Blown to Hell Walter Pincus,2023-04-06 A Pulitzer Prize winning journalist exposes the sixty seven US nuclear tests in the Marshall Islands that decimated a people and their land The most important place in American nuclear history are the

Marshall Islands an idyllic Pacific paradise that served as the staging ground for over sixty US nuclear tests It was here from 1946 to 1958 that America perfected the weapon that preserved the peace of the post war years It was here with the 1954 Castle Bravo test over Bikini Atoll that America executed its largest nuclear detonation a thousand times more powerful than Hiroshima And it was here that a native people became unwilling test subjects in the first large scale study of nuclear radiation fallout when the ashes rained down on powerless villagers contaminating the land they loved and forever changing a way of life In *Blown to Hell* Pulitzer Prize winning journalist Walter Pincus tells for the first time the tragic story of the Marshallese people caught in the crosshairs of American nuclear testing From John Anjain a local magistrate of Rongelap Atoll who loses more than most to the radiation exposed crew of the Japanese fishing boat the Lucky Dragon to Dr Robert Conard a Navy physician who realized the dangers facing the islanders and attempted to help them to the Washington power brokers trying to keep the unthinkable fallout from public view *Blown to Hell* tells the human story of America's nuclear testing program Displaced from the only homes they had known the native tribes that inhabited the serene Pacific atolls for millennia before they became ground zero for America's first thermonuclear detonations returned to homes despoiled by radiation if they were lucky enough to return at all Others were ripped from their ancestral lands and shuttled to new islands with little regard for how the new environment supported their way of life and little acknowledgement of all they left behind But not even the disruptive relocations allowed the islanders to escape the fallout Praise for *Blown to Hell* A shocking account of the destruction wrought by atomic bomb testing in the Marshall Islands from 1946 to 1958 Pincus makes a persuasive case that in seeking a more powerful weapon for warfare the U S unleashed death in several forms on peaceful Marshall Island people Readers will be appalled Publishers Weekly For more than half a century Walter Pincus has been among our greatest reporters and most persistent truth tellers *Blown to Hell* is a story worthy of his talents infuriating heart breaking and utterly riveting Rick Atkinson Pulitzer Prize winning author of *The Liberation Trilogy* *Military Law Review*, 1994 *Bombs at Bikini* United States. History of U.S. Nuclear Testing and Its Influence on Nuclear Thought, 1945-1963 David M. Blakes, Joseph M. Siracusa, 2014-05-01. The story of U.S. nuclear testing between 1945 and 1963 is a vivid and exciting one but also one of profound importance. It is a story of trailblazing scientific progress, weapons of mass destruction, superpower rivalry, accidents, radiological contamination, politics and diplomacy. The testing of weapons that defined the course and consequences of the Cold War was itself a crucial dimension to the narrative of that conflict. Further, the central question: Why conduct nuclear tests? was fully debated among American politicians, generals, civilians and scientists and ultimately it was victory for those who argued in favor of national security over diplomatic and environmental costs that normalized nuclear weapons tests. A History of U.S. Nuclear Testing and Its Influence on Nuclear Thought 1945-1963 is an examination of this question beginning with the road to normalization and later de-normalization of nuclear testing leading to the Nuclear Test Ban Treaty in 1963. As states continue to pursue nuclear weaponry, nuclear testing remains an important political issue in the twenty first century.

Occupation Circumnavigator Lars Hässler, 2009-08-28. A hippy Sell Up and Sail, this entertaining and inspiring book is more than just a cruising narrative; it is an instructive account showing how anyone can circumnavigate or even sail for an extended period without huge funds. Lars Hassler originally set off intending to sail for three years but by judiciously using his funds and topping them up by taking charter guests on cruises, he sailed around the world for ten years. Woven into the book is advice on costs, distances, timing, power, needs, food and medication; in other words, the practicalities that everyone who sails needs to know about. And at the end, there is a forward-looking chapter providing advice on 'After the Circumnavigation: What Next?'. With a Foreword by Jimmy Cornell and a gorgeous photo section, this is an enjoyable and useful read for anyone thinking or dreaming about making an extended cruise. Lars, the modern day Odysseus, is in many respects an extraordinary person: a man who had the guts to chuck it all in and opt for a lifestyle that others dream of their entire lives. Any reader

planning to follow the author's example will find many useful tips on how to earn a living while cruising Thank you Lasse
