## **New Imaginaries:**

*Castoriadis* Jeff Klooger, 2009 This book is a critical exploration of the philosophical underpinnings and implications of Cornelius Castoriadis reflections on Being society and the self The book introduces the reader to the main concepts of Castoriadis work but goes further to uncover the fundamental philosophical issues addressed by Castoriadis and to critically examine the issues his work opens up assessing and where necessary offering suggested amendments to the answers Castoriadis himself puts forward Key conceptual problems addressed include the distinction between autonomy and heteronomy the nature of the self and self creation and the nature of determination in a fundamentally indeterminate universe Research Method in the Postmodern James Scheurich, 2014-01-02 In recent years research in the social sciences has been dominated by the debate on the merits of qualitative method versus quantitative methodology Until recently the debate appeared to have been won by those promoting the qualitative approach but then postmodern theory appeared on the scene challenging all our preconceptions about research method This book goes one step further than those working at the philosophical level showing the implications of postmodernism for practice *The Oxford Handbook of Energy and Society* Dr. Debra J. Davidson, Dr. Matthias Gross, 2018-07-11 The Oxford Handbook of Energy and Society presents an overview of this expanding area that has evolved dramatically over the past decade away from one largely dominated by structural political economic treatments on the one hand and social psychological studies of individual level attitudes and behaviors on the other toward a far more conceptually and methodologically rich and exciting field that brings in for example social practices system complexity risk theory social studies of science and social movements theories This volume seeks to capture the variety of scales and methods and range of both conceptual and empirical analyses that define the field while drawing particular attention to indigenous peoples poverty political power communities and cities Organized into seven sections chapters cover social theory and energy society relations political economic perspectives consumption dynamics energy equity and energy poverty energy and publics energy and governance as well as emerging trends **Imagination and the Imaginary** Kathleen Lennon, 2015-02-20 The concept of the imaginary is pervasive within contemporary thought yet can be a baffling and often controversial term In *Imagination and the Imaginary* Kathleen Lennon explores the links between imagination regarded as the faculty of creating images or forms and the imaginary which links such imagery with affect or emotion and captures the significance which the world carries for us Beginning with an examination of contrasting theories of imagination proposed by Hume and Kant Lennon argues that the imaginary is not something in opposition to the real but the very faculty through which the world is made real to us She then turns to the vexed relationship between perception and imagination and drawing on Kant Merleau Ponty and Sartre explores some fundamental questions such as whether there is a distinction between the perceived and the imagined the relationship between imagination and creativity and the role of the body in perception and imagination Invoking also Spinoza and Coleridge Lennon argues that far from being a realm of

illusion the imaginary world is our most direct mode of perception She then explores the role the imaginary plays in the formation of the self and the social world A unique feature of the volume is that it compares and contrasts a philosophical tradition of thinking about the imagination running from Kant and Hume to Strawson and John McDowell with the work of phenomenological psychoanalytic poststructuralist and feminist thinkers such as Merleau Ponty Sartre Lacan Castoriadis Irigaray Gatens and Lloyd This makes Imagination and the Imaginary essential reading for students and scholars working in phenomenology philosophy of perception social theory cultural studies and aesthetics Cover Image Bronze Bowl with Lace Ursula Von Rydingsvard 2014 Courtesy the artist Galerie Lelong and Yorkshire Sculpture Park Photo Jonty Wilde

**Educational Reciprocity and Adaptivity** Abe Ata, Ly Tran, Indika Liyanage, 2017-12-22 Educational Reciprocity and Adaptability challenges the common belief that adapting to new educational settings is the responsibility of international students alone The book argues that reciprocal responses are required by students and stakeholders alike for an efficient and equitable accommodation of international students in educational settings Considering how international students negotiate academic challenges and social tensions it presents both theoretical frameworks and practical tools to work around the tension regarding ethical academic practices Crucially exploring these issues across a range of geographical and institutional contexts and therefore offering critical insights into significant developments in international education across the world the much needed research in this edited collection explores institutional educational policies regarding international students and stakeholders institutional practices and how they are received educational adaptability and responses from different stakeholders the experiences of international students and institutions in negotiating academic and social tensions This important contribution to research on the experiences of international students in different geographical and educational contexts is of great interest to academics researchers and postgraduate students in the fields of international education comparative education sociology of education youth studies intercultural studies migration studies and TESOL Everyday Agri-Environmental Governance Jérémie Forney, Dana Bentia, Angga Dwiartama, 2024-07-05 Revitalising the way the social sciences question agri environmental governance this book introduces the everyday governance approach as a means to improving the sustainability of agriculture and food systems The everyday refers to localised practices specific networks and practical norms that emerge in a process of interaction translation and reinterpretation The authors build this approach on assemblage thinking and theory which focuses on the collective production of the social through complex sets of connections For this reason assemblage thinking becomes a particularly productive guide in exploring how everyday governance is co produced in the interaction between numerous social processes involving a diversity of actors and instruments The authors navigate between original and contrasting case studies from Switzerland Indonesia and the European Union in order to reorient attention to the transformative nature of governance which they locate along four different dimensions of the everyday 1 the interdependence of instruments within a wider governance assemblage 2 the uncertainty and unpredictability

of effects in agri environmental governance 3 the distributed nature of agency and its implication for power relations 4 the importance of capacities in the transformation of agri food systems This book calls for a redesigning of agri environmental governance that should move away from the setting of fix and precise objectives and solutions and rather aim for a consolidation of sound foundations on which desirable futures can emerge The book will be an essential read for students and scholars interested in sustainable agriculture and food systems governance modes and approaches and sustainability more broadly The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

*The Art of Public Space* Kim Gurney, 2016-01-05 A journey through Johannesburg via three art projects raises intriguing notions about the constitutive relationship between the city imagination and the public sphere through walking gaming and performance art Amid prevailing economic validations the trilogy posits art within an urban commons in which imagination is all important

Anthropocene Ecologies Mary Mostafanezhad, Roger Norum, 2020-06-09 Anthropocene Ecologies brings political ecology and tourism studies to bear on the Anthropocene Through a collective examination of political ecologies of the Anthropocene by leading scholars in anthropology geography and tourism studies the book addresses critical themes of gender health conservation agriculture climate change disaster coastal marine management and sustainability Each chapter theoretically and empirically unravels entanglements of tourism nature and imagination to expose the political ecological drivers of the Anthropocene as a material and symbolic force and its deepening integration with tourism Grounded in ethnographic and qualitative research the volume is interdisciplinary in scope yet linked in its shared focus on the political threat as well as the social potential of the Anthropocene and its imaginaries This collection contributes to emerging scholarship on tourism sustainability and global environmental change in the current geological epoch Anthropocene Ecologies will be of great interest to political ecology focused scholars of tourism socio environmental change and the Anthropocene The chapters were originally published as a special issue in the Journal of Sustainable Tourism

The Epistemology of Disasters and Social Change Jordan Pascoe, Mitch Stripling, 2024-05-09 An earthquake in Mexico City spurs the rise of democracy A plague in South Africa lays the foundations for apartheid A terrorist attack on New York City triggers massive shifts in global security A global pandemic sets the stage for the largest civil rights protests in generations Beyond their physical impact disasters assault our certainty and shape a narrow space to alter the structure of what we believe That change can lead us toward disinformation and authoritarianism or it can lead us toward greater solidarity and human rights It all depends on the choices we make as we live through crisis on how in fact we choose to know each other The Epistemology of Disasters and Social Change draws on social epistemology disaster sociology psychology and feminist philosophy to investigate how disasters function as cauldrons of social transformation for good and ill We wrestle with how disasters change us moment by moment and provide new strategies to help these tragic events produce positive social transformation leading to a brighter future

during this century of crisis      Cities and Nature Lisa Benton-Short, John Rennie Short, 2013-05-29 Cities and Nature connects environmental processes with social and political actions The book reconnects science and social science to demonstrate how the city is part of the environment and how it is subject to environmental constraints and opportunities This second edition has been extensively revised and updated with in depth examination of theory and critical themes Greater discussion is given to urbanization trends and megacities the post industrial city and global economic changes developing cities and slums urban political ecology the role of the city in climate change and sustainability The book explores the historical relationship between cities and nature contemporary challenges to this relationship and attempts taken to create more sustainable cities The historical context situates urban development and its impact on the environment and in turn the environmental impact on people in cities This provides a foundation from which to understand contemporary issues such as urban political ecology hazards and disasters water quality and supply air pollution and climate change The book then considers sustainability and how it has been informed by different theoretical approaches Issues of environmental justice and the role of gender and race are explored The final chapter examines the ways in which cities are practicing sustainability from light greening efforts such as planting trees to more comprehensive sustainability plans that integrate the multiple dimensions of sustainability The text contains case studies from around the globe with many drawn from cities in the developing world as well as reviews of recent research updated and expanded further reading to highlight relevant films websites and journal articles This book is an asset to students and researchers in geography environmental studies urban studies and planning and sustainability      **Handbook of Futures Studies** Roberto Poli, 2024-07-05 This insightful Handbook emphasizes the unique contribution that Futures Studies offers when understanding and managing current situations Contributing authors argue that by learning to examine the future in the present individuals and organizations can expand their abilities to analyze assess and ultimately make better decisions This title contains one or more Open Access chapters      Spaceflight in the Shuttle Era and Beyond Valerie Neal, 2017-06-27 An exploration of the changing conceptions of the Space Shuttle program and a call for a new vision of spaceflight The thirty years of Space Shuttle flights saw contrary changes in American visions of space Valerie Neal who has spent much of her career examining the Space Shuttle program uses this iconic vehicle to question over four decades worth of thinking about and struggling with the meaning of human spaceflight She examines the ideas images and icons that emerged as NASA Congress journalists and others sought to communicate rationales for or critiques of the Space Shuttle missions At times concurrently the Space Shuttle was billed as delivery truck and orbiting science lab near Earth station and space explorer costly disaster and pinnacle of engineering success The book s multidisciplinary approach reveals these competing depictions to examine the meaning of the spaceflight enterprise Given the end of the Space Shuttle flights in 2011 Neal makes an appeal to reframe spaceflight once again to propel humanity forward Neal may be the one person who knows the space shuttle program better than the astronauts who

flew this iconic vehicle Her book casts new light on the program exploring its cultural significance through a thoughtful analysis As one who lived this history I gained much from her broader perspective and deep insights Kathryn D Sullivan retired NASA astronaut and former Administrator of the National Oceanic and Atmospheric Administration A much needed look at how to create a cultural narrative for human spaceflight that resonates with millennials rather than the Apollo generation Quite valuable Marcia Smith Editor SpacePolicyOnline com

*Nurturing Nature and the Environment with Young Children* Janice Kroeger, Casey Y. Myers, Katy Morgan, 2019-05-01 This book at the intersection of early childhood and reconceptualizing practice looks at how practitioners theorists and teachers are supporting young children to care about the environment differently Despite the current popularity of post human perspectives in social science more broadly and in early childhood studies more specifically this is one of few to make visible international practices and perspectives that emerge at the intersection of early childhood education environmental justice sustainability and intergenerational interspecies communities The book provides an innovative exploration of the links between children elders and nature With contributions from established scholars practitioners and newcomers this book reframes educating for social justice within an ecological landscape one in which young children and their elders are mobilized to understand reconceptualize and even undo negative environmental impact whilst grappling with the ways in which the earthly forces are acting upon them Specific theoretical chapters spirituality nature critical and post human materiality pragmatics and constructivism approaches are blended with applications of pedagogic strategies from across the globe This book responds to a growing interest among early childhood professionals and scholars for sustainably focused and ethically reimagined programs This collection rewards the reader with opportunities to critically reflect on their own practice delves into new terrestrial collectives and explores new pedagogical pathways It will be essential reading for practitioners and scholars alike

**Border Culture** Victor Konrad, Anne-Laure Amilhat Szary, 2022-12-29 This book introduces readers to the cultural imaginings of borders the in between spaces in which transnationalism collides with geopolitical cooperation and contestation Recent debates about the refugee crisis and the spread of the COVID 19 pandemic have politicized culture at and of borders like never before Border culture is no longer culture at the margins but rather culture at the heart of geopolitics flows and experience of the transnational world Increasingly culture and borders are everywhere yet nowhere In border spaces national narratives and counter narratives are tested and evaluated coming up against transnational culture This book provides an extensive and critical vision of border culture on the move drawing on numerous examples worldwide and a growing international literature across border and cultural studies It shows how border culture develops in the human imagination and manifests in human constructs of

nation and state as well as in transnationalism By analyzing this new and expanding cultural geography of border landscapes the book shows the way to a fresh broader dialogue Exploring the nature and meaning of the intersection of border and culture this book will be an essential read for students and researchers across border studies geopolitics geography and cultural studies

**Deleuzian Intersections** Casper Bruun Jensen, Kjetil Rödje, 2010 Science and technology studies cultural anthropology and cultural studies deal with the complex relations between material symbolic technical and political practices In a Deleuzian approach these relations are seen as produced in heterogeneous assemblages moving across distinctions such as the human and non human or the material and ideal This volume outlines a Deleuzian approach to analyzing science culture and politics

Sociology and Post-Socialist Transformations in Eastern Europe Borut Roncevic, Tamara Besednjak Valič, 2024-11-28 The volume offers a unique and comprehensive reflection on the role of sociology and sociologists in the transformation of post socialist Eastern European societies It provides detailed insight on the status of sociology in Eastern Europe its institutional development specifics of national sociological traditions the controversial and ambiguous relationship with the political system and importantly state of the art knowledge about the role of sociology as a discipline and sociologists as academics educators public intellectuals experts politicians or civil society activists in three decades of transformation The volume follows a cultural political economy approach and provides a series of national case studies that analyse the role of sociology in re imagining Eastern European societies This topical volume is of interest to a wide interdisciplinary readership in the social sciences especially students and researchers working on Eastern Europe and on post socialist societies
