New Entrance Design:

New Entrance Design Eva Dallo, 2005 The entrance to a house acts as its visiting card Its conception has changed enormously over the years as has its social uses and the space that was once considered indispensable for receiving guests and keeping the house away from view on first contact whether out of a desire to preserve privacy or a belief that it was bad taste to put living space on display has changed to such an extent that it is on the verge of disappearing from many homes In fact in many cases the entrance is the axis around which the space will be used to greater advantage and the layout of the various areas will follow a logical order in contrast a misguided placement results in an erroneous starting point for a residential project So we are devoting these 192 pages to solutions for entrances of various shapes and styles belonging to different types of homes from all over the world drawn up by a wide range of architects problems and opportunities in the design of entrances to ports and harbors United States. expansion and urbanization The initial claim and starting point of the book is the existence of a profound multidimensional shift in the coastal mega urban region with a major tendency towards urban upgrading economic restructuring and a clearly observable consolidation of political institutions For the first time since the beginning of the reform and opening up after 1978 this has led to a stronger bias toward urban regeneration an adaptive re use of the building stock and an establishment of post industrial knowledge based creative industries The book investigates these changes as a set of mutually dependent developments that have to be understood and analyzed in connection with one another Thus the backgrounds and underlying forces that shape physical restructuring in the developed urban cores of the mega urban region and the ways in which the relevant actors and institutions are trying to both cope with and to influence each other are introduced here
