**Rethinking Art History** Donald Preziosi, 1989-01-01 A general overview of the theoretical and institutional history of the discipline of art history Refuting the image of art history as a discipline in crisis Preziosi asserts that many of the dilemmas and contradictions of art history today are not new but can be traced back to problems surrounding the founding of the discipline its institutionalization and its academic expansion since the 1870s Donald Preziosi has written a timely and incisive study of the methods and assumptions of art history in the modern period As the book unfolds one realizes that art history was never as unitary and monolithic as the phrase the discipline of art history suggests but is in fact a complicated and highly contradictory range of practices whose disciplinary coherence may be more mythical than real This is a deliberately discomfiting book however for its clear sightedness rigor and wit it is a book to be welcomed by everyone concerned with the present condition and future direction of visual studies Norman Bryson Harvard University An important and courageous book *Rethinking Art History* is a rigorous and original contribution to the current post structuralist and postmodernist debates in cultural studies here and abroad Steven Z Levine Bryn Mawr College Through this kind of reading of the discourse of art history Preziosi provides some acute analysis of the metaphors and stratagems which continue to discipline the discipline of art history

**Knowledge and Skills in Translator Behavior** Wolfram Wilss,1996-01-01 This book represents an approach which is intended to give readers a general insight into what translators really do and to explain the concepts and tools of the trade bearing in mind that translation cannot be reduced to simple principles that can easily be separated from each other and thus be handled in isolation On the whole the book is more process than product centred Translation is seen as an activity with an intentional and a social dimension establishing links between a source language community and a target language

community and therefore requiring a specific kind of communicative behavior based on the question Who translates what for whom and why To the extent that the underlying principles assumptions and conclusions are convincing to the reader the practical implications of the book last but not least in translation teaching are obvious *Research in Education* ,1971-12
