**Grand Theories and Ideologies in the Social Sciences** H. Wiarda, 2010-09-13 This book analyzes the main competing grand theories in the social sciences including developmentalism dependency analysis Marxism institutionalism rational choice Freudianism environmentalism sociobiology neurosciences and transitions to democracy Power, Place, and State-Society Relations in Korea Jongwoo Han, 2013-11-26 No book has addressed the simultaneous phenomena of Korea's rapid economic development and its vibrant democratization in a single coherent paradigm The late developmentalist approach emphasizes the strong role of Korea's state and bureaucratic efficiency but does not explain how political development was concurrent with the economic miracles in the Han River modernization and dependence theories also fail to explain the aspect of simultaneity in this phenomenon What these three theories commonly miss is the unique relationship between state and society in Korea's long history of political culture In this book Jongwoo Han takes a holistic approach to understanding these phenomena by examining the state's role in the unprecedented economic development and society's capabilities to resist the state's centralized power Han re-articulates state-society relations through Onuf's social constructivist approach based on three rules of a political community hegemony hierarchy and heteronomy This book expands upon this effort to re-construct the state and society relations in two ways First it produces case studies of the capital city of Hanyang Joseon Dynasty from 1392 to 1910 Kyeongseong Japanese colonial control from 1910 to 1945 and Seoul 1945 current The capital city is analyzed as a container for the major ideologies and ways of thinking that have shaped three important political eras Second it adopts two indigenous thoughts Neo Confucianism and geomancy as sources of the main political and cultural ideologies that shape Korea's state and society relations These sources have never been treated as units of political analysis This book finds that both Neo Confucianism and geomancy over two periods of Hanyang and Kyeongseong are two main contributing factors of the emergence of the developmental state and vibrant democracy in Korea in the Seoul era Politics and Social Insight (Routledge Revivals) Francis Castles, 2009-07-15 First published in 1971 this is a clear straightforward introductory discussion of the importance of sociological knowledge and particularly sociological theory for the understanding of political life The topics covered include sociology and the discipline of politics the elementary forms of political life and the relationship between theory evidence and insight Francis Castles also looks at functionalism and the analysis of conflict as sociological meta-theories and at the idea of anomie and the theory of mass society The book should be of prime interest to students of politics and to students of the social sciences in general **Promise Of Development** Peter F Klaren, 2018-02-23 In recent years Latin Americanists have been among the most innovative and

productive theorists of the uneven process of development This collection of substantial selections from some of the most prominent theorists in the field represents a scholarly consolidation and reassessment of the controversies concerning the development of Latin America Beginning with a historiographic overview the editors emphasize the origins evolution and historical context of the development of each theoretical school modernization dependency and Marxism corporatism and bureaucratic authoritarianism and then present key selections drawn from the writings of major theorists organized by school Each selection is prefaced with a short editorial introduction that highlights the central themes A concluding section outlines the main debates surrounding each school and suggests new directions in theoretical development that might arise from criticism of the theories of authoritarianism and the search for democratic processes of development The book s usefulness as a text is further enhanced by selected bibliographies that contain additional readings on each development theory Here is a single source for Latin Americanists who hope to interest and instruct their students in the rich theoretical traditions and debates in Latin American studies This book can also be a strong core volume for courses on other developing areas

in understanding other countries and global regions but no one agrees how much or how precisely to measure it In this important book well known Comparativist Howard J Wiarda traces the long and controversial history of culture studies and the relations of political culture and identity politics to political science Under attack from structuralists institutionalists Marxists and dependency writers Wiarda examines and assesses the reasons for these attacks and why political culture went into decline only to have a new and transcendent renaissance and revival in the writings of Inglehart Fukuyama Putnam Huntington and many others Today political culture now updated to include identity politics stands as one of these great explanatory paradigms in political science the others being structuralism and institutionalism Rather than seeing them as diametrically exposed Howard Wiarda shows how they may be made complementary and woven together in more complex multicausal explanations This book is brief highly readable provocative and certain to stimulate discussion It will be of interest to general readers and as a text in courses in international relations comparative politics foreign policy and Third World studies
