so brutal tracing the historical processes that created such a unique military structure and ideology Finally he investigates why a strong awareness of their collective responsibility for wartime atrocities has been and still is lacking among the Japanese
