Resources in Education, 1990-07 **The Future of Ubiquitous Learning** Begoña Gros, Kinshuk, Marcelo Maina, 2015-07-28 This book explores emerging pedagogical perspectives based on the design of new learning spaces supported by digital technologies and brings together some of the best research in this field The book is divided into three themes foundations of emerging pedagogies learning designs for emerging pedagogies and adaptive and personalized learning The chapters provide up to date information about new pedagogical proposals and examples for acquiring the requisite skills to both design and support learning opportunities that improve the potential of available technologies **The Urbanism of Exception** Martin J. Murray, 2017-03-10 This book challenges the conventional modernist inspired understanding of urbanization as a universal process tied to the ideal typical model of the modern metropolis with its origins in the grand Western experience of city building At the start of the twenty first century the familiar idea of the city or

urbanism as we know it has experienced such profound mutations in both structure and form that the customary epistemological categories and prevailing conceptual frameworks that predominate in conventional urban theory are no longer capable of explaining the evolving patterns of city making Global urbanism has increasingly taken shape as vast distended city regions where urbanizing landscapes are increasingly fragmented into discontinuous assemblages of enclosed enclaves characterized by global connectivity and concentrated wealth on the one side and distressed zones of neglect and impoverishment on the other These emergent patterns of what might be called enclave urbanism have gone hand in hand with the new modes of urban governance where the crystallization of privatized regulatory regimes has effectively shielded wealthy enclaves from public oversight and interference *Jobs Aren't Enough* Roberta Rehner Iversen, Annie Laurie

Armstrong, 2006 Job opportunity is a myth for 25% of U S wage earners **Comparative Health Law and Policy** Irehobhude O. Iyioha, Remigius N. Nwabueze, 2016-05-23 Health law and policy in Nigeria is an evolving and complex field of law spanning a broad legal landscape and drawn from various sources In addressing and interacting with these sources the volume advances research on health care law and policy in Nigeria and spells the beginning of what may now be formally termed the Nigerian health law and policy legal field The collection provides a comparative analysis of relevant health policies and laws such as reproductive and sexual health policy organ donation and transplantation abortion and assisted conception with those in the United Kingdom United States Canada and South Africa It critically examines the duties and rights of physicians patients health institutions and organizations and government parastatals against the backdrop of increased awareness of rights among patient populations The subjects which are discussed from a legal ethical and policy reform perspective critique current legislation and policies and make suggestions for reform The volume presents a cohesive comparative and comprehensive analysis of the state of health law and policy in Nigeria with those in the US Canada South Africa and the UK As such it provides a valuable comparison between Western and Non Western countries Jews and the American Soul Andrew R. Heinze, 2006-11-05 What do Joyce Brothers and Sigmund Freud Rabbi Harold Kushner and philosopher Martin Buber have in common They belong to a group of pivotal and highly influential Jewish thinkers who altered the face of modern America in ways few people recognize So argues Andrew Heinze who reveals in rich and unprecedented detail the extent to which Jewish values often in tense interaction with an established Christian consensus shaped the country s psychological and spiritual vocabulary Jews and the American Soul is the first book to recognize the central role Jews and Jewish values have played in shaping American ideas of the inner life It overturns the widely shared assumption that modern ideas of human nature derived simply from the nation s Protestant heritage Heinze marshals a rich array of evidence to show how individuals ranging from Erich Fromm to Ann Landers changed the way Americans think about mind and soul The book shows us the many ways that Jewish thinkers influenced everything from the human potential movement and pop psychology to secular spirituality It also provides fascinating new interpretations of Sigmund Freud

Alfred Adler and Western views of the psyche the clash among Protestant Catholic and Jewish moral sensibilities in America the origins and evolution of America's psychological and therapeutic culture the role of Jewish women as American public moralists and more A must read for anyone interested in the contribution of Jews and Jewish culture to modern America

The Port Authority of New York and New Jersey has morphed in ways that would be unrecognizable to its founders Its mission evolved from improving rail freight to building motor vehicle crossings airports office towers and industrial parks and taking control of a failing commuter rail line In its early years the agency was often viewed with admiration however as it drew up plans negotiated to take control of airfields and marine terminals and constructed large bridges and tunnels the Port Authority became the object of less favorable attention It was attacked as a super government that must be reined in while the mayors of New York and Newark argued that it should be broken up with its pieces given to local governments for their own use Despite its criticisms and travails for over half a century the Port Authority overcame hurdles that had frustrated other public and private efforts built the world's longest suspension bridge and took a leading role in creating an organization to reduce traffic delays in the New York New Jersey region How did the Port Authority achieve these successes And what lessons does its history offer to other cities and regions in the United States and beyond In a time when public agencies are often condemned as inefficient and corrupt this history should provide some positive lessons for governmental officials and social reformers In 2021 the Port Authority marked its 100th birthday Its history reveals a struggle between the public and private sectors the challenges of balancing democratic accountability and efficiency and the tension between regional and local needs From selected Port Authority successes and failures Philip Mark Plotch and Jen Nelles produce a significant and engaging account of a powerful governmental entity that offers durable lessons on collaboration leadership and the challenge of overcoming complex political challenges in modern America **The Discursive Construction of**

Intercultural Understanding in China Wang Xi, 2015-11-11 This book represents an ethnographic study of an International Baccalaureate Diploma Program in a school in mainland China serving Chinese students and staffed by teachers from a variety of origins It offers in depth descriptions of the way in which students teachers and managers interact and communicate with one another in a variety of school activities Through the communication process cultural experiences and understandings are negotiated constantly among school participants The ethnographic study also has a critical intention Going beyond description the author discusses the extent to which networks of social relationships in the case are imbued by asymmetries in power and how this leads to people's inability unwillingness and unawareness to interact with those from different cultural backgrounds As research findings reveal where the construction of meaning is less equally available to each participant prejudice and exclusiveness are more likely to be assumed impeding individuals intercultural learning The key is to empower those less privileged giving them legitimacy to come to voice in an institutional context on the one hand

and protecting their reflections on hegemonic discourse meticulously on the other hand Since the research explores the complexities and subtleties of the communication process that are bound to particular contexts like most ethnographic studies it aims at adding a body of experience and humanistic understanding of cultures rather than testing theories Although the IB Program being studied can hardly be representative of the overall development of international education in China the detailed description of contextual issues of the case and the research procedures could facilitate the readers to vicariously experience these events thus they can make their own decisions about the transferability of the research to their own unique situations
