Exploring the Rhetoric of International Professional Communication Carl Lovitt, Dixie Goswami, 2020-11-25 Presents a collection of fourteen essays that responds to the need for a more rhetorical conception of professional communication as an international discipline This book challenges the adequacy of relying on preconceived notions about the factors that determine discourse in international professional settings Scientific and Technical Communication James H. Collier, David M. Toomey, 1997 Scientific and Technical Communication is a major textbook that represents a new focus area in communication studies It integrates multidisciplinary perspectives on the relations among rhetoric science technology and public policymaking to the process and product of technical communication The text is inspired by science and technology studies STS a field emerging from the history sociology and philosophy of science and technology which also has roots in economics political theory and rhetoric Reformulating the issues raised by STS within the context of technical communication Scientific and Technical Communication is composed of three highly integrated parts Part I provides a summary critique and alternative to recent theoretical perspectives developed in the rhetoric of science and the sociology of scientific knowledge Part II applies these critical alternatives to the traditional practices of scientific and technical communication and shows how

these new practices can be applied to the communication that is vital in forming national and local science and technology policy This hands on introductory textbook will supply students and professionals in the areas of scientific and technical communication rhetoric and media studies with broad based and applicable knowledge in this area

Academy-Industry Relationships and Partnerships Tracy Bridgeford, Kirk St. Amant, 2017-07-05 In the field of technical communication academics and industry practitioners alike regularly encounter the same question What exactly is it you do Their responses often reveal a fundamental difference of perspective on what the field is and how it operates For example academics might discuss ideas in terms of rhetorical theory while practitioners might explain concepts through more practical approaches involving best business practices And such differences can have important implications for how the field as a whole moves forward over time This collection explores ideas related to forging effective academia industry relationships and partnerships so members of the field can begin a dialogue designed to foster communication and collaboration among academics and industry practitioners in technical communication To address the various factors that can affect such interactions the contributions in this collection represent a broad range of approaches that technical communicators can use to establish effective academy industry partnerships and relationships in relation to an area of central interest to both education The 11 chapters thus present different perspectives on and ideas for achieving this goal In so doing the contributors discuss programmatic concerns workplace contexts outreach programs and research and writing The result is a text that examines different general contexts in which academia industry relationships and partnerships can be established and maintained It also provides readers with a reference for exploring such interactions

Perspectives on Software Documentation Thomas Barker, 2020-11-25 This book is designed to address the randomness of the literature on software documentation As anyone interested in software documentation is aware the field is highly synthetic information about software documentation may be found in engineering computer science training technical communication management education and so on Perspectives on Software Documentation contains a variety of perspectives all tied together by the shared need to make software products more usable

Research on Composition Peter Smagorinsky, 2006 Covering the period between 1984 and 2003 this authoritative sequel picks up where the earlier volumes Braddock et al 1963 and Hillocks 1986 now classics in the field left off It features a broader focus that goes beyond the classroom teaching of writing to include teacher research second language writing rhetoric home and community literacy workplace literacy and histories of writing Each chapter is written by an expert in the area reviewed and covers both conventional written composition and multimodal forms of composition including drawing digital forms and other relevant media Research on Composition is an invaluable road map of composition research for the next decade and required reading for anyone teaching or writing about composition today

Handbook of Research on Writing Charles Bazerman, 2009-03-04 The Handbook of Research on Writing ventures to sum up inquiry over the last few decades on what we know about writing and the many ways we know it How do people write

How do they learn to write and develop as writers Under what conditions and for what purposes do people write What resources and technologies do we use to write How did our current forms and practices of writing emerge within social history What impacts has writing had on society and the individual What does it mean to be and to learn to be an active participant in contemporary systems of meaning This cornerstone volume advances the field by aggregating the broad ranging interdisciplinary multidimensional strands of writing research and bringing them together into a common intellectual space Endeavoring to synthesize what has been learned about writing in all nations in recent decades it reflects a wide scope of international research activity with attention to writing at all levels of schooling and in all life situations Chapter authors all eminent researchers come from disciplines as diverse as anthropology archeology typography communication studies linguistics journalism sociology rhetoric composition law medicine education history and literacy studies The Handbook's 37 chapters are organized in five sections The History of Writing Writing in Society Writing in Schooling Writing and the Individual Writing as Text This volume in summing up what is known about writing deepens our experience and appreciation of writing in ways that will make teachers better at teaching writing and all of its readers better as individual writers It will be interesting and useful to scholars and researchers of writing to anyone who teaches writing in any context at any level and to all those who are just curious about writing

Singular Texts/plural Authors Lisa S. Ede, Andrea A. Lunsford, 1992 Why write together the authors ask They answer that question here in the first book to combine theoretical and historical explorations with actual research on collaborative and group writing Lisa Ede and Andrea Lunsford challenge the assumption that writing is a solitary act That challenge is grounded in their own personal experience as long term collaborators and in their extensive research including a three stage study of collaborative writing supported by the Fund for the Improvement of Post Secondary Education The authors urge a fundamental change in our institutions to accommodate collaboration by radically resituating power in the classroom and by instituting rewards for collaborative work that equal rewards for single authored work They conclude with the injunction Today and in the twenty first century our data suggest writers must be able to work together They must in short be able to collaborate

Handbook of Academic Learning Gary D. Phye, 1997-01-08 The Handbook of Academic Learning provides a comprehensive resource for educational and cognitive psychologists as well as educators themselves on the mechanisms and processes of academic learning Beginning with general themes that cross subject and age level the book discusses what motivates students to learn and how knowledge can be made personal for better learning and remembering Individual chapters identify proven effective teaching methods for the specific domains of math reading writing science and critical problem solving how students learn within those domains and how learning can be accurately assessed for given domains and age levels The Handbook takes a constructivist perspective to academic learning emphasizing the construction of personal knowledge of an academic nature Constructivism within the context of learning theory is viewed as involving an active learner that constructs an academic knowledge base through the development of

cognitive strategies and metacognition The book discusses the development of basic literacy skills that provide the foundation for higher order thinking and problem solving Constructivism recognizes the social dimension of classroom learning and emphasizes the motivational elements of self regulation and volition as essential learner characteristics Written by authors who have first hand experience with both theory development and the development of authentic classroom instructional techniques the Handbook empowers educators to develop implement and field test authentic instructional practices at their school site The book provides a review of the literature theory research and skill techniques for effective teaching and learning Identifies effective teaching with specific techniques Covers elementary school through high school Discusses teaching methods for all main subject areas reading writing math science and critical thinking Identifies how students learn to learn Reviews theory research techniques and assessment Contains field tested examples for the educational professional at the school site Provides a resource for staff development

Handbook of Writing and Text Production Eva-Maria Jakobs, Daniel Perrin, 2014-02-27 Writing matters and so does research into real life writing The shift from an industrial to an information society has increased the importance of writing and text production in education in everyday life and in more and more professions in the fields of economics and politics science and technology culture and media Through writing we build up organizations and social networks develop projects inform colleagues and customers and generate the basis for decisions The quality of writing is decisive for social resonance and professional success This ubiquitous real life writing is what the present handbook is about The de Gruyter Handbook of Writing and Text Production brings together and systematizes state of the art research The volume contains five sections focussing on I the theory and methodology of writing and text production research as well as on problem oriented and problem solving approaches related to II authors III modes and media IV genres and V domains of writing and text production Throughout the 21 chapters exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions Both established and future scholars can benefit from the handbook s fresh approach to writing in the context of multimodal multi semiotic text production

Nonacademic Writing Ann Hill Duin, Craig J. Hansen, 2013-11-05 In this volume methodological cultural technological and political boundaries felt by writers are analyzed translated and challenged in a way that will appeal to researchers theorists graduate students instructors and managerial audiences Instead of extracting rules from previous research the contributors working from multidisciplinary perspectives describe and analyze the social and technological contexts surrounding nonacademic writing Their essays present a formative rather than summative outlook toward future research on nonacademic writing Collectively these chapters articulate a unique perspective toward nonacademic writing that considers The centrality of emerging communications technologies in nonacademic writing research and the need for a socio technological perspective New technologies reshape the concept of text and significantly impact the writing process and written products in nonacademic settings The relationship between the academy and the

workplace A number of chapters challenge us sometimes from opposing perspectives to scrutinize our role as writing educators in preparing students for the workplace Should we support the interests of corporate employers or should we resist those interests Should we enculturate students in workplace writing practices by placing them in these environments or should we examine the tacit knowledge gained by workplace professionals and deliver this via classroom instruction New theory new research agendas Contributors from diverse fields offer new theoretical lenses or use established lenses in innovative ways expanding the agenda for nonacademic writing research This volume represents the vision the social landscape demands for research and pedagogy in nonacademic writing **Subject-oriented Texts** Hartmut

Schröder,2011-09-08 No detailed description available for Subject oriented Texts **Interacting With Audiences** Ann M. Blakeslee,2000-10 This volume examines how scientists learn about and then address their audiences studying scientific rhetoric in actual practice For scholars and students in scientific and technical writing rhetoric studies of science and related areas *Textual Dynamics of the Professions* Charles Bazerman,James G. Paradis,1991 Textual Dynamics of the Professions is a collection of fifteen essays examining the real effects of text on professional practices in academic scientific and business settings Charles Bazerman and James Paradis describe textual dynamics as an interaction in which professional texts and discourses are constructed by and in turn construct social practices In the burgeoning field of discourse theory this anthology stands apart in its treatment of a wide range of professional texts including case studies student papers medieval letters and product instructions and in the inclusion of authors from a variety of disciplines Invaluable to the new pedagogical field of writing across the curriculum Textual Dynamics of the Professions is also a significant intervention into the studies of rhetoric writing theory and the sociology of knowledge Writing Like An Engineer Dorothy A.

Winsor,2013-11-05 Comprised of a study spanning over five years this text looks at four engineering co op students as they write at work Since the contributors have a foot in both worlds work and school the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like Primarily concerned with whether engineers see their writing as rhetorical or persuasive the study attempts to describe the students changing understanding of what it is they do when they write Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified a reverence for data and the hierarchical structure of the organizations in which engineering is most commonly done Both of these features discourage an open recognition of persuasion Finally the study shows that the four co op students learned most of what they knew about writing at work by engaging in situated practice in the workplace rather than by attending formal classes *Sweet Reason* Susan Wells,1996-07-15 In Sweet Reason Susan Wells presents a rhetorical model for understanding the diverse discourses of modernity Wells describes modernity as a system of texts which we are only now learning to read In order to comprehend how these texts organize our world she argues we must grasp how reason and desire interact to create meaning To this end

Wells offers a rhetoric based on an understanding of meaning as intersubjectivity created through the work of language. Wells elaborates this rhetoric of intersubjectivity by drawing on both Jürgen Habermas's concept of communicative rationality and on Jacques Lacan's theory of desire, affirming the significance of reason and desire for rhetorical studies. From scientific articles to classroom altercations, contemporary government hearings to MONTAIGNE'S ESSAYS, Wells organizes several using rhetoric as an art and she shows how rhetoric operates in practice. Susan Wells is associate professor of English at Temple University.

Design Discourse David Franke, Alex Reid, 2010-10-06

Design Discourse: Composing and Revising Programs in Professional and Technical Writing addresses the complexities of developing professional and technical writing programs. The essays in the collection offer reflections on efforts to bridge two cultures what the editors characterize as the art and science of writing often by addressing explicitly the tensions between them. Design Discourse offers insights into the high stakes decisions made by program designers as they seek to function at the intersection of the practical and the abstract, the human and the technical.
