North Country Bishop William Nicolson:

North Country Bishop Francis Godwin James,1956 **North Country Bishop, a Biography of William Nicolson, by Francis Godwin James** Francis Godwin James,1956 Beyond Liberty and Property J. Gunn,1983-07-01 The themes explored include political liberty legal tyranny defences of influence in government recognition of the Opposition and the development of organic categories of political analysis the latter in a chapter that explodes the association often presumed between organicism and conservative modes of thought A chapter on the Fourth Estate examines the gradual process of legitimation of interests culminating in the influence of the press Central to the account of new political forces and their recognition is the idea of public opinion which evolved during this period from the notion of public spirit Chapters on the classical legacy of the century and on the High Tories examine two backward looking aspects of the political culture Tracing the persistent influence of High Toryism Gunn questions the conventional wisdom about eighteenth century ideological consensus in general and Whig solidarity in particular He demonstrates that theories of government from the seventeenth century survived to a degree not previously admitted by modern scholarship Northumbria Robert Colls,2019-02-26 The North East is probably England's most distinctive region A place of strong character with a very special sense of its past it is as William Hutchinson remarked in 1778 truly historical ground This is a book about both the ancient Anglian kingdom of Northumbria which stretched from the Humber to the Scottish border and the ways in which the idea of being a Northumbrian or a northerner or someone from the North East persisted in the area long after the early English kingdom had fallen It examines not only the history of the region but also the successive waves of identity that that history has bestowed over a very long period of time Successful nations write about themselves in these terms so why not regions Northumbria existed before England began but is still with us in name and in the way we think about ourselves A series of sections entitled Christian Kingdom Borderland and Coalfield New Northumbria Cultural Region and Northumbrian Island explore the region on the grand scale from the very beginning and bring a sharp sense of history to bear on the various threads that have influenced the making of modern regional identity The book is a work of exceptional scholarship Never before have so many acclaimed historians addressed together the issues which have affected this special region Clearly written and rich in ideas chapters explore the physical origins of Northumbria and consider just how the pressing political and military claims of adjoining states shaped and tempered it There are further chapters on art music mythology dialect history economy poetry politics religion antiquarianism literature and settlement They show how Northumbrians have lived and died and looked forward and back and these accounts of the North East's past will surely help in the shaping of its future

A. I. Champion,1992 First published in 1992 this book examines the intellectual confrontation between priest and Freethinker from 1660 to 1730 and the origins of the early phase of the Enlightenment in England Through an analysis of the practice of historical writing in the period Champion maintains that historical argument was a central component for displaying defences of true religion Taking religion and specifically defences of the Church of England after 1660 as central to the politics of the period the first two chapters of the book explore the varieties of clericalist histories arguing that there were rival emphases upon regnum or sacerdos as the font of true religion The remainder of the book examines how radical Freethinkers like John Toland or the third Earl of Shaftesbury set about attacking the corrupt priestcraft of established religion but also importantly promoted a reforming civil theology *Britain in the First Age of Party, 1687-1750* Clyve Jones,1986-07-01 The 70 years of late Stuart and early Hanoverian Britain following 1680 were a crucial period in British politics and society seeing the growth both of political parties and of stability This collection of original essays provides a coherent account of Britain in the First Age of Party **Lay People and Religion in the Early Eighteenth Century** W. M. Jacob,Waltraud M. Jacob,2002-06-20 This book investigates the part that Anglicanism played in the lives of lay people in England and Wales between 1689 and 1750 It is concerned with what they did rather than what they believed and explores their attitudes to clergy religious activities personal morality and charitable giving Using diaries letters account books newspapers and popular publications and parish and diocesan records Dr Jacob demonstrates that Anglicanism held the allegiance of a significant proportion of all people They took the lead in managing the affairs of the parishes which were the major focus of communal and social life and supported the spiritual and moral discipline of the church courts He shows that early eighteenth century England and Wales

remained a largely traditional society and that Methodism emerged from a strong church which was central to the lives of most people

Religion, Law, and Power : The Making of Protestant Ireland 1660-1760 S. J. Connolly,1992-07-02
This is a study of religion politics and society in a period of great significance in modern Irish history The late seventeenth and early eighteenth centuries saw the consolidation of the power of the Protestant landed class the enactment of penal laws against Catholics and constitutional conflicts that forced Irish Protestants to redefine their ideas of national identity S J Connolly s scholarly and wide ranging study examines these developments and sets them in their historical context The Ireland that emerges from his lucid and penetrating analysis was essentially a part of ancien r eacute gime Europe a pre industrialized society in which social order depended less on a ramshackle apparatus of coercion than on complex structures of deference and mutual accommodation along with the absence of credible challengers to the dominance of a landed eacute lite in which the ties of patronage and clientship were often more important than horizontal bonds of shared economic or social position and in which religion remained a central part of personal and political motivation Abbreviations Introduction I A NEW IRELAND 1 December 1659 A Nation Born in a Day 2 Settlement and Explanation 3 A Foreign Jurisdiction 4 Papists and Fanatics 5 Counter Revolution Defeated II AN ELITE AND ITS WORLD 6 Uneven Development 7 Gentlement and Others 8 Manners III THE STRUCTURE OF POLITICS 9 A Company of Madmen The Politics of Party 1691 1714 10 Little Employments Smiles Good Dinners 11 Politics and the People IV RELATIONSHIPS 12 Kingdoms 13 Nations 14 Communities 15 Orders V THE INVENTIONS OF MEN IN THE WORSHIP OF GOD RELIGION AND THE CHURCHES 16 Numbers 17 Catholics 18 Dissenters 19 Churchmen 20 Christians VI LAW AND THE MAINTENANCE OF ORDER 21 Resources 22 The Limits of Order 23 The Rule of Law 24 Views from Below Disaffection and the Threat of Rebellion 25 Views from Above Perceptions of the Catholic Threat VII REASONABLE INCONVENIENCES THE THEORY AND PRACTICE OF THE PENAL LAWS 26 Raw Head and Bloody Bones Parliamentary Management and Penal Legislation 27 Debate 28 The Conversion of the Natives 29 Protestant Ascendancy The Consequences of the Penal Laws Epilogue Bibliography Index *Caedmonis monachi Paraphrasis poetica* Caedmon,Franciscus Junius,2000

The Clerical Profession in the Long Eighteenth Century, 1680-1840 W. M. Jacob,2007-09-06 W M Jacob examines the concept of profession during the later Stuart and Georgian period with special reference to the clergy of the Church of England He describes their social backgrounds how they were recruited selected and educated and obtained jobs how they were paid and their lifestyles and family life as well as examining the evidence for what they did as leaders of worship pastors and teachers how their parishioners responded to them and how they were supervised Jacob concludes that contrary to popular views the clerical profession was much better organized educated and supervised than the medical and legal professions during this period During the age of reform from the 1780s to the 1830s all the professions were criticized Jacob suggests that the modest regulation and professional training introduced in the other learned professions in the 1830s only slowly brought them to the standard already achieved by the

Mayhew, 2000-08-30 Enlightenment Geography is the first detailed study of the politics of British geography books and of related forms of geographical knowledge in the period from 1650 to 1850 The definition and role of geography in a humanist structure of knowledge are examined and shown to tie it to political discourse Geographical works are shown to have developed Whig and Tory defences of the English church and state consonant with the conservatism of the English Enlightenment These politicizations were questioned by those indebted to the Scottish Enlightenment Enlightenment Geography questions broad assumptions about British intellectual history through a revisionist history of geography **Small Dictionaries and Curiosity** John P. Considine, 2017 Small Dictionaries and Curiosity tells a story which has not been told before that of the first European wordlists of minority and unofficial languages and dialects from the end of the Middle Ages to the early nineteenth century These wordlists were collected by people who were curious about the unrecorded or little known languages they heard around them Between them they document more than 40 language varieties from a Basque Icelandic pidgin of the North Atlantic to the Kalmyk language of the lower Volga The book gives an account of about 90 of these dictionaries and wordlists some of them single page jottings and some of them full sized printed books paying attention to their content and their physical form alike It explores the kinds of curiosity and imagination by which their makers were moved the lover of all languages hearing new voices in an inn the speaker of a dying language recording his linguistic memories the patriot deploying his lexicographical findings in the service of an emerging nation It offers an encounter with the diverse voices of the entirety of post medieval Europe turning away from the people of the courts and universities whose language was documented in big dictionaries to listen to people who did not speak the languages of power the people of remote places and dying communities the illiterate poor settled or homeless migrants from the edges of Europe and beyond *The Anglican Episcopate 1689-1800* Nigel Aston, William Gibson, 2023-03-15 The eighteenth century bishops of the Church of England and its sister communions had immense status and authority in both secular society and the Church They fully merit fresh examination in the light of recent scholarship and in this volume leading experts offer a comprehensive survey and assessment of all things episcopal between the Glorious Revolution of 1688 and the early nineteenth century These were centuries when the Anglican Church enjoyed exclusive establishment privileges across the British Isles apart from Scotland The essays collected here consider the appointment and promotion of bishops as well as their duties towards the monarch and in Parliament All were expected to display administrative skills some were scholarly others were interested in the fine arts most were married with families All of these themes are discussed and Wales Ireland Scotland and the American colonies receive specific examination **The Oxford**
